Eden Bank, B. C., Association for May had the record for 241 cows of an average production of 917 lbs. milk, 3.7 test, 34.1 lbs. fat. In each of the twenty herds some individual cows gave over 1,000 lbs. milk, while the three best single yields were 1,630 lbs., testing 3.2, was from a lot of 20 cows yielding 1,284 lbs. milk, 3.4 test, 44 lbs. fat. Such animals must be a pleasure to handle, a source of pride and satisfaction, as well

as of good cash profit.

A good Ontario record for the same period is at the Central Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association where the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen to the contral Smith Association where the contral Smith Association was also seen the contral Smith Association where the contral Smith Association was also seen the contral Smith A toine, Que., for the same period, where 60 cows averaged only 654 lbs. milk, 3.3 test, 21.9 lbs. fat. The 60 cows gave a total yield of 39,244 lbs. milk, 1,317 bls. fat. If they had milked as well as the cows at Eden Bank, B. C., they would have given an additional weight of ac-tually sixteen thousand pounds of milk and over seven hundred pounds of but

ter fat during the one month! Are there not some more places where there are still some poor cows left? The poor cows are quickest detected by systematic weighing and testing.

C. F. W. Are there not some more pla

Ottawa, June 26, 1908. MODEL PLAYGROUNDS.

Chicago in the Lead, With One Park That is Almost Utopian.

The critics along the Atlantic coast are engaged in a strenuous rivalry in developing the idea of playgrounds for children and recreation centres for the pleasure and instruction of the masses of the people. The public school chil-dren are being enrolled in athletic leagues and the general public are contributing generously toward the equip-ment of school playgrounds and public parks, with gymnasium apparatus and paraphernalia for games and outdoor

Chicago has taken the lead amon-Western cities in pushing the play grounds propaganda; in fact, it is doubtful if any Eastern city equals Chicago in this respect, says the Kansas City Journal. Sherman Park playground is considered a model, the highest and latest development in the world of the multiple recreation, place for the respect public recreation place for the people. It combines the scenic beauty of a miniature park with fields large and small for gymnastic and athletic purposes
It also contains a series of build

solid construction and classically chaste design. Within these building are public assembly halls, small club rooms, gymnasiums, shower baths, restaurant, reading rooms, and everything that the minds of the builders could devise for physical, mental and social culture. Sociologists have pronounced Sherman Park and its playgrounds system to be "well nigh per ction, almost utopian."

This little earthly paradise was formerly as bleak and unattractive a spot as any that could be found in the ironbound tenement district of a large city It has been converted into an ideal resort for tired, careworn people at a cost of \$150.000. The big ball field—in the fall a football gridiorn—is flooded in winter and in a single night is converted into a skating pond. are separate playfields, besides, for senfor and junior boys, and another for women and children.

There is an immense swimming roof

in the open air; around it is a border of white sand. Before a bather enters this pool he passes under a shower both. Near by is another large pool for wo-men and children. In short, Sherman Park is thoroughly equipped for the pleasure and uplift of the people in win-ter as well as in summer.

MARRIAGE AMONG FLOWERS.

Some Are Known as Deceivers and Others Are Coy and Shy.

Plant and flower life, strange though it seems, have various marriage customs. The wild arum has been described by botanists as a deceiver and murderer and the tulip as a coy lover Flowers entice insects into their service, marry them as it were, and thus propagate their species.

A flower has a human way of first at-

A flower has a human way of first attracting insects. There is secreted somewhere in the flower a tiny or large store of honey, as the case may be, to which the midge, the butterfly, the bee, the bluebottle, and other insects are attracted. Insects bear the pollen powder from one flower to another, the introduction of the pollen making the fertilization of the seeds possible tilization of the seeds possible.

All plants and flowers are so arranged, says the New York Tribune, that, while the insects they attract are drinking the sweet nectar, the pollen is either being scattered over their bodies to ther being scattered over their bodies to be taken to another plant or flower or the pollen already scattered on the in-sect is being swept off by the stigmas of the seed boxes. Plants and flowers which are white in color and highly scented attract moths and night flying insects. insects.

