

THANKS!

I wish to return my sincerest thanks to the people of Athens and vicinity, and to all those readers of the Reporter who patronized me so liberally during the Christmas season. Their trade was a very important part of my holiday business and throughout the year has materially increased the volume of my output.

I shall always do my best to serve those of them who may favor me with their patronage by giving them the best value they can get anywhere and treating them with proper business courtesy.

LORD

THE CHEAP FURNITURE MAN
Next Morrison's hotel, Brockville.

They'll Not Last Long At this Price!

So you had better hustle a little and join the procession to our store before you find your sorrow that you are too late. We are selling

Ladies' Fur Lined and Fur Trimmed Capes

For \$5.00

Those who have already made purchases in this line say they never saw anything before to equal them at a much greater price, and we were not surprised to hear it. Neither will you be when you see the great value.

CRAIG

BROCKVILLE HATTEL AND FURRIER

STOCKS

Of Boots and Shoes to be cleared out to make room for Fall Goods.

Brockville's Big One Cash Price Bargain Shoe House
D. W. DOWNEY

We have removed the **Mowat and Johnston** Bankrupt Stock and the **Montreal Bankrupt** Stock from the store lately occupied by **Mowat and Johnston** to our store, 18 King St. We have more shoes than we know what to do with and now offer our own stock at **Bankrupt** prices—**25% to 50% off**—and we guarantee to be satisfied. Never before has such a **great** opportunity been offered such a **great** opportunity to get such a **great** value for your money. No better investment can you make. A little money will buy lots of shoes.

Terms Strictly Cash.
D. W. DOWNEY
AGENT FOR BUTTERICK'S PATTERNS.

LOCAL ITEMS.

Dehorning cattle is extensively practiced in Perth county.

Owing to the proximity of school teachers in Manitoba many country schools are closed.

Five pairs of new bobelights for sale cheap at A. D. Young's (late Arch. James') blacksmith shop, Athens.

\$10,000 private money to loan on real estate security. Apply to JOHN CAWLEY, opp. Reporter office, Athens.

The binder twine factory at the Kingston penitentiary will make this winter 500 tons, to be ready for the market in June.

A new post office was opened last week to be called Taylor Post Office, Nos. 5, 6th Con. Loos, with Mr. Reuben Smith as postmaster.

Mr. E. Sheldon, of Chantry, returning home from a visit with friends in Brockville and vicinity, favored the Reporter with a call on Saturday.

The proposition of the English cheese buyers that the date of manufacture should be stamped on Canadian cheese is favorably received by the manufacturers in this country.

CASH.—\$8900.00 worth of crockery china and glassware at Bankrupt prices. Sales continue for a short time only.—T. W. Dennis, Tea Store and China Hall, Brockville, Ont., nearly opposite the Revere house.

The Gnanocque Journal has changed hands. Mr. E. G. Hartie has stepped out and has been succeeded by Mr. J. A. Thompson, I. W. Foreman of the office. The first number issued by the new proprietor arrived last week and is in every way highly creditable.

Thanking my many friends for their liberal patronage during the past year, and especially for a few weeks past, which has been more than I could have expected, I still extend the invitation to call and examine my stock here at **Atlanta**, where I did not more good than all other remedies, in fact I consider myself cured and with a 25 cent box at that.

A woman cured her husband of staying out late at night by going to the door when he came home and whispering through the keyhole:—"Is that you Willie?" Her husband's name is John, and now he somehow manages to stay at home every night and sleeps with one eye open and a revolver under his pillow.

Since Tuesday, the 1st of January, the use of the private post card is legal in Canada. With a one-cent stamp attached any ordinary card may be sent through the mail as well as the regular official postal card. The cards must be composed of ordinary cardboard, not thicker than the material used for the official post card and the maximum size must correspond as nearly as possible to the size of the ordinary Canadian post card now in use. The minimum size must not be less than three and a quarter inches by two and one quarter inches. The cards must not be folded.

The cards must be in preparation must be fixed, nothing may be written, printed or otherwise impressed except the name and address of the person to whom the card is delivered, and the name and address of the sender of the card and the words "private postcard."

The L. O. O. F. at Delta.

Last Wednesday was a high day among the brethren of the triple links at Delta, the Delta and Athens lodges by Mr. Hy Rath, D. D. G. M., of Brockville. The weather was favorable and the result was a large attendance from both lodges. The District Deputy was accompanied from Brockville by Mr. C. Lyman, P. G., and Mr. Wilkinson, P. G., wearing his veteran jewel—both enthusiastic members of the craft. The installation ceremony was in every respect one of the very best ever conducted in this district, and subsequently Mr. Rath was warmly commended for his excellent and efficient discharge of the duties of his office.

