Epileptic Follower of "Adam" Tells How He Met the "Fifth Angel" and Why He Followed Him.

Kansas City, Mo., May 26 .- Wm Enghenell, a member of the "Adam God" band of religious fanatics, was called to the witness stand for the defence in the criminal court trial this atternoon. The jurors manifested an interest in the boy of 20 years when he entered. The testimony of Enghnell was pitful at times. He is an epileptic and his demeanor and confusion at times showed that he was a blind follower of James Sharp, who asserted that he was the fifth angel, "Adam God," at the was a wind and the early part of May is the castern prospects of the carry to whom had come a revelation to go forth preaching in the streets and saving souls. As he testified several jurors were seen to shake their heads, indicating that they were sure of the witness' weakness of mental-ity and that they were sure of the witness' weakness of mental-ity and that they were sure of the witness' weakness of mental-ity and that they were doubtly to communicate with the hadrence and the probability of Mars being in that they were sure of that the American gunboa Nashville store at least a score of years, it being placed at from ne to two weeks later that the American gunboa Nashville store at least as soore of years, it being placed at from one to two weeks later that the American gunboa Nashville store at least as soore of years, it being placed at from one to two weeks later that the American gunboa Nashville store at least as soore of years, it being placed at from one to two weeks later that the American gunboa Nashville store at least as from that the American gunboa Nashville store of years, it being placed at from one to two weeks later that the American gunboa Nashville also good of the waters on these was a blind follower. WANTS TO TALK TO MARS. Camille Flammarion Thinks That

May be Accomplished Some Day. Paris, May 25-M. Camille Flan narion, the astronomer, in an inter-dew regarding the plan of Professor Pickering, of Harvard, to signal to Mars, said that it was quite within e bounds of possibility that in some uture era the earth might succeed in lishing communication

"The light thus reflected," he says. "would easily be discernible by the aid of telescopes by the Martians. We should begin a series of flashes, cutting off the sun's rays for an instant, and then throwing them on the mirror again, repeating this at irregular intervals according to the telegraph code of dots and dashes. This ought at once to attract the attention of the Martians, who will give answering ignals. Once such a signal is received it will be a comparatively easy matter to establish a code and trans-Prof. Piekering is ready to furnish
