**The fence that's strong all through**

Every wire in our heavy farm fence is No. 9 hard steel, with uniform strength and lasting qualities in each strand. A fence with any small or soft wire in it is short lived. A chain is no stronger than the weakest link. Then PEERLESS Fence made from English wire is rust-proof—that withstands more than double the endurance of other makes.

**Peerless the fence that saves expense**

The PEERLESS does not cost anything to keep—there are no repair bills—it is not affected by changes of temperature. The horizontal wires being crimped makes ample provision for all contraction and expansion. PEERLESS Fence, once well stretched, is always tight—no shock affects it. We are manufacturers of high grade farm, poultry, ornamental fencing and gates. Write for Free Book, a sample of PEERLESS Fence and a simple method of testing any make of fence.

## and its attack upon grain

The smut continues to keep pace in its growth with the wheat, and when the heads appear, the wheat plant directs all its energy to the production of seed. The smut fungus, however, prevents this, as it enters the blossom and feeds on the nutritive material that the plant elaborates to store up as starch and gluten. The grain is thus replaced by a thick mass of smut spores.

Formaldehyde properly used prevents Smut. Used and recommended by Agricultural Colleges and Experimental Farms.