Nearly all the following officers elected were installed: DELTA.
J. P. G.—R. J. Greene.
N. G.—Luther Stevens.
V. G.—Geo. E. Goklin.
R. S.—J. A. Holladay.
S. G.—G. F. McLean.
Tras.—W. H. Moulton.
Ward.—J. M. Sheridan.
Con.—Joel Barlow.
Chap.—Chas. Ab-Is.
R. S. N. G.—W. C. Niblock.
L. S. G.—W. M. Thomas.
L. S. V. G.—Ford Wright.
R. S. S.—J. Willams.
I. G.—E. Bowser.

J. P. G.—I. W. Kelly.
N. G.—Adey Brown.
V. G.—A. E. Moulton.
R. S.—G. F. Donnelly.
P. S.—C. L. Lamb.
Tras.—W. M. Stevens.
Ward.—C. H. Wilson.
Con.—E. T. Tennant.
Chap.—J. Thompson.
R. S. N. G.—J. L. Gallagher.
L. S. N. G.—L. A. Brown.
R. S. V. G.—Frank Blanchard.
L. S. V. G.—S. H. Mott.
R. S. S.—Geo. Judson.
I. G.—S. Niblock.

At the conclusion of the ceremony a number of brief addresses of a pleasing character were delivered, when a motion of adjournment for lunch cut short the flow of oratory. At the Hotel de Brown host Vanalstine had prepared a most elaborate spread which included everything that the heart of a hungry man could desire. Attentive waitresses served the tables promptly and efficiently. When the covers were removed, Mr. Wilkinson was elected to preside. In the absence of a formal program, after the Queen had been duly honored, the Grand Lodge was proposed and the responses to this toast furnished the greater number of the speeches that followed. There was singing, too, and deserving of special notice was a duet by Messrs. Wilkinson and Lyman. Mr. G. F. Donnelly also sang a song, but as it was his first effort he was let go on suspended sentence. The chief speech of the evening was, of course, that of the District Deputy, and it was entertaining, full of encouragement, and was sound and Odifellows doctrine throughout.

Delta Odifellows are experts at entertaining and the visiting brethren present on Wednesday evening were unanimous in voting the whole affair to have been a glittering success.

KARLEY & SEYMOUR
ARE FRIENDS OF THE
Farmer and Builder

They have the best Assortment of Hardware, Tinware, Paints, Oils, Furnishes, Calcimines, Glass, Silverware, Fishing Tackle, etc., in town, and prices to suit the times. The Dairy Churns—best in the market—always in stock and at lowest prices. Guns and ammunition of best quality. See them.

FANGS OF THE RATTLER

NOT CORRECTLY DESCRIBED IN MOST BOOKS OF REFERENCE.
Some Curious Things Disclosed—A Re-Examination of a Dead Specimen—Anatomical Mechanism of the Reptile's Deadly Jaw.
An opportunity of dissecting the business parts of the Croatan rattler, or, in plain English, the rattlesnake, which is the most deadly of all snakes, and the most common of them, submitted for his consideration.
The extremes of man are always the most conspicuous and need the most careful attention. In the case of the rattlesnake, the business parts are the jaws, and the jaws are the most conspicuous part of the animal. The jaws are the most conspicuous part of the animal. The jaws are the most conspicuous part of the animal.

The accompanying drawing is from life, rather than from a good sized rat, or rather from a rattlesnake. The reptile was nearly four feet long, had thirteen rattles, and was found to have died in the early days of the winter. The jaws were lying singly in its very long stomach, lengthwise, one after the other as they were swallowed. The jaws are of two kinds, the front and the back, and are twisted in the same manner, and crossed, so as to give a great force to the end of the jaws. On the other end of the jaws are the fangs. The fangs are of two kinds, the front and the back, and are twisted in the same manner, and crossed, so as to give a great force to the end of the jaws. On the other end of the jaws are the fangs. The fangs are of two kinds, the front and the back, and are twisted in the same manner, and crossed, so as to give a great force to the end of the jaws. On the other end of the jaws are the fangs.

At the meeting of the Eastern Ontario Dairyman's Association, held at St. Catharines, Dec. 21st, 1905, the following resolutions were adopted: Resolved, That the association do its utmost to secure for its members the best prices for their produce. Resolved, That the association do its utmost to secure for its members the best prices for their produce. Resolved, That the association do its utmost to secure for its members the best prices for their produce.

