

Looking Over Western Ontario

"One of the wealthiest and most populous agricultural and industrial parts of the province."

BADE PROUD OF BECK AS NATIVE

Foundry Where He Learned His Trade Still Stands There.

BIRTHPLACE IS NEAR BY

Hydro Chairman Often Returns To His Early Home.

BADEN, Oct. 28.—If the village of Baden could lay claim to nothing else in its history than the fact that it is the birthplace of Sir Adam Beck, and the village in which the hydro knight spent his boyhood days, it would have a sufficient claim to a prominent place in the history of Ontario. To have contributed to Ontario and to Canada a man of such caliber and genius as Sir Adam is an enviable distinction for a community and judging from the sentiment expressed by many of Baden's citizens, there is no doubt but that the village is proud of the man who has made Ontario the hydro electrical wonder of the world.

HISTORIC FOUNDRY

About two blocks off the main road is the old Beck foundry, now a historic structure, in which Sir Adam Beck served his apprenticeship and from which he graduated in his early youth as an expert in all the various operations associated with foundry work. Son of the sturdy pioneer, Jacob Beck, who is accredited founder of the village of Baden, the youthful Adam attacked the problems which he found before him in the foundry with the same vigor and intelligence with which in later years he tackled distribution throughout the province.

It is almost half a century ago that Jacob Beck set his son to work in the now historic foundry at Baden. There is one man who is still connected with the foundry who recalls those early days in the career of Ontario's hydro knight and that is Joseph Hofele, who daily piles his trade in the dingy place of iron and moulds where Sir Adam Beck first put away the things of childhood, and at the behest of his father, took up the practical things which doubtless turned his talent into channels which eventually made him the key man in Ontario's hydro success.

One of the first questions that was put to the veteran mechanic was: "Do you remember Sir Adam Beck?" "Do I remember him?" was the reply. "Well, I can tell you it was in this very room that I had the privilege of teaching young Beck the blacksmith trade." That was nearly 50 years ago, when Sir Adam's father owned and operated the foundry. In those days we made stoves and other foundry products. Sir Adam was about 14 years of age then and his father wished him to learn the business from the start. There was one thing about young Beck in these days which marked him for the future career in which he distinguished himself. There was nothing that he was afraid to tackle. Whatever he was set to do, he went at it with an optimism and cheerfulness which made him the favorite of the foundry. There were no owner's son tricks about Sir Adam in his youthful apprenticeship in this foundry. He worked like any of the rest of us, and he was not long in learning the various trades. From the blacksmith shop he graduated through the moulding shop and machine shop and finally through the office. He was a strapping boy and always a bit more cheerful than his rather stern father.

Joseph Hofele, the man who taught Sir Adam his trade, died in the year 1910. Sir Adam has not forgotten Baden and on his visits to the village he never fails to drop in for a friendly chat with Mr. Hofele.

PROUD OF SIR ADAM
There are very few who pass through the village of Baden who, of they have a knowledge of Sir Adam's early connection with the place, do not point to the historic foundry in which he learned his early trade, as one of the main points of interest in the community. The foundry has not changed since the days when the present chairman of the Ontario Hydro Power Commission labored within its walls. It is true the scope of the foundry has been reduced since it was taken over by the Livingstons in the early seventies. The staff has dwindled and the old building remains as a historic reminder of the early days.

A few hundred yards from the rear of the foundry stands the substantial brick house in which Sir Adam was born 44 years ago. The place is now owned by John B. C. Schmidt.

PORT BURWELL WIRELESS STATION.

Pt. Burwell Wireless Plant One of the Most Powerful Radio Stations In America

Is One of a Chain Established By the Dominion Government Along the Great Lakes.

PORT BURWELL, Oct. 28.—In 1913 the naval department of the Dominion of Canada undertook the establishment in connection with the Marconi Wireless Company, of a chain of wireless telegraph stations along the Great Lakes. The idea was to have this chain stretch across the continent. In that year, in any case, a plant was built at Port Burwell, the central port on the north shore of Lake Erie, and as the radio stations are practically standardized, a description of this one will apply to all. Although wireless telegraphy is a familiar term to all, yet few people understand the inner workings of a wireless station, even those which are now controlled by the department of naval service of our own Government.

Just east of the Police Village of Port Burwell, a stream, called the Little Otter, flows into Lake Erie, and on the eastern side of the Little Otter Valley, on the lake bank, was the site selected for the machinery. These buildings were placed in line from east to west and about 100 yards apart. The feature of the wireless station, however, that attracts the gaze of the casual observer is the aerial apparatus. Two masts were put up, the finest of British Columbia fir, to a height of 185 feet. Then, of course, there were the two wires stretched from one to the other at that height. Stay wires were bolted into huge anchors of solid cement. This aerial part of the station could be seen for miles towering above surrounding trees. The construction work was under the direction of an engineer, but Robt. Timmons, a ship carpenter, of Port Burwell, was a foreman on the job.

