# My Sudden

A Romance of Storm and Flood and Happy Accident.

When I awoke a little light was stealing into my room through the blinds of my shutters. I quickly slipped out of bed, opened a window, and looked out. Day was just breaking, the rain and wind had ceased, and i could discern objects, but it semed as if I needed some light in my brain to enable me to comprehend what I saw.

What could anybody do in a case like this? I turned and went into the house. I entered the various rooms on the lower floor, and saw no signs of any particular damage except that everything movable in each room was jumbled together against the front wall; but when I looked out of the back door, I found that the porch there was a good deal wrecked, which leads to the lower floor, and saw no signs of any particular damage except that everything movable in each room the lower floor, and saw no signs of any particular damage except that everything movable in each room the lower floor, and saw no signs of any particular damage except that everything movable in each room the lower floor, and saw no signs of any particular damage except that everything movable in each room was jumbled together against the front wall; but when I looked out of the back door, I found that the porch there was a good deal wrecked, which I had not noticed before. enable me to comprehend what I saw. I had not noticed before.

May eyes fell upon nothing familiar. I went upstairs and found every-My eyes fell upon nothing familiar. I did not stop to investigate, how-tever, from my window. I found my clothes huddled together with the except the chimney and the porches. furniture at the front end of the room, I thanked my stars that I had used and as soon as I was dressed I went hard wood instead of mortar for the staring in blank amazement at the house which presented itself at my front door, the face at the window disappeared, and I was left to condisappeared, and I was left to condisappeared, and I was left to condisappeared. disappeared, and I was left to con-template the scene by myself. I ran to my back door and threw it open. what is it doing here?" There I saw stretching up the fields, its onward career by stopping up me have it out with her mother with-against another house. As I looked out interference. As briefly and as off the back porch, I saw that the clearly as I could I explained what ground still continued to slope, so that had happened. if my house had not found in its path building, it probably would screamed.

when I reached it I found a young could happen, but all this is woman standing on the porch of the house before me. I was about to say your house did get there, and I don't want to understand. All I want is finger on her lips and for you to take it away." stepped forward.

that must have been a hurricane we her porch. There she suddenly gave had last night, for the wind was a scream which brought her daughter

was awakened by something cracking after them.
In the yard. I went to a window and As we hu watched it, and watched it, until

"You are right there," said I earnestly. "It would have been impossible for me to imagine such a thing." At first I thought there was nobody in the house," said she; "but when I heard someone moving about I came down to tell whoever had arrived not to make a noise. I see," she added, with another of her smiles, "that you think I am a very strange person not to be more flurried by what has happened, but really I cannot think of mother will say and do when sh comes down and finds you and your house here at the back door. I am very sure she will not like it."
"Like it" I exclaimed. "Who on

earth could like it?' lease speak more gently," she said. "Mother is always a little irritable when her night's rest has been broken.

wakened up suddenly now; but really, Mr. Warren, I haven't the least idea in the world how she will take this thing. I must go in and be with her when she wakes, so that I can explain just what has happened."
"One moment," I said. "You know.

my name?"
"Of course I know your name," she nswered. "Could that house be up here on the hillside for more than a year without my knowing who lived in it?" Then she went indoors. I could not help smiling when I thought of the young lady, regretting that there was no man in the house who might help me do something What could anybody do in a case like

door. I quickly jerked this open and twas about to go into my bedroom when I heard a woman scream, and, denly I stopped. I was positive that of course, I hurried to the front. There I was about to go into my bedroom olic education in Manitoba, and for which has possession of this powder or ony front porch had been destroyed, on the back porch of her house stood a few words to the warning contained but there I saw a porch, a little lower Mrs. Carson. She was a woman of the decisions of the Privy Council on the other side of it, not more than I saw where her daughter got her good right feet from me, was a window—looks; but the placifity and cheerful-the window of a house, and on the ness of the younger face was entirely other side of the window was a face— wanting in the mother. Her eyes stood, and it is important, in the invention would certainly have the face of a young girl! As I stood sparkled, her cheeks were red, her terests of the Catholic cause, that an ordinary share of bravery.