Flowers close their petals on dull days and jealously guard the pollen from rain.

The pollen grains of the pine tree, which are spread by the wind, have small balloons attached to them.

The wild arum described as a mur-derer secretes a honey that makes in-sects drunk. Botanists describe it as a wicked plant, declaring that it commits murder in its love-making. Not content with this demoralization, it develops poisonous berries which the birds, having eaten, die and fall to the earth and decay. It is said that the decaying flesh of the birds forms the best possible fer-tilizer for the growth of the wild arum seed remaining undigested in the bird's body.

MENELIK'S HEIR. Youth Named to Sit on Throne of th

"King of Kings." The news from Addis Abeba that Mer elik has nominated an heir to the throne of "the King of Kings of Ethiopia, Con-quering Lion of the Tribe of Judah," is or interest not only from the personal point of view, but also from the political

tandpoint. For many long years the death of the Negus Negusti has been followed by a period of civil war and anarchy in Abyssinia, and since 1841 no sovereign of the old royal line has occupied the throne. Theodore, John and Menelik himself all won the throne by the sword. Unlike Theodore and John, Men elik, however, is of royal lineage. ancestors have been Kings of Shoa His 1,750 lbs. testing 3.5, and 1,780 lbs. milk in the 30 days. The best herd average Moslems at the close of the sevent enth century; moreover, he claims kinship with the cid Emperor, traditionally de-scended from the son of Solomon and

the Queen of Sheba.

Be that as it may, it is of much in portance to the European powers whose territories surround Abyssinia that a stable Government should se established period is at the Central Smith Association, where a herd of 20 cows averaged 1,096 milk, 3.2 test, 35 lbs. fat. The best cow in that herd gave 1,465 lbs. milk, testing 4.0, and the lowest yield in the same herd was 400 lbs. milk, testing 3.2.

A contrast to the above is at St. Antoine, Que., for the same period, where his power, and doubtless felt that the time had come when the unsertainty as to his successor should be rut at test. His only son has been dead several years, his nephew and supposed Leir, Ras (Prince) Makonnen, who represented the Emperor at the coronation of Edward VII., died in 1905. Menlik has now abosen as his successor his young now chosen as his successor his young grandson, Lig Eyassu or Yasu (that is, Jesus), the son of his younger daughter, a lad now about twelve years old. His father is Ras Michael, a powerful Prince and the Governor of the Provinces of Wollo, Borons and Aussa. Youths mature and the state of the provinces of the province of the Provinces of Wollo, Borons and Aussa. ture early in Abyssinia, and Lig (more properly Lij, a title equivalent to esquire) Yasu has apparently shown such qualities as justify his selection as the futbre ruler of the turbulent Abyssin-

Menelik has presumably been encouraged to take the step he has taken by the recent settlement of the international rivalries concerning his empire and the solemn undertaking given by Great Britain, Italy and France to re-spect the territorial integrity of Abys-sinia. Of the three native States in Africa which are independent, Morocco, Nadai and Abyssinia, the last named is the most powerful. Its people are Christians, even if rudimentary in their beliefs, and it should be a matter for satis faction as well as of interest to the tions of Europe to see it develop in the paths of civilization and peace.—Pall Mall Gazette.

Complex Origin of the Japs.

Complex Origin of the Japs.

The Japanese are not as mixed a race as the modern "Britons," but they have a very complex origin. It is certainly not correct to regard them as originally Chinamen, for, while they do possess Chinese blood, there is certainly a Korean strain in them, as well as one derived from the Maleyans and another from the Ainos or aboriginal inhabitants of the islands—the "savages" of Japanese historians. There has consequently been none of that disastrous "inbreeding" which is fatal to animals, nations or aristrocracles; and latterly there is evidence that the Jap is growing tailer. London Chronicle.

