The Cleanup of the Mill of the Okanogan Has Been Made.

The Canadian Gold Fields Syndicate is Interested With the Gooderham-Blackstock Syndicate in East Kootenay Mines-Other Items of Interest.

stock syndicate have already secured the balance of the mines and mill of the company, dated Okanogan Landing, November 9th. In this dispatch Mr. Edgecombe stated that the clean-up for the month of October was 238 ounces of concentrates on hand. These are worth \$80 per ton. This would make the approximate value of the clean-up aggregate something over \$4,000. The bricks should be here inside of the next two days. Considering that the mill has been working for over half the month for twelve hours instead of 24 hours, because of a shortage of fuel, this result is remarkable. The of fuel, this result is remarkable. The difficulty as to the fuel has been overcome completely, as the company has made contracts for the delivery of fuel for three months to come. By the end of this time it is thought the water power, adjoining that Mr. Gooderham and his associates associates and the same time that found in the other paramouncement has been given out as to the smelter returns from the shipments it carries the same values. it is thought the water power, adjoining the property on the Similkameen river, nave become joint owners in the two new and which is the property of the company, will be utilized, and then there will the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the mining public have a wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold with the wonderfully keen or \$17. the values being chiefly gold pany, will be utilized, and then there will be no further need for fuel with which to interest in the future of all these properoperate the mill. The mill is now running day and night, and with the rich ore which is now being put through the mill, the next months' clean-up will far exceed the present one. There is ore enough in sight to keep the mill running without any doubt, for the next nine months. In the meanwhile the work of developing the property is being pushed, and new ore reserves are being uncovered. Mr. A. S. Edgcombe, the superintendent, is expected to arrive in this city within the next few days.

Work on the Ethel Group.

James Chambers, superintendent for the Pavo Consolidated Mining company, will be encountered.

Will Soon Have Power.

The St. Elmo five-drill compressor plant will be ready for use in about a week. Superintendent Krumb Thursday stated at he expected to be using the power within that period. Then machine drills will be used, and the work of developing the property will be expedited. The property is looking well, and the showing ore is excellent. The crosscut from the main tunnel is now in for a distance of ing steadily and rapidly increased, a new furnace especially for the treatment of pose of intersecting a parallel ledge to lead ores starts this week, or as soon as pose of intersecting a parallel ledge the one which has been drifted on.

The Pay Ore Mines

Dr. A. C. Sinclair, of the Pay Ore (B. C.) Mines, limited, has received a report from Mr. John H. Smith, mining engineer of Grand Forks, who was recently directed other furnace to treat copper ores nas inst heen completed. By midwinter the of Grand Forks, who was recently directed to examine the property of the company, which is situated a half-mile east of me north fork of the Kettle river and 12 miles north of Grand Forks. Mr. Smith reported that he found matters in a satisfactory condition on the property, and says that of ore in sight and that the ledge is widening as depth is obtained. The ore is of the concen trating type carrying gold and silver and a small percentage of copper and assays from \$10 to \$100 per ton.

The Eva Group Bonded.

The Eva group on Fish creek, in the Trout Lake district, has been bonded to outside capital by Messrs. Tweedle and Hutchinson, of Comaplix. This property is the most extraordinary strike point of value that has been made in the Lardeau division. Although Fish creek and its tributaries have always been visited the Mountain Lion and says that known as one of the richest sections of he never saw a mine in the same stage of what is universally termed on the outside development have such a showing of ore Lardeau, still this strike has as can be seen there. It is going, thrown the bulk of the other properties to be one of the great mines of that sec in the shade as regards the value of its tion. Mr. Johnson visited the Republic surface rock. The mineral obtained from mine and examined the recently the property is gold, and the croppings strike on the lower level of that property from \$400 to \$600 in gold. Cory Menerty. There is a splendid showing of ore hinick and J. A. Magee have claims on the reports that while the town of Re this lead and on their holdings the lead public is quiet still there is a great deal as exposed is about 30 feet in width and containing values as stated above. This, it is expected, will give an impetus to development operations.

A Strike on the Exchequer.

Superintendent Musson reports a good strike on the Exchequer. In running one ber of men. of the drifts this week the miners came The Bound across a large bunch of high grade ore. About a ton of it was knocked down and Exchequer's second shipment is now going forward to the Hall Mines smelter.

Can Ship at Any Time.

The Arlington mine, near Erie, has lately installed a 75-horse power boiler for running the hoist and pump. The company, although not yet making regular shipments, have a large amount of ore blocked out. The property has been opened up to the 425-foot level, and they are now drifting on the 400-foot level in are now drifting on the 200 local manericy and stability the other mining the more he visits the more he visits the other mining the more he visits the more he vi a position to begin regular ship-ments at any time, and it is thought they will begin to do so very shortly. There are about 50 men employed on the Arlington and the Canadian King, whose property adjoins, the shafts of the two being not more than 200 feet part, and the boarding house answering for the men employed on both properties.

Mining Notes.

The development of the ore body on the 400-foot level of the Iron Mask so far gives 50 feet of stoping ground.

Mr. Nicholas Tregear, who has charge of the development of the Giant, says that he has found the main vein of the property. The place of the find is a short distance above the old workings and dips into the hill. He thinks that the shaft sunk on the property by the former management was in a slide.

IN GOOD COMPANY.

THE RESULT IS SATISFACTORY The Canadian Gold Fields and Goode ham-Mackintosh Syndicate.

> The mining deals carried out in East Kootenay this season have assumed rather more importance than use general public are aware of. Mr. J. C. Drewry has already been credited with making a shrewd move for his company in obtaining a bond on the control of the Moyie and Queen of

The Bornite Bank Company.