I did not immediately answer I and far up the hillside, the wide path which my house had made as it came hind her I saw, through the open door, down from its elevated position to the the daughter crossing the hallway; it valley beneath, where it had ended was plain that she had decided to let-

"What is all that to me?" she creamed. "It doesn't matter to me have proceeded somewhat further on how your house got there. There have the course. It was lighter, and I saw been storms ever since the beginning oushes and fences and little outbuild- of the world, and I never heard of any of them taking a house into a person's Almost breathless with consternation, I ran again to the front door; when I reached it I found a young could happen; but all this is nothing

Please don't speak loudly," she said. as I can. You may be very sure I "I am afraid it will frighten mother; will do that; but—" she is asleep yet. I suppose you and "Can you do it now?" she asked. she is asleep yet. I suppose you and "Can you do it today? I don't want a minute lost. I have not been out-"That is what has happened," said side to see what damage has been but I cannot understand it; it done, but the first thing to do is to That is what has nappened, so I, "but I cannot understand it; it seems to me the most amazing thing take your house away."

"I am going to the town now, "and the summon assistance."

madam, to summon assistance." Mrs. Carson made no answer, but hurricanes do blow away houses, and she turned and walked to the end of strong enough to loosen any house, I from the house, "Kitty! Kitty!" cried

I could not talk to a girl like this; eyes flashed brighter and her mouth question which was thus left unan-

is house belong?" at least, to whom does is house belong?" said knowing what she was talking about. "Little Samuel!" again screamed Mrs. would give some real practical effect to the construction which has been to the construct "This is my mother's house," said she. "My mother is Mrs. Carson. We happen just now to be living by ourselves, so I cannot call on any man to help you do anything. My brother has always lived with us, but last week he went away."

"You don't seem to be a bit astonished at what has happened," said I. She was rather a pretty girl, of a cheerful disposition, I should say, for several times she had smiled as she spoke.

"Little Samuel!" again screamed Mrs. Carson, who has been about wildly, endeavoring to get off her porch, but my house had demolished her steps and it blocked up the opening.

"The side door, mother!" said Miss Kitty; and then, as the older woman is appeared into the house with a stifled exclamation, her daughter said to me: "It is my little brother she is thinking about. He died some years ago and was buried in a small grave-yard back of our garden. She thinks "Oh, I am astonished," she answered; "or at least I was, but I have had time enough to get over some of it. It was at least an hour ago when I was at least an hour ago when I over the railings of the porch and ran after them.

As we hurried along by my house looked out, and could just barely see that something like a big building seemed to be unevenly divided into had grown up during the night. Then two parts, scream after scream came from Mrs. Carson, as she noticed the I made out it was a whole house, and absence of sheds, fences or vegetable after that it was not long before I beds, which had found themselves in ed a smpler thing to me, you know, than it did to you, because I had often thought about it, and probably you never had.'

the course of my all-destroying dwelling. Once she turned her head toward me, her face pallid. "If you have scratched up little Samuel!" she breath enough to finish the sentence and continued onward with clenched

(To be Continued) RHEUMATISM CURED.

Eighteen Months Trying to Get Cured-Had the Best Doctors - He Found What He Wanted in Dodd's Kidney

Goderich, March 7 .- A case of great interest here just now is that of Mr. Alexander J. Sharkey, who for some and the time has been an extreme sufferer from Rheumatism. His statement to LEX. the correspondent is as follows:
"For eighteen months I was a victim of Rheumatism, and during the hole of that time was trying every means to oure it. I had the best docors in Canada, and took their prescriptions with faith and patience.
"I got tired at last, for I found the ment nearly as killing as

"But one friend wiser than the othbe cured by way of the kidneys, and recommended Dodd's Kidney Pills.
"I have used two boxes of these pills to effect a perfect cure and I don't care who knows it."

While plowing in a field which had last year, a negro farmer of Hogansville, Ga., uncovered a jar, buried be-neath two big stones and an iron plate, containing \$16,000 in gold. Apparently the money had been stolen. The burial ace was marked by a circle of small

Ans.—Ies; the local dramage assess-ment, until paid, is an encumbrance, and B therefore is entitled to retain the amount necessary to pay it off out of the purchase money.

#### The Next War

Has Ever Seen.

A New Smokeless Powder Invented

Field Gun Without Recoil Devised by a French Artilleryman.

The next war is going to be the most appalling catastrophe the world has ever said to me the other day that he believed adviser of Cardinal Vaughan, cipitated by a king or an emperor, but by an inventor. Then tension of international hatred is so great in Europe, he says, that if an inventor in any one

ountry produces some appallingly deadly xplosive, or constructs a gun so destructive that no armor at present known to mankind can stand against it, the nation weapon will declare war against its enemy, and conquer the other country before the world in general becomes aware of the new equipment. There is a possible danger that this

theory may be true, but the country that would stake its existence on a new in-France went jubilantly to war with

Germany largely on the strength of its Catholic minority of Manitoba. There new gun, the Mitrailleuse, which was can be no doubt that the legal effect heralded as a weapon so destructive that no modern army could live in front of it. It certainly proved to be a death-dealing instrument, and the frightful mortality in the German army paid a ghastly tribute to its qualities; nevertheless it was not capable of stemming the flood of invasion that poured over the land.