FACTS FOR SICK

No other medicine has been so successful in relieving the suffering of women or received so many genuine testimonials as has Lydia E. Pinkham's Vegetable Compound. In every community you will find women who have been restored to

health by Lydia E. Pinkham's Veg-etable Compound. Almost every one you meet has either been bene-fited by it, or has friends who have. In the Pinkham Laboratory at Lynn, Mass., any woman any day may see the files containing over one million one hundred thousand letters from women seeking health, and here are the letters in which they openly state over their own signatures that they were cured by Lydia E. Pinkham's Vegetable Compound.
Lydia E. Pinkham's Vegetable Compound has saved many women from surgical overstions.

from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made from roots and herbs, without drugs, and is wholesome and harmless.

The reason why Lydia E. Pinkham's Vegetable Compound is so successful is because it contains ingredients which act directly upon the feminine organism, restoring it to a healthy normal condition.

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

PILES CURED AT HOME BY **NEW ABSORPTION METHOD**

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this bome treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

Remarkable Natural Fortress. There is in the northern part of Mada-gascar the most remarkable natural fortress in the world. It is occupied by wild tribe who call themselves the Peo ple of the Rocks. The fortress is a precipitous rock, 1,000 feet high and eight square miles in area. Its sides are so steep that it cannot be climbed without artificial means. Within it is hollow and the only entrance is by a subter ranean passage.

Minard's Liniment Cures Colds, etc. Tit for Tat.

It is satisfying to the soul occasionally to return a favor in the same coin. In the following incident, told by Mr. Putnam in his "History of the Twentyfifth Massachusetts Regiment," such an exchange took place, the Yankee's "guessing" getting the better of the southerner's "reckoning."

Private Anderson was a tall Yankee

Private Anderson was a can recruit. On one occasion he was taken prisoner in a thick fog. It was his habit to carry a small hatchet in his belt, and one of the first things his captors said o him was: "Well, Yank, I reckon we'll take that hatchet."

"I suppose you will, Johnny," said Anderson, giving up his weapon.

As Anderson was being marched off in order to join the captors' company he noticed that they had completely lost

"Look here, Johnnies," he remarked, coolly. "I was over this ground this very morning; I know where we are and where you men are. I'll show you. Come on!" and he led off. The Confederates followed, and in less than two minutes Anderson had led them into the hands of the Federals.

They saw the joke, but did not enjoy it.
"Now, Johnny," said Anderson, "I
guess I'll take the hatchet." For sixteen years the name "Salada" has stood for the maximum of quality, purity and flavor in blended Ceylon Teas, so that the only thing you need to look out for is the "Salada" label on every package of tea you buy.

WAITING FOR A FORTUNE.

Mr. Blinkey Not Worrying Over It, Not Least Bit, but All Ready for It. Like many another men, Mr. Blinkey s always hoping that something will one chance in seven hundred and eight-een thousand million billion that he'll ever get a dollar that he doesn't work for and earn; and still he's always hop-ing and thinking that something might

And so when he gets to the office in And so when he gets to the office in the morning, he looks in the letter box there, not really with the expectation of finding a fortune, but nevertheless thinking that there might be something; not disappointed if there isn't, but wish-ing that he might find there a cheque for a million dollars from somebody or somewhere, or notice of some fortune that had been left to him that he was now to come and claim.

now to come and claim.

It's just the same when he goes home at night. He's been away all day, time enough for forty things to happen, for forty fortunes to come in, and he knows there hasn't any come, and still it is not an absolutely impossible thing, and so he's always kind o' hoping that he'll hear some good news when he goes

home.

He never does, he finds everything going along there placidly; there hasn't been any fortune sent in or brought in by Uncle Sam, and he knows they'd speak of it if there had been; but sometimes he says to Mrs. Blinkey jokingly:
"Anybody leave us two million dol-lars to-day?"

"No," says Mrs. Blinkley smilingly. "Half a million, maybe," says Mr.

Blinkey.
"No, nor half a million," says Mrs. B. "Perhaps it was a hundred thousand dollars? We could do with that." "No nor a hundred thousand." "Not a dollar?" says Mr. Blinkey

"No, not even a dollar," says Mrs. "Well, then," says Mr. Blinkey, "I guess I'll smoke my pipe," and he does this right cheerfully. But he's always hoping.

cured me of a very severe sprain of my leg, caused by a fall while building a bridge at Doherty Creek, Cumberland Co."

