GOSSIP

Raising calves without milk is provided for by Blatchford's calf meal, advertised on another page in this issue, and claimed to be a perfect milk substitute for raising veal calves, and valuable for pushing forward pigs, colts and lambs.

A. C. Pettit, Freeman, Ont., writes: Our Shorthorns have come through the winter well, and the present stock bull is leaving some excellent youngsters that will tempt early buyers. Young bulls, fit for service, and females all ages, are for sale.

Part 2, of Vol. 1, of the Canadian National Records for Sheep, published by the Dominion Sheep-breeders' Association, and compiled and edited in the office of the Canadian National Records at Ottawa, has been issued. This part of Volume 1 contains 542 pages, and pedigree records of the following breeds: Leicester, Cotswold, Oxford, Lincoln, Dorset, Suffolk, Hampshire, Southdown and Cheviot; also rules of entry for each breed, and list of members of each breed making entries.

1911 EXHIBITION DATES.

Royal Dublin Spring Show, Ball's Bridge, April 18-21.

International Horse Show, Olympia, London, June 12-24.

Bath and West of England, at Cardiff, May 1-5.

Royal Agricultural Society, at Norwich, June 26-30.

Highland and Agricultural, at Inverness, July 18-21.

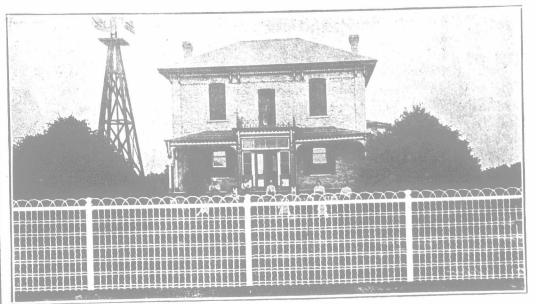

NEWCASTLE HERD OF TAMWORTHS

AND SHORTHORNS. It was sure a lucky day for A. A. Colwill, of Newcastle, Ont., when he purchased his great stock boar, Imp. Cholderton Golden Secret. He is not only a great boar himself in type, size, strength of bone, and masculine character, but he is one of the best sires of the breed ever imported to this country, his get being remarkably uniform, smooth, and full of quality from end to end, and his crossing with the dozen or more daughters of the great several - times Canadian champion boar, Colwill's Choice, is producing wonderful results, results that are bringing to Mr. Colwill very many flattering letters from more than satisfied customers, on receipt of their mail-order purchases. The young things now on hand, for sale, which include about twenty young boars and as many young sows, from four to five months of age, are certainly a choice lot. Besides these, there are two young sows about seven months of age, safe in pig to a grandson of Imp. Cholderton Golden Star, that are show propositions of a high order. Mr. Colwill has used the old stock boar, Imp. Cholderton Golden Secret, above mentioned, about as long as he can safely do so to prevent inbreeding, consequently he is for sale. He is four years old, healthy, active, safe, and sure; a bonanza for some Tamworth breeder. Mr. Colwill reports a banner year for sales, many going to different points in the United States: Kentucky, Georgia, Iowa, Ohio, Maritime Provinces, Quebec, and all over Ontario. The Shorthorns were never in better condition nor higher in quality than now, all young, and descendants of cows that for a great many years have been bred with special attention given to improving their milk production, the majority of those now in the herd the get of Baron Tulip =53879=, a Carnation-bred son of Imp. Baron Beaufort, and out of Imp. Tulip Queen 2nd, and Almdale Ruler =63684=, a Laviniaon of that renowned bull. Village the herd on their dam's side tracthose famous cows, Imp. Louisa and Lab. Snowdrop. The bull now in is the thick, even, mellow, Newwhip -81716=, a son of the aboved Baron Tulip, and his dam one excendants of Imp. Snowdrop. Fonald of Hillhurst. His breedof ense on milk-producing lines, and sale. In females for sale are

three-year-old heifers

good buying, nice, thick heifers.

THE FARMER'S ADVOCATE.

For enclosing front lawns or wherever something extra neat is wanted, our 2 in. Iron Posts with 11/4 in. Top Rail should be used, as shown in the illustration above. For ordinary purposes, neatly trimmed or fancy turned cedar posts, with a top scantling, can be used. This top rail is necessary in all cases for supporting the heavy material.

The big point about Frost Fence is that it is woven from Wire specially made and galvanized by us in our own plant here and exclusively for our own fence trade. We make this wire up to full size, true to the gauge represented. To make prices attractive, smaller wire than advertised is used in some fences. A difference of one-half a size smaller means a saving in material to the maker of about 3c. a rod on a ten wire fence. Insist upon getting fence that is not robbed of 8% of its weight through the use of smaller wires.

There are now 49 distinct styles of Frost Woven Fence to suit any condition or for any purpose.

Frost Woven Lawn Fence!

Decidedly Neat Easy to Erect Reasonable in Price

All Wires are No. 9 galvanized stock. Uprights are only 21/4 in. apart. The deep crimp in all the wires adds to their stiffness and keeps stays firmly in place.

Other Frost Specialties

Galvanized Gates, fancy and plain; Coiled Wire, each build guaranteed; Barb Wire; Soft Wire; Hay Wing Stays and Galvanized Locks for field built fance; Hook for wood picket fence; Iron Posts for farm fence; Tuber Posts with top ornament and rails for Lawn Fence; Fancy Fence material; Maple Leaf designs; Fancy Woven Fence wire straightened and cut to lengths for re-inforcing in concrete posts.

Your Fence, Gate and Wire needs can all be supplied to your best satisfaction and by some reliable Frost dealer near you. If he is not known, write us.

FROST WIRE FENCE CO., Ltd. Hamilton, Canada

Buy a Wagon That Will Last a Lifetime!

It is not an uncommon thing for a T.-K. Handy Wagon to be used 20 years without a cent of expense for repairs. But up-keep cost is the least of its virtues, for this wagon combines more practical adaptability, convenience, durability and actual earning power per dollar invested than any other wagon on the market. It makes farm work easier and more profitable. Investigate

Handy Farm Wagons and Wide Tire Steel Wheels

Equip your wagons with T.-K. Wide-Tire Steel Wheels and eliminate all possibility of accidents on rough and rocky roads, delays and need of lightening the load over sandy and muddy stretches. These wheels are flawless in design and strong as a steel bridge, yet weigh no more than wood. They lighten the draft on horses from 25 to 50 per cent., and are the greatest savers of time and labor that a farmer can employ.

Write for catalogue containing pictures and full details. Address:

TUDHOPE-KNOK CO., LTD., Orillia, Ontario.

Bull calved June 12th, 1910. Sired by Count Hengerveld Fayne DeKol, and out of Helena Seipkje, a cow that made here since last spring 10,000 pounds mik in seven months. This bull is half black, and is an extra good individual. Several high-grade heifers also for sale.

E. F. Osler, Bronte, Ontario