Nothing can exceed the jealousy with which European nations are now watching their own men, so that no hint of any invention may get abroad. France is sending officer after officer into prison or exile, after secretly conducted trials, where no reporters are present, these star chamber courts holding that the officers have betrayed government secrets to other nations. In Germany practically the same state of things exist. But in spite of all precaution it is amazing how quickly a secret becomes public property.

One would think that if any country could keep a secret, Russia would be that country; but there is its new smokeless powder, invented by Prof. Mendelryeff. The whole world knows its composition and there is therefore no reason why I should withhold the formula from these columns; it is simply C30, H38 (NOz)12, 025. At a trial the other day from an eight-inch gun this explosive drove a hardened steel projectile clear through a cannot be compelled to grant any re- Harveyized steel Krupp armor plate, and the velocity when the shot struck the

> ELEVATION SHOWING BUCHOR IN GROUND (SECTION OF) REGOIL SHAMBER

plate was 2,850 feet-seconds, whatever they may mean. France has a new gun to fit this new powder, and, curiously enough. France and Russia are allies. An enlightened republic with the motto "Liberty, Equal-

ity and Fraternity' is thus linked with a despotism under which no man's life is safe, and where no man not belonging to the ruling classes has a word to say in the conduct of the government. It is a somewhat disquieting thing for the rest of Europe to know that these two countries between them possess the best

field gun in existence and the best ex-I am not an expert in military matters, but I believe it to be the case that the trouble with a light field gun is this: When such a gun is fired, the recoil causes the muzzle to jump upwards, the wheels to run back, so that the gun must be reaimed before it can again be

fired. This reaiming takes time, and, in a battle, time is everything. Monsieur Canet, the manager of the artillery works of France, which are situated on the Mediterranean, has by a very simple device neutralized the effects of the recoil, so that his gun, once it is accurately aimed, may be fired as quickly as it can be reloaded. The trail of the gun carriage consists of two steel tubes, one of which slides within the other. The end of one tube carries the gun cradle, while the other, the end of which trails on the ground, is attached to a spade which can be thrust deeply into the earth to hold the gun steady. When the gun is fired the carriage wheels roll back a few inches, the end of the inner sliding tube compressing the air in the recoil chamber, while the compressed air, acting

and gun carriage forward again into their former position. During a recent trial of this gun when ten shots were fired in rapid succession, without reaiming, each shot struck the swearing to his roll, knowing that he target, and there was an entire absence

like a strong spring, shoves the wheels

of nearly three inches, and with the ordinary French powder it has thrown a shot more than four miles, so that what these guns will do if loaded with the new Russian powder, the Lord only knows. Germany has no gun or powder that is particularly new, but she will doubtfour years yet. Can B legally charge A for this four years' tax, which is not yet due? A did not, or cause the said drain or debt to be put against A recent cartoon in one of the comic formula to the said drain or debt to be put against the cartoon in one of the comic formula papers (doubtless the editor is in German papers (doubtless the editor is in sented the nearly exhausted taxpaver of

Germany pulling up a hill a hand cart

loaded with the armaments of war. The

unfortunate human beast of burden is already about to drop in his tracks. but

proven practicable, as, for instance, the Maxim gun, relying almost entirely on is doomed; in fact, the landing of Caesar, once a landing is made.

Thus at the end of the nineteenth century stand the countries of Europe, armed to the teeth like so many brigands. each jealously watching for a truculent move on the part of the other. An indiscreet sentence from a voluble emperor heated with wine; a boil on the neck of the czar, may at any moment set the continent aflame. And each country supports a state church, endowing with equal liberality an army and a religion. Each potentate and despot is certain that God is his partner. Russia, on its lips the sacred name of Christ who preached peace on earth and good will towards men, has just started a crusade against the followers of Tolstoi, imprisoning them, banishing them, transporting them to Siberia, and confiscating their goods. The crime of Tolstoi is that he wishes people to live as Christ lived; preaching the doctrine of non-resistance. doctrine," says one of the rulers of Russia. "is against the law and order of any state. If we allow it to spread, how are we to recruit our army?"-Luke Sharp.

