I imagine they will be on this all night.

The report pushes the Chilean proposal out of the picture. - To give it a place the report would have to be amended somewhat or indicated on attached.

I would favour the Chilean recommendation being included in this way - and would support it by vote - but I doubt the wisdom of seeking to effect any result by participating in the debate.

W. C. C.

The French and all their friends would object to such a change. It will be possible for the Committee to ask Germany's views - & if she shows any willingness to join in the Locarno discussions, the French French and everybody else but Russia would be glad to have her discuss the League question.