Mr. J. R. Cranston of the Bornte Bank Mining company, is in the city on a visit. The properties of the company are in the Nelson division. Mr. oranston reports that the shaft house and other buildings have been completed and that supplies for the winter are now being taken in. The force is now engaged in developing the property. Mr. Cranston will leave for the property of the company. Operations are to be carried on continuously.

Returned From the Coast.

Mr. A. B. Clabon, mining man, returned which is operating the Ethel group, was in town Thursday. He reports that crosscutting is in progress on the 68-foot level. The crosscut has been made for a distance of 13 feet, and will have to be driven 40 feet further before the ledge will be account and the Lardeau country. He reports that business is especially good in Vancouver and New Westminster. The latter city has been entirely rebuilt and is better even than it was before the fire. In the Lardeau country, the conditions are warn. Lardeau country the conditions are very good, considerable ore is being shipped out and there is a great deal of development work in progress. Two railways will be completed into that section next year and there should be considerable move-ment there in the year 1900. Mr. Clabon was questioned as to the political situation at the coast he was reticent, but said he thought they were very much mixed.

The Smelter at Trail.

At the Trail smelter the capacity is be enough men can be obtained to work it. Thursday the second copper furnace was blown in and run continuously from then on. This furnace has been idle for some time, but the new water jackets that were needed having arrived they are place, and Trail business men experi-encing some of the benefits of having such an immense and constantly ing industry in their town.

The Rathmullen.

Word has been received here that the showing in the main shaft of the Rathmullen, where the ledge came in at a depti of 170 feet, continues to show very good results. The official report of the mine superintendent will be here in a day or so, when full particulars will be given.

Visited Republic and Boundary.

Mr. J. B. Johnson is back from a visit The formation there is feet, is being extended. that section. The formation there is softer than it is here and one man can do considerably more work there than here, and as a consequence to attain the same number of feet there requires a less num

The Boundary Creek country is flourish are being built, will soon commence to pour out of that country and then there will be more life than ever. Mr. John son, while he admits that there will be some prosperous towns on the Reservation and in the Boundary Creek country, says that it will be a long time till there will grow up a town of the size, permanency and stability of Rossland, and

Freight Coming in Rapidly.

these contained eggs, two apples and one whiskey. Besides this there were two carloads of general merchandise and 10 cars containing lumber and wood, or a total of 17 cars.

Mr. Robert Hunter, of Hunter Brothers, is having a two-story residence constructed on Le Roi avenue near Georgia street. Giant, Friday said that he would at once argued the breaking of ore in the will have all the modern conveniences, and will cost when completed in the main vein of the main vein of the neighborhood of \$5,000.

Ore Continues to be Taken From the Newly Found Ledge.

FOOR LOOKINGOREASSAYS WELL

-Progress of the Work on the Velvet and Portland-Operations Resumed on the Big

Work on the drifts from the main count of which was published in the Miner of Friday, was confirmed last Mr. K. K. Peiser, secretary of the Okan ogan Free Gold Mines, Limited, Thursday received a dispatch from Mr. A. S. Eage-received from Mr. A. S. Eage-received from Mr. A. S. Eage-received from Mr. A. S. Eage copper. The values are found in some in-there was a shortage of steel he thought stances on the showing last mentioned in it would be a month yet before it would very unlikely looking rock which has been be extended to the Winnipeg. Mr. Mcfound to assay fairly well. This is by no means a new experience in this camp. In onto and Montreal, and says he will be one of the levels of a large mine on Red absent for a month. mountain, some time ago, an official who workings, drew attention to some rock on the side of the drift, and asked the right they thought it was "Countries what they was "Countries what they thought it was "Countries what they was "Countries who w visitors what they thought it was. "Country rock, evidently," said they; "nothing in that, of course." A little further on in the drift the sides were examined again FICING WORKERS OFTEN ONE and it was plainly seen that mineralizawhat a tenderfoot would call "very pretty indeed." The visitors were anxious were naturally astonished when informed that the highly mineralized "pretty looking" rock would probably run about \$2, while the country rock-and it was real country rock, nothing else-ran from \$4 to \$60 to the ton. "Yes," said the official. "there is no doubt about the values. I was surprised myself and had the fac here chipped off and assayed repeatedly, until there could be no mistake. I know that we have about 12 feet along the side way from \$30 to \$60. I do not pretend to

> about the values.' always believed, that only the man with the blowpipe knows what is in the rock. Over and over again some of the finest looking rock imaginable has been found to contain very disappointing values, and frequently high values are obtained from very inferior looking rock. The mining engineers of the camp say that the only safe method to follow is to assay ever foot of the way.

A Contract let on the Ethel.

A contract was awarded to Mr. J. W busy Sanders to run the crosscut on the Ethel claim. The work has been carried on for some time by the day, and has proved very acouraging. The ledge has been traced workers frequently gives way. the ledge at the 68-foot level. They are connection with the Army, having been already 15 feet from the bottom of the stationed at such important points. as very hopeful that they have the making ectady, Troy and other points in

The Velvet and Portland.

Work is making excellent progress on distance of 410 feet. The raise from the from his own lips a statement of his 250foot level to the 160-foot level is finthe Velvet and Portland, was in the city pearance giving no indications of yesterday. He reports that the tunnel on cent sufferings. he Portland is in for a distance of 145 feet, and the shaft has reached a depth of 81 feet. Ore of a good quality has been wills reads like a miracle, and is given in met in the shaft of the Portlan.

Work Resumed on the Big Four.

Work has been resumed on the prop rty of the Big Four Consolidated com pany, which lies to the west of the city. Two shifts have been put to work. Tunne No. 2, which is in for a distance of 60