THE POWER EQUIPMENT.
The powerhouse is equipped with two standard dynamos, speeded up to 1,720 revolutions a minute. Each is driven by an eight-horse gasoline engine. Only one machine is needed to develop sending energy, but is duplicated so that should one machine be broken the other is promptly pressed into service. The dynamo develops about 440 volts, and this is by step-up transformers raised to about 100,000. Only a few miles of wire is used for sending messages, although direct current is used to build up. The direct current is too difficult to control to be of much use in wireless telegraphy. When the plant is running the aerial wires are charged with this current and the message is released into the atmosphere. The make and break of the ordinary telegraph key. Any person who has not seen "the spark" has an experience coming. When standing in the machine room the business end of the dynamo is a picture of flashing fire and the crash of the spark is deafening.

Two partitions, with a small hallway between, divide the machine room from the operator's office, and the operator has control of the plant by means of switches placed on a board right at his hand. All wiring within the buildings is concealed. In the Port Burwell plant it is beneath the floor and the place is a picture of cleanliness and efficiency.

In the engine room is the grounding switch. Of course, as anyone with any knowledge of electricity will understand, the whole plant is grounded, but this

PEOPLE IN THE BRITISH ISLES SEEING ONTARIO

The agent-general for Ontario in Great Britain (Mr. Wm. C. Noxon) reports that the Ontario cinema film, "Gold Mining in Ontario," has been released for circulation in Great Britain, and that during the first week subsequent to being sent out it appeared at over 100 theaters, including such leading cinemas as the New Gallery, London, where Queen Alexandra and Princess Mary and other members of the royal family attended frequently to see the pictures. Within six weeks this film will have been shown at over 500 cinemas. The film, which has been declared by leading cinema men in London to be one of the finest and clearest underground pictures ever shown in England, depicts the world-famous Hollinger gold mine in all its operations. Many other beautiful Ontario films are in regular circulation in Great Britain at the present time, and it is calculated that over 4,000,000 people in Great Britain have seen Ontario in living pictures during the present year.

The scenery is beautiful, especially this time of the year. The trees have taken on their autumn tints of red, green, yellow and brown, and nature has lavishly bestowed this beautiful spot with glorious hues that are harmonious and restful. Along the driveway that stretches out for miles into the waters of Lake Erie one passes through an avenue of stately elms, red cedars, and spreading maples, and on along the ribbon-like road until the path narrows into a neck of land little wider than a driveway, canopied with trees all the way to the end. On either side are to be seen glimpses of rippling blue waters.

This is the most southerly point of Canada and contains more birds than any other part of the Dominion. The scenery is so beautiful that the birds are content to spend the winter. Indeed, when one sees prickly cactus plants growing wild, as it grows there abundantly, it is quite suggestive of tropical countries.

WHEATLEY CHURCH AIMS TO WIPE OFF DEBT IN THREE WEEKS' CAMPAIGN
WHEATLEY, Oct. 28.—During the year of 1914-15 the fine new Methodist church was built and a pipe organ installed at a cost of \$18,000. Since that time two heavy storms, and other equipment, have been added, so that at present day prices would make the total fully \$35,000. A debt of \$3,500 remains and it is the purpose of the members to wipe off this debt during the next three weeks. On Sunday, October 30, Rev. R. Fulton Irwin, of Lucknow, under his pastorate the church was built, will take charge of the services morning and evening, and on the following Monday evening will give a lecture "Present Conditions in Ireland, Their Cause and Cure." Mr. Irwin is a native of Ulster and has an intimate knowledge of his subject.

AN OPERATOR'S EXPERIENCE.
P. M. Stewart, operator in charge at Port Burwell, tells of a severe storm up at the station. At that plant the grounding process was accomplished by transferring a plug from the transformer to the wall. As he was in the act of doing this during a violent storm the lightning struck the aerial wires. The plug was knocked from his hand and hung dangling above the dynamo. The electric plug jumped from the plug to the dynamo base and thus into the ground. It was a jump of a couple of feet, and the resultant fireworks were brilliant in the extreme, but also dangerous and awe-inspiring. There is the flash and the reaction each time.

There is no power needed for receiving messages. The station here has a range of 600 miles, but, of course, messages are picked up from much greater distances than that under favorable conditions. The operators at Port Burwell direct the work of three car ferries transferring coal across Lake Erie. The Ashtabula into Port Burwell, the Cleveland, the Bessmer into Port Stanley, and the Mailand into Port Maitland. Last summer it also carried the Roosevelt, on the passenger service between Port Stanley and Port Burwell, and down the lakes. On the new line to call and thus avoid all delays, which are so expensive to the owners. Commercial business from the land side is also carried, messages of every description being received and sent at usual rates.

