Reid-Newfoundland Co., Ltd, Water Street Stores Dept.

FOR SALE AT A BARGAIN.

1 12-H.P. SEAL ENGINE, in first class condition.

Here are a few of its important points: No water pump is
necessary, the circulation around the jacket causes a natural flow
of water. The crankshaft is enclosed in a case which carries the
lubricators to the bearings. The crank dome cover can be removed
with half the bearings for inspection of piston and connecting
rod, without dismantling the engine. The valve gear can be re-
moved independently of cylinder, the head of which is below
the water line. The water circulation is automatic. Each down
stroke gives an oil drip on the connecting rod, thus supplying
free lubrication. The fuel is controlled by an automatic inlet
valve; once set by the regulator it requires no further attention.
After five minutes running of the engine the automatic timed
ignition takes up the firing, being operated by a bulb, which be-
comes red hot and ignites the mixture at the correct moment by
the plunger which admits fresh mixture to the bulb. It is of
the four-stroke type and runs 300 revolutions a minute.
