Rummer's Release "Aggrieves" U.S.

Federal Authorities Appeal Boston Court Decision-Interesting Angle. Boston, March 9 .-- (Star Special.)-United States. Attorney Harold P. Williams, by Assistant United States Attorney Laurence Curtis 2d., has filed in the Federal Court here an appeal in the Supreme Court from Judge Morton's recent decision dismissing the Government's libels against the British rum ship Marjore E. Bachman, and her cargo. Attorneys William H. Lewis and Matthew L. McGrath, represent the vessel's owners. The petition for appeal says the United States feels "aggrieved" by Judge Morton's degree. The Bachman was seized more than 20 miles at sea last October, under a pre-arranged plan, by the revenue cutter Tampa, after a sea-sled, capable of 40 knots speed, had made a trip to the vessel and purchased liquor for purposes of entrapment under the provisions of the British treaty, in which the speed of the purchasing vessels is, the controlling factor under which seizures of rumrunners may be made. Judge Morton found that the sea-

sled expedition was not within the intent of the treaty makers, and he ruled that the expedition was in intent and accomplishment an entrapnent. The vessel was illegally seized. he ruled. He criticized the treatment of the Bachman's captive crew as outrageous and declared that members of the crew of the Tampa misconducted themselves while on board the Bachman as a prize crew The Bachman and her cargo are held in Federal custody at the Army base, where they have been kept since October. Attorneys Lewis and McGrath have made claim upon the Government for \$25.000 for demurrage, compensation for articles alleged to have been stolen, 250 cases of champagne and liquors alleged to have been stolen, and other items. The demurrage claim will increase at the rate of \$200 daily as long as the boat is held. If the Government finally loses its case, the defense bill will be a huge one it is predicted by the vessel's counsel.

white oak logs are dug up. Seven or eight thousand years ago a terrible storm flattened out a whole forest, and in course of centuries the timber was buried but preserved by some chemical agent in the soil. While the outer layers are decayed, the timber is very hard and of an exquisite colour. It is worked up into hair-brush backs and ornaments which fetch very high prices.
