Canada's Greatest Piano

The advantages which attract you at first to this instrument will increase a hundred-fold in the days and years to come, while the owners of poor instruments are being disillusioned. How fine a thing it is to know, after having purchased a piano, that no matter how far you might have sought among good pianos you could not have improved upon the choice you made.

THE NEW Gerhard Heintzman Metal Player-Piano

It contains the most ingenious method of incasing the delicate valves in a seamless, non-corrosive, interchangeable metal shell or cartridge.

The wind chests, tracker tubes and tempo box are seamless brass; the valve boxes are seamless metal castings. The New Gerhard Heintzman metal Player-Piano is simplicity itself (anyone can play it). It is dust-proof, leak-proof, non-corrosive, will withstand any climate or

change of temperature, and is practically no larger than an ordinary upright piano. The many exclusive features are patented or patents pending.

The New Gerhard Heintzman Metal Player-Piano is the great realization of an ideal after years of study; let us demonstrate it to you; you, like others, will be immediately convinced that the last word in Player-Piano mechanism is contained in the Gerhard Heintzman, Canada's Greatest Piano.
