## THE HEALTH STANDARD AND FOODS

Among the regulations in Montreal to ensure cleanliness in the handling of foods and to prevent the distribution of diseased meat, is one which directs that all butchers' meat shall bear a place her. stamp showing that it had been officially inspected.

The suggestion called forth a strong protest from the vendors, why, it is difficult to understand, but such objections car- and is by a chirugeon named Fishbein, ried little weight with the authorities, owing to the growing cize severely such things as osteoclamour of the public in that city for a clean and hygenic sys- pathy, homeopathy, chiropractic and the physickal culturists, such as tem of food distribution. MacFadden, Strongfort, Liederman

As the result of repeated demands on the part of the Teleand divers others. He do declare them gram, a Veterinary Inspector of cattle was appointed here, and all as false doctrines, and denounces although it took the authorities considerable time to vest him them in the strongest terms. Povey with full authority, that, too, was accomplished by dint of fur- sends me this day a little verse which ther pressure. During recent months, we understand, tests have be asks me to print in my journal, to

been applied to several herds of cattle by the Inspector, and wit:where the animals have been found infected with tuberculosis "They used to sing some time ago, A rather plaintive song; they have been destroyed. It is not without significance that Man wants but little here below diseased animals were found in herds of what were supposed to Nor wants that little long.' be prime cattle, accustomed to the best of treatment, and fur- But nowadays the song is sett, With musick to the rhyme: ther, that the perceptage of infected animals was high.

It may be mentioned that the tests were made in the pres-And wants it all the time.' ence of the Public Health Officer, and that the findings were afterwards fully confirmed by a post mortem examination which day which gives me great hope of the he held.

It is useless hiding the fact that the results disclose a serido take much pleasure from the exous state of affairs, for if the disease is so prevalent among ercise, and acquire an appetite to our cattle housed and fed in the best manner possible, it must be lately had. This afternoon, with the concluded that under less favourable conditions matters are even Povey's to the country and do pick worse. It is imperative, therefore, that steps should be taken berries and otherwise amuse ourwithout delay to have all the cattle in the Island examined, even selves, being indeed, a pleasant thing if it necessitates appointing temporarily additional qualified in- to have a day in the open, and do give added zest to our meals. Home late spectors to conduct the work. and to read a while in a witty tale by

Nor should the tests be restricted to local cattle. Permis-R. Macaulay, called "Orphan Island," sion to dispose of imported animals before they have been proved and she indeed, a clever satirist, by examination to be free of disease, should be refused, for if whose works please me mightily. Canadian cities find a rigid inspection of the meat necessary, it is equally important for us to exercise the same care with rerard to meat and cattle coming from the Dominion. So far the

thief reason given for holding nothing more than a cursory exmination of imported cattle has been that there are no facilities FUNERAL OF MRS. FLORA JEANS. for holding them in detention while the tests are being carried out, but that is not an insuperable obstacle, and it is for the uthorities and the importers to decide how best these arrangetients can be made.

It is said that there would be considerable opposition in cerain quarters to the adoption of such rigorous measures as we Godfrey. The deceased lady was the August he fished at Old Bay, near suggest, but we question it. The public spirit shown by those widow of the late Mr. John Jeans and Miller's Passage, and not far from farmers who have already availed of the services of the Inspector is sufficient evidence of the importance which they attach in their own interest, but out of consideration for their custo- stricken with a severe illness and it hours the following morning. He publishing. mers, and with such a backing we have no fear whatever of its was feared that recovery was impos- landed with his rod sixty trout and ultimate success.

Further, in view of the conditions so far revealed, and in though unable to leave her room, Born w of the fact that everywhere to-day it is realized that the in Catalina nearly standard of public health depends mainly upon the quality and a daughter of the well-known Courcondition of the food supplies, is it not time to insist that the age family, she and her husband had nearly reached the diamond celebraregulations shall be enforced regardless of such objections? tion of their marriage when the tragic It is impossible to close our eyes to the fact that tuberculparting occurred. Both had lived usecsis is a scourge in this country, and it must also be admitted ful and active lives and were held in that the efforts to combat it have so far in a great measure high esteem by a large circle of failed to reduce the toll which it takes of the population in friends. Other members of the family human lives. Money has been spent freely in fighting the dread surviving, beside their son, are two disease, and since the results are so discouraging, it would be and Mrs. H. P.