A Resolution of Condolence. At a special meeting of L. O. L. No. 14, Adolphus, held Dec. 22nd, the following resolution was adopted: Resolved, That the lodge do its utmost to secure for its members the best prices for their produce. THE NEW CUTAWAY.

THE FASHIONABLE BUSINESS COAT.
The new cutaway, made with one or three buttons to fasten, besides being a trifle shorter, are rounded at the tail instead of being pointed, and thus more nearly approach the line of beauty. The buttons are in the center of the cutaway described, only it is supplied with large flaps at the pockets.
The vents are a little more inclined to be double breasted, both for street and even-
ing wear, and while marseilles, for evening wear, is getting full attention as material for the cutaway, the collars of all the coats make a display of ample material.
A very popular topcoat is the "lumber-ness," a long, comfortable garment with an ample cape. This is worn with full dress, and at operas and entertainments. Public and private, where evening costume is seen. This coat will be very conspicuous during the evening and about theatre lobbies before and after the performance. It is a pretty, comfortable and a most suitable garment.
There yet remain the shoes. Their various styles of tops are now merging into the pointed, and the condition of extreme pointedness, too. The sharp, aggressive, vicious looking pointed shoe is now the proper thing to wear.
For dress purposes the elegant pattern leather yet holds undisputed sway, and is properly the congress gaiter attire with silk tops, yet the revival of an old fashion is introducing the low, thin soled "penny" which is claiming an equal footing with the silk topped gaiter.
For street wear the heavy patent leather is used, as heretofore, and with it is found a strong rival, the enameled leather, which, with its double cork lined sole, is a most comfortable winter foot covering. With these is to be seen the "russet," which promises to be more of a winter shoe than heretofore, but will not be worn by the fashionable men.
Street shoes should be made. And when laced shoes are worn they are fastened with the "Columbian" button, which is quite large, and five of them make a complement for a shoe.
Thus the fashionable man should dress from top to toe, to be in the swim of fashion, that carries many on its ever moving, constantly changing current, which, to a greater or lesser degree, moves every man in the matter of his apparel.
"Yes," said the physician, "he's dead, poor fellow. His heart has ceased to beat."
"That statement settles it," said the friend. "If there's anything about Slippery Dick that has ceased to beat, he certainly is dead."—Life.

"Yes," said the physician, "he's dead, poor fellow. His heart has ceased to beat."
"That statement settles it," said the friend. "If there's anything about Slippery Dick that has ceased to beat, he certainly is dead."—Life.

A Cap somewhat similar to the "wolf" in the "hooker," which is still in vogue, and appearing to be so, is the low crown brought forward and hooked to the upper surface of the visor.
The tourist's hat of the Alpine variety, that military looking soft hat with a crease through the centre of the crown, is also worn in the business and evening world. It is made of felt or cloth, and is of a soft, heavy weight, that is extremely popular. Then the "crack" or "crack" hat, made of rib silk or merino, holds a firm place in the position for which it is intended.
Not only high, but higher collars are worn by those who want to beat the height of fashion, suffering short necked human beings, that have envy in the giraffe, has considered them high enough for the past two years, but now they are crawling yet higher. The popular height is two and three-quarter inches, but the extreme reaches the six and seven inches. Think of it! And there—shades of our grandfathers—a stock tie is to be worn around this a long, straight tie that is to go twice around the neck, and be tied in a bow in front.
"Speaking of ties, the 'four-in-hand,' the 'tick' and the 'impet' yet remain in popular favor, and will all be worn some winter, but all with a noticeable change in form. They are all to be tied in a much smaller knot at the throat, and the flowing ends are broader. The neck ties are made of a delicate material, but the flowing ends will be worn in increased numbers.
The prevailing red color of last winter remains in neckwear, with an increased number of shades. The plaids are also seen in great quantities in the preliminary stages of the winter. Neckties, made of gray, blue and plaids—and other light colors, are also seen on the counters. These gray promises to take the place of the red in popular favor.

THE BATTLE OF THE TONGUE

THE BATTLE OF THE TONGUE.
The tongue is a thin slender fiber attached to the front of the muscular covering of the jaw, which is in contact with the teeth. It is a muscular organ, and is used for the purpose of tearing and masticating food. It is also used for the purpose of holding and crushing food. It is a muscular organ, and is used for the purpose of tearing and masticating food. It is also used for the purpose of holding and crushing food.
