A Popular Move.
 In adopting the suggestion in favor of standardization of potatoes, the Ontario Vegetable Growers' Association, at their annual convention, made a move that, as well as being in the direction of an ultimate benefit to the industry, should go to make the association popular with the home consumers of potatoes, which means almost the entire population of Canada. No other product is so widely used, nor so poorly prepared for market as is the potato crop, and growers may rest assured that a guarantee to the consumer that his purchases of this staple will be according to sample, will result in a much stronger market for potatoes. Since it must be admitted that the loss entailed in accepting potatoes of mixed quality has become very generally realized since food products of all kinds began to increase greatly in price with the outbreak of the war, and as consumers in general have learned the lessons of looking for the most possible in the way of actual food value for the money expended, potatoes will have to stand comparison in this regard, with whatever other food is capable of giving the desired results.

Shorthorns Took First.
 In the block test at the last fat stock show, held at Buenos Aires by the Rural Society of Argentina, animals of the Shorthorn breed were first and third in a class of 13, while second and third places were taken by an Angus cross and a pure-bred Angus respectively.

Canada's Credit.
 Canada's credit stands high. A reputation for sound financial methods during the war has been of inestimable benefit to the Dominion. Behind this stands also the realization of her immense natural resources and the fact that on the North American continent she is almost the sole remaining outlet for new settlement on a large scale. Within the new decade or two she will probably receive millions of the best class of immigrants, and these will make her per capita burdens light. The net public debt of Canada stands to-day at 1,500 million dollars. Seventy-five per cent. of it is due to Canadians. Weighed against her natural resources it is not heavy. It must also be taken into account that among her other assets Canada now owns and operates 14,000 miles of railway.

100 Cigars a Day.
 The Cuban workmen can turn out 100 cigars a day each, all identical in shape, size and weight, without using any mould or pattern.

ALTON'S
HARDWARE AND GARAGE

The Hoover lifts the rug from the floor, like this—flutters it upon a cushion of air, gently "beats" out its embedded grit, and so prolongs its life

Although your reception hall rug receives harsh traffic, it will brightly welcome callers for years longer if you clean it with The Hoover. The Hoover beats out the destructive street grit that becomes embedded. It sweeps straight the heel-crushed nap and picks up the stubborn, clinging litter. It suction up the color-dimming surface dirt. Only The Hoover does all of these essential things. And it is the largest selling electric cleaner in the world.