Lord Randolph at the Bank Door. Sir Edward Hamilton, who retired from the Treasury on Saturday, speak-ing of the Chancellors of the Exchequer under whom he has served, said that Lord Randolph Churchill "was often very nervous while at his treasury work —felt himself, I think, a little out of his depth. I remember his standing in front of the Bank of England's door and saying to me, I'm too nervous to go in.'
It took me quite a quarter of an hour
to get him in. He was going to see the
directors, and I think he was afraid of saying something which would reveal his ignorance."—London Chronicia.

PRICES UP AT BAYREUTH.

Once again theatre ticket speculators are driving hard bargains in Bayreuth festival tickets. At Bayreuth itself huge bills are posted announcing that all the twenty performances, from July 22nd to August 20th, are sold out.

Professional ticket dealers watch for this announcement to start on their

this announcement to start on their campaign. It is on record that they look for custom, and is on record that a \$5 seat for a "Parsifal" performance will sometimes sell for

350 or more.

The Festspiel management tries to stop the traffic, but although stricter control over the sale of tickets is exer-cised this year than before, it has avail-ed little. The tickets are bought up by private persons acting for dealers, and so it comes about that the German papers just now are full of advertisements offering seats at Bayreuth, while offi-cially they are announced to be unob-

A Dream.

I dreamed I went into the Zoo, And stole a Polar bear; But I couldn't do a thing with him, Or hide him anywhere.

So I sneaked him sofuly to my home, And then, before I knew, He grabbed me tight around the neck, And down the street we flew.

I screamed for help and loudly cried, But no one seemed to care The people didn't even stop To help me or to stare. I grabbed at things as on we fied In hopes of getting stopped— But everything I touched at all Fell over on my head.

At last, when I was almost dead, He stopped and with a shake He threw me down upon the ground, And then I was awake.

At first I didn't dare to think That I was still alive, And then into my pillow I made a happy dive.

And now I never seem to care, When I go to the Zoo, To see the Polar bears at all— Does that seem strange to you

Dr. Jackson, former Health Officer of New York City, says in his report to Governor Hughes, that house flies are the cause of five thousand deaths an nually in that city from typhoid fever and other intestinal diseases. Wilson's Fly Pads kill all the flies and the di

Bigger Ships in Suez Canal.

Notice has recently been given by the Suez Canal Commissioners that ve Suez Canal Commissioners that vessels drawing 28 feet of water are now permitted to pass through the canal. Hitherto the limited draught has been 27 feet; the minimum depth in the canal is now between 30 and 31 feet, as compared with 26 feet 3 inches, when the canal was first opened. The canal has been successively deepened from 1884 to the present time. In 1898 it was 28 feet and in 1902 29 feet 6 inches: work feet and in 1902 29 feet 6 inches; work is now in progress to obtain a minimum depth throughout of 34 feet 6 inches, depth throughout of 34 feet 0 mones, but it is not expected that this depth will be realized before the end of 1912. The progress may be summed up as follows: Prior to 1884 the maximum draught for ships permitted in the canal turn up. He's an intelligent man and he knows perfectly well that there isn't cone chance in seven hundred and eight-

You can painlessly remove any corn, either hard, soft or bleeding, by applying Putnam's Corn Extractor. I are going to be married."—Chicago Record-Herald. Minard's Liniment Cures Garget in Cows. IMPORTANCE OF THE SUN.

Our Knowledge of it the Key in Astronomical Study.

In an article on "The Nature of an Astronomer's Work," in the North American Review, William W. Campbell, Director of Lick Observatory, says: "If we would learn the nature of the stars, whether they are solid, liquid or gaseous, whether they are new or comparatively old, whether their temperatures are high or comparatively low, we should begin by making a study of our own star-our sun. It is the only star near enough to present a disk, and there-fore to let us study it in some detail. All other stars remain as points of light even when the powerful telescopes mag-nify them three-thousandfold. There are observatories established for the sole purpose of investigating the sun, and many astronomers are constantly emmany astronomers are constantly employed in studying the structure of all its visible portions, the laws followed by the heat and light radiated from all parts of its surface, and the conditions.

