> Iris by degrees learnt the sad chronicles of the Jackson family. She was moved to tears. She remembered the doctor's hesitancy, and her own idle phrase-"a huge coffin." Outside the roaring waves pounded

upon the iron walls Were they not satiated? This tragedy had taken all the grandeur out we are going on the starooard tack sacrifice. And that poor woman, with cayed tooth. her two children, hopelessly scanning the shipping lists for news of the

great steamer, news which, to her, meant only the safety of her husband Oh, it was pitiful! Iris would not be undressed. The maid sniveled a request to be allowed to remain with her mistress. She would lie on a couch until morning.

Two staterooms had been converted into one to provide Miss Deane with felt sure it must topple over. She was a start on the House of Lords. not afraid; but subdued, rather as-

Things were ridiculous. What need was there for all this external fury? teen prominent financiers who came Why should poor sailors be cast forth to instant death in such awful manner? If she could only sleep and forget-if kind oblivion would blot out the storm for a few blissful hours! But how could one sleep with the consciousness of that watery giant thundering his summons upon the iron plates a few inches away? Then came the blurred picture of

peering into the moving blackness. How strange that there should be hidden in the convolutions of a man's brain an intelligence that laid bare the pretenses of that ravenous demon without. Each of the ship's officers, the commander more than the others, understood the why and the wherefore of this blustering combination of wind and sea. Iris knew the language of poker. Nature was putting up a huge bluff.

What was it the captain said in his little lecture? "When a ship meets a cyclone north of the equator on a westerly course she nearly always has the wind at first on the port side, but, owing to the revolution of the gale, when she passes its centre the wind is on the starboard side."

Yes, that was right, as far as the first part was concerned. Evidently they had not yet passed the central path. Oh, dear! She was so tired. It demanded a physical effort to constantly shove away an unseen force that tried to push you over. How funny that a big cloud should travel

After the course was changed and the Sirdar bore away towards the For one tremulous moment the en- southwest, the commander consulted dense clouds which enhanced the mel-

wave gushed out of the vortex with

cial grace of artificially, pointed teeth. Savages Have Good Teeth.

The primitive savages ought to have good teeth is one of the general beliefs of modern dentistry. Examination already made of the teeth in prehistoric skulls-something like 3,000 prehistoric crania, we understand, have been called in as witnesses-has already furnished a text for much discussion of teeth vs. civilization in which uncivilized man has the best of the argument until we realize his sad disadvantage on the rare occasions

Judging by inference prehistoric children must have had better teeth than their elders. But the statistics gathered by Dr. Ottofy indicate a greater degree of perfection than even this inference would have seemed to warrant. Out of 113 Igorot youngsters 77 had perfect teeth and only seven

An Overworked Telephone Means Loss of Business

MR. BUSINESS MAN

You Can't make One Delivery Wagon do the Work of Two

Adequate Telephone Service Demands More Lines When One Line is Overloaded

Satisfactory telephone service cannot be expected if you have more business than your present telephone facilities will handle. You may not have thought of it, many customers do

not, but a telephone line has its limitations. When trade outgrows the capacity of one delivery wagon, a retail merchant puts on a second. A jobber puts on two trucks when one is incapable of delivering his sales. A

railroad expands to two or more tracks as the volume of traffic increases. The same rule governs the use of the telephone. If you have but one line and keep it

busy with outgoing calls, no one can call you. Nor can every one talk to you who may want to do so if there are more calls for you than one line will serve. A recent actual experience will, perhaps, best illustrate the proposition :- A prominent business man, (No. 1), called up a business house and the man, (No. 2), to whom he wished to speak was out. Word was left asking that No. 2 call up No. 1 as soon as he (No. 2) came in. No. 2 made faithful effort to do this, calling for No. 1 five different times, and each time the line was "busy." When No. 1 was told later of this vain effort to reach him on a matter of importance to himself, he exclaimed, "We have a telephone. Why can't we be called?" It took a representative of the telephone company some time to convince him that the trouble

now two lines give him adequate service. If it is important for your customers to reach you by telephone, it is important for you to supply the necessary facilities.

was due to an overload of business on his one line. He was finally convinced, however, and
