

FAIRBANKS-MORSE

Improved Skidded and Portable Evaporator Tank

GASOLINE ENGINES

These engines are built along the same lines as our Fairbanks-Morse Standard Horizontal Engines, with the exception that our improved Cast Iron Evaporator Tank is cast on top of cylinder, as shown in illustration.

No cooling tank is required, thus overcoming the difficulty of carrying the usual great volume of water. The lubrication difficulties of Air Cooled Engines are overcome in the above. There is very little water in the tank to take off by drain in the cold weather, thus saving time and trouble, and there is no water pump to freeze up. We provide a shield to prevent water slashing out of the Hopper Jacket.

The skidded engine is a very desirable outfit where it is necessary to move the engine, providing a means whereby the engine can be drawn about on its iron-shod runners, or can be placed on a farm truck or a bob sled.

The engine itself is Fairbanks-Morse in every respect, and ensures to the customers the best there is in Gasoline Engine construction.

Send for our FREE CATALOGUE GE 102, showing our full line of Fairbanks-Morse Vertical and Horizontal Gasoline Engines and Machinery for farm work. It means money saved for you. Write to-day.

Just Write for this Catalogue

Don't imagine this is the ordinary dull-reading catalogue, for it isn't. It is very interesting, very practical, and contains information of real value to anyone interested in reducing his hours of loading-labor. It tells all about our Low, Wide-tire Steel Wheels. Tells about their lightness, strength and durability. Tells why they are so easy on horses. Tells about our strong guarantee. Our different styles of Handy Wagons are also displayed and described in detail. Don't you think it would be wise to have a copy of this catalogue by return mail?

Dominion Wrought Iron Wheel Co., Limited, Orillia, Ontario.

To Save Labor

USE THIS

DAIN LOADER

MAKE

Better Hay

WITH THIS

DAIN Side Delivery RAKE

No pulling or tugging to drag the hay from the back end of the load if this Loader is hitched to your wagon, because the elevating bars push the hay forward on the wagon so one man handles the hay easily.

The Dain Loader takes hay from swath or windrow. Two sets of self adjusting rakes having a long sweep over stubble gather hay clean, but do not disturb trash. The reciprocating bars elevate hay without injury to the tender

leaves because the self-expanding throat allows hay to pass freely onto wagon without wadding, tangling or jamming. An apron at top keeps hay from spilling or blowing off side of load. Wheels set underneath so it can be taken through gates and operated close to fences, can be coupled or uncoupled without crawling under wagon, uncoupled without getting off load.

No ropes, cog gears, crossed chains, crooked crank shaft, or other traps to cause trouble, delay and expense. Simple in every respect, light draft and durable.

USE THE DAIN SIDE DELIVERY RAKE and have air cured hay. Such hay has better color, is sweeter, rich in natural juices and nutriment. Worth more to feed or sell.

It's a Tedder and Rake in one, more and better than either. The three sets of teeth on a slowly revolving reel gently deliver two swaths of hay upside down in a loose continuous windrow so that every bit is exposed. The teeth may be set forward out of plumb so fluffy windrows are made in heaviest hay. Spring-supported reel frame prevents jar and strain over roughest grounds.

These two tools are famous for saving labor and improving hay. Like Dain Mowers, Sweep Rakes, Stackers and Presses, they are made of highest grade guaranteed material and will stand severe use even abuse that would ruin ordinary tools.

We have specialized on building hay making machinery for over a quarter of a century and have a reputation for producing unequalled labor-saving, rapid-hay-handling, reliable tools.

Ask your Dealer to show you the Great Dain Line.