#### His One Great Trouble

An old, bedridden fisherman at a fashionable watering-place, was frequently visited during his last illness by a kindthose close-fitting clerical vests which The clergyman saw the near approach

of death one day in the old man's face. "Oo ay, I'm a' richt,," came the feeble

reply. "You are sure there is nothing troubling you? Do not be afraid to tell me." The old man seemed to hesitate, and at length, with a faint return of anima-

tion said: "Weel, there's just ane thing that troubles me, but I dinna like to comfort you," replied the clergyman.
"Tell me what it is that troubles and

perplexes you. Weel, sir, it's just like this," said the old man, eagerly. "I canna for the life o' me mak oot hoe ye manage tae get intee that westcoat.'

When you are weak, tired and life less, you need to enrich and purify your blood with Hood's Sarsaparilla.

he jaunty German emperor, with a new Canet gun in his hands, says:—
"Stop a bit; I want to add this to the

Last summer while in Germany I stopped at the ancient town of Traves, and in the hotel where I put up there was a large picture that is extremely popular in Germany, showing the old Emperor William with his son by his side, and Von Moltke and Bismarck nearby, standing all on a height watch ing a battle going on in the valley below. As I looked at this picture a German officer, with whom I acquainted, said:-

"There will be none of that in the next war.'

"None of what?" I asked. "No standing on heights and watching battles. Smokeless powder and longreaching guns have made that sort of thing impossible. Hereafter everyone in sight will be killed.'

'Then what of the army?' I asked. "Well, most of the soldiers will be killed also. The fact is that future battles will be go-as-you-please affairs. battles will be planned out as well as possible beforehand, but when actual en gagement takes place the officers will have to dismount and trust largely to luck. Anyone in a conspicuous position will be doomed. The fate of the day will depend on the ingenuity and expertness of captains of small divisions, probably not more than a hundred men in each. Every officer will have to do the best he can with the soldiers immediately under him, doing what seems to him the most effective on the spur of the moment. The slaughter will be something so appalling that the civilized world will stand aghast.'

It seems, then, there is coming a complete revolution in military tactics, and that experience of the past will be no guide to the commander of the future. Germany is at the present moment tak- | ing several important stocks. ing the lead in preparing for this and is now training her small officers, lieuten ants, captains and the like, who com mand merely a hundred or two hundred men, to work these small bodies to the best advantage in a battle. In the battle of the future it will be catch-as-catch-can, hit wherever you see a head of the enemy, with no orders from headquarters. In case of a scrimmage I should be inclined to bet my money on the German army, for I think it is the greatest fighting machine there is at present in existence, and I believe Germany will be able to hold her own even if attacked by the combined forces of Russia and France. Italy is already bankrupted by her tremendous expenditure on army and

navy, and her attempt to keep pace with the others of the triple alliance. is a pauper and counts for nothing in European affairs; Austria, not quite as bad, but nearly so. Everywhere in Europe taxes are impoverishingly excessive.

England tries to keep out of the turmoil, and does not go in, to any extent, for new powders or guns, having a conservative distrust for much blazoned in ventions, but freezing on to what is

-THE NEW GANET FIELD GUN

We have been building bicycles for her navy, which she is enormously in- years; we believe our product, the Stearns, creasing. ### A LABORING MAN'S LEG.

A RUNNING SORE RENDERED IT USE-LESS. HE COULDN'T WORK TILL HE HAD IT CURED BY KOOT-ENAY WHICH CONTAINS THE NEW INGRE-DIENT.

Sold by Druggists Everywhere. It goes without saying that the average working man finds it difficult to ply hi daily avocation without the aid of a pa of good sound legs. To have either of his lower extremities incapacitated by disease is a serious matter. It means inability to provide for himself and those depending on him for support, to which is added the distress and suffering both mental and physical he is called upon in consequence

Mr. John Dawson, a respectable laborer visited during his last illness by a kind-hearted clergyman, who wore one of states under oath that about seven years ago an inflammation appeared upon his knee, which continued to grow worse until about three years ago when it got so bad he was unable to work. He tried ointments and asked if his mind was perfectly at and various remedies, but the sore continued discharging and the pains in his back were very severe. Last winter he commenced taking Ryckman's Kootenay Cure and in a comparatively short time the sore healed up, the pain disappeared from his back and he was able to resume his work. He thinks there's nothing can beat

Kootenay, and he's right.

The whole secret of the cure lies in the thorough blood cleansing properties of the "new Ingredient,' which is the essential element of Kootenay.

It goes right through the system and eradicates all humors from the blood and consequence there is a rapid replacing of diseased or decaying tissue by a healthy healing process. Don't be cajoled into taking any substitute for Ryckman's Kootenay Cure. If your druggist does not keep it, send \$1.50 for a bottle to the Ryckman Medicine Co., Hamilton, Ont.

Chart book sent free to any address. One bottle lasts over a month