Henry Elliott, Esq., of Sherbrooke, N.
S., Inspector and Superintendent of It is not to much to say that our physical knowledge of the stars would to-day be almost a blank if we had been unable to approach them through the study. S., Inspector and Superintendents.

Black Watch the big black plug chewing tobacco. A tremendous favorite everywhere, because of its richness and pleasing

flavor.

A Woman's Revenge.

One of our young society women has a very goodlooking husband, of whom she is most proud. Having noticed that this gentleman was paying marked attention to a lady in her own set, she kept a careful watch, and was fortunate enough to discover among her husband's papers a quantity of letters written by the said lady. She then reflected as to what course she should pursue. She thought long, and at last hit upon a strange plan. From among the beforementioned correspondence the lady, according to "Aphrodite" in the Gentlewoman, selected four letters, pasted them on the back of her fan, and then accompanied her husband to a dinner. A Woman's Revenge. accompanied her husband to a dinner, where she knew she would meet her rival. It was not long before the fan at val. It was not long perore the lan averaged the attention of the guests, who asked to be allowed to look at it. The fan then passed from hand to hand, and when it reached the rival she turned crimson, and under the pretext of a sudden indisposition withdrew hastily.

The Funeral Came Too Lac-Billy Martin, aged 4, came to his mo and in great esctasy exclaimed: "Oh, mother! Louise found such a nice dead cat, and they are found such a nice dead car, and can I go?"

Permission was given, and when Billy Permission was given, and when Billy returned he was questioned as to the outcome of the funeral.

"They did not have it at all."
"And why not?" "Mother, was the answer, "the cat was too dead."—Success Magazine.

The Invaluable Cuckoo.

ger in the disappearance of the birds is coming to be more and more widely recognized. A writer in Suburban Life tells of the work of the cuckoo as an insect-destroyer. "To watch either the black-billed or the yellow-billed cuckoo flourish his long bill dexterously among the fruit trees or bushes affords much pleasure, as we know that he is doing his best to store away all the insects he can find, either in his own little stom. ach or those of his fledglings. Twelve or more caterpillars—big, fat ones—seem only a light lunch for him, and, when at last his appetite is appeased, he will kill the destructive insects, apparently for the fun of it, killing, tasting and indifferently throwing them ing and indifferently throwing them away without turning on his perch."

ISSUE NO. 31, 1908

NIGERIA FISHING TACKLE.

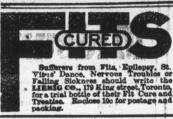

Natives of Nigeria are remarkably skiliful anglers, and their manner of catching fish recommends itself alike for simplicity and success.

The fisherman grasps a small street.

The fisherman graspe a small lin weighted at the other end with a small weighted at the other end with a smull stone, and at regular distances along the line he attaches a number of hooks made of animals' bones in the form of a narrow V, while to the angle of each V is fastened a short line made of sinews and baited with a kind of snail; the fish, swallowing the bait and line, swallows also the hook, which is so acted upon by the tension of the line as to expand its two prongs and fasten them firmly in the throat.

The victim structes and whirls about

The victim struggles and whirls about the line, thus attracting its family and neighbors to swallow the same snare.— London Standard.

Dining Late and Long.

In Sir Algernon West's early days society often dined late and long, and the late Lord Clauwilliam once told him of one occasion when he dined at a friend's villa near Putney and the meal did not begin until 8 o'clock.

When they at last rose from the table and went to their rooms, Lord Clauwilliam flung open his window and saw the

liam flung open his window and saw the haymakers coming into the field. "I wonder," he thought, "what hour they begin work," and on consulting his watch he found it was 8.30. The haymakers were returning to work from their breakfast.—Tit-Bits.