Erosion of the lake bank forced the moving of the Port Burwell station last fall to a point several hundred yards back from the lake. On the new site one mast was done away with and the umbrella scheme of aerial outfits arranged. This seems to work just as satisfactorily as the parallel wires. The new site embraces about three acres of land. Chief Stewart has two assistants, Messrs. Booth and Snider, and working in shifts they keep a perpetual service day and night. The place is inspected at frequent intervals, and as each operator is an expert in his line the vigilance over the country's business on the great lakes is sure and unceasing.

KERRWOOD.

KERRWOOD, Oct. 28.—A successful bee was held on Monday evening at the grounds around the new church. Mr. and Mrs. Henry Baird, of Edmonton, Alberta, visited the former's sister, Mrs. John Richardson, a few days last week.

Miss Edna Wright and Miss A. Campbell, of the Home Bank staff, Melbourne, also Mr. and Mrs. Hardy, of Melbourne, spent Sunday at the home of Mr. and Mrs. Frank Wright.

Mr. and Mrs. Harry Waite, and son, Clifford, of Sarnia; Mr. Wesley Waite, and Mrs. Hemmingsway, of Detroit, were guests of Mr. and Mrs. Seymour Langford, recently.

Dr. Graham, of Washington, spent a few days visiting his sister, Mrs. Chas. Foster.

The W. A. of St. Paul's Church, will hold their thanksgiving meeting on Tuesday, November 8, at the home of Mrs. de Gex.

Mr. and Mrs. Byerly, Mr. and Mrs. Fred Dowling, of Sarnia, Mr. Easton, of Arkona, called on friends recently.

Point Pelee Is Canada's Southern Extremity

Driveway Under Canopy of Hardwoods Traverses Onion Beds That Once Were Swamps

WHEATLEY, Oct. 28.—These are the days when the young members of the household use all their powers of persuasion with the older folks to take a trip to Point Pelee. It is nothing time and nature has abundantly supplied the point with nut-bearing trees, and Jack Frost has covered the ground with walnuts from tall trees that would be impossible to climb. Here are to be found many other nut-bearing trees. Motor loads for miles around drive to this spot every fall to get a supply of nuts for the winter, and still there are plenty left for the fuzzy squirrels who live in this squirrely paradise.

To the east one sees the famous onion beds that at one time were useless marsh land. Dredging and dyking have reclaimed these acres that lie below the level of the lake, and it has been so arranged by a system of irrigation that the growing crop may be watered whenever necessary.

The scenery is beautiful, especially this time of the year. The trees have taken on their autumn tints of red, green, yellow and brown, and nature has lavishly bestowed this beautiful spot with glorious hues that are harmonious and restful. Along the driveway that stretches out for miles into the waters of Lake Erie one passes through an avenue of stately elms, red cedars, and spreading maples, and on along the ribbon-like road until the path narrows into a neck of land little wider than a driveway, canopied with trees all the way to the end. On either side are to be seen glimpses of rippling blue waters.

This is the most southerly point of Canada and contains more birds than any other part of the Dominion. The scenery is so beautiful that the birds are content to spend the winter. Indeed, when one sees prickly cactus plants growing wild, as it grows there abundantly, it is quite suggestive of tropical countries.

Mr. Irwin is a native of Ulster and has an intimate knowledge of his subject.

On Sunday, November 6, Rev. E. A. Pear, of Walkerville, who succeeded Mr. Irwin as pastor, will be present and conduct the services and on the Monday night following, the famous Hudson Male Quartet, of Detroit, will give a concert. Rev. Mr. Butt, of Wheatley, will be the speaker morning and evening and will give his impressions on world conditions the Monday evening following.

PRESENTATION OF PURSE TO DR. THOMPSON, AYR

AYR, Oct. 28.—On Monday evening the citizens of the surrounding district of Ayr met with many visitors in the Knox United Presbyterian Church to honor Dr. Thompson. Dr. Thompson, who is now in his 81st year, has been a member of the congregation since 1911. He has also resided in Ayr since 1911 and has taken an active part in the church work. The choir contributed an anthem, after which Rev. J. J. Brown, who acted as chairman, gave the address. Mr. Brown read the minutes of a meeting held in the vestry of the old Presbyterian Church on November 11, 1871, and also the minutes of a meeting on September 25, 1871, when Dr. Thompson was voted on to see whether he should become the minister, this being carried by a large vote.

David Brown, the oldest elder of the congregation, read the address of the community of Ayr to the doctor, after which he was presented with a purse from the congregation by the second oldest elder, John L. Black.

Rev. Mr. Nicholson, of Paris, read an address to Dr. Thompson from the presbytery. Dr. Thompson then replied fittingly, telling of his happy years in this community.

A letter from Rev. Dr. McMullen, Halifax, Nova Scotia, was read to the doctor congratulating him. Rev. Brown read a message from Rev. A. C. LaVale, of Toronto, and from many other former members of the congregation.

EXETER.

EXETER, Oct. 28.—Farmers in this vicinity have been busy drawing turpins and sugar beets to the station. They are all well ahead of their fall work; in fact, ahead of any previous year.

A proposal is on foot to form a horticultural society here. Many residents are successful horticulturists and it is believed that a society would flourish.

On Wednesday night Exeter experienced the most severe frost so far this fall.

Miss Lila Johns leaves in a few days for Calgary, where she will spend the winter with her sister, Mrs. Adams. Business conditions here are on the whole good. The local clothing store has orders enough ahead to keep them busy all the winter, and the local planing mill is unusually busy the time of year, and has large contracts ahead.

RECENTLY UNVEILED

EAST MISSOURI ERECTS SHAFT IN MEMORY OF BOYS WHO GAVE LIVES

KINTORE, Oct. 28.—For the first time in the history of the Township of East Nisour, the whole countryside turned out on mass to attend the unveiling of the monument to the boys who gave lives. The monument stands 14 feet high. The main shaft is of Canadian granite, on which is inscribed the names of 18 soldiers of this district who fell in the Great War. Above this column stands a life-size figure of a Canadian soldier, cut in Italian marble, and it is considered by artists as possessing great artistic value. It was carved in Italy and erected by Hayes Bros., St. Mary's. Divine service was conducted, at which each of the clergy present took part. Rev. Mr. Cummer, Thorold, reading the lesson. Rev. Mr. Thompson, West Nisour, asked in a few words that God's approval might rest upon those who had set aside this memorial to the glory of God and the memory of his servants. Rev. Mr. Butt, Kintore, offered the dedicatory prayer, and then at the word of command four

wounded soldiers who stood, one at each corner of the monument, assisted by the reeve of the township, removed the flag.

Rev. Dr. Macdonald, Kintore, himself a returned man, dedicated the memorial to the glory of God and in loving memory of those whose names appear on the monument. One verse of the National Anthem was then played by the band. Rev. Mr. Baker, Thamesford, read the prayer and Rev. Mr. Galbraith, Thamesford, pronounced the benediction, when the Last Post was sounded and the religious ceremony concluded.

Rev. Dr. Macdonald then assured the Council that the trustees of the Presbyterian Cemetery and their successors in office after them would keep the lot and memorial in good repair for all time to come, and also stated that this was possible by a generous donation by the late John A. Calder, M. P. P. who assigned it to this purpose.

The names on the monument are as follows: Earl Abbott, Arthur Allan, Andrew Brookfield, Edwin Greenwood, Ernest Harfield, Horace Huntley, James Karn, Byron Logan, John Madden, Harry Mason, Frank Marchant, John Robinson, Edward Turner, Robert Reid, Morrison, Herbert McLeellan, Wilbert Arthur Vinnicombe, Hugh Whetstone.

APPLES AT LEAMINGTON
LEAMINGTON, Oct. 28.—Winter apples are retailing on the local market at from 22 to 23 per bushel. The crop this year was fairly good, and growers will receive good prices for their crops.

READY FOR MORE

Father: "Is he thirsty?"
Daughter: "Thirsty, daddy! Why, Jack's saved over \$2,000 out of that \$100,00 his grandfather left him the year before last."—London Opinion.

Mrs. M. E. Robson, 170 Dublin St., Peterboro, Ont., writes: "My daughter of 15 lost appetite, color and was on the verge of nervous collapse. Five boxes of Dr. Chase's Nerve Food completely restored her health and strength."

On Sunday, November 6, Rev. E. A. Pear, of Walkerville, who succeeded Mr. Irwin as pastor, will be present and conduct the services and on the Monday night following, the famous Hudson Male Quartet, of Detroit, will give a concert. SUCCESSFUL EVENING IN KINGARF CHURCH

KINGARF, Oct. 28.—A most successful hot fowl supper and concert was held at the Anglican church. The stacks of well-cooked geese, ducks and chickens opened the city visitors' eyes. Cakes and other edibles, made as only farmers' wives can make them, were also in abundance. About 400 people sat down to the tables.

The concert after the supper was to have been held in the Orange Hall, but its seating capacity was insufficient, so it had to be held in the church. Artists came from Kincardine, besides talent from Glamis and Hamilton. Rev. F. L. Lewis acted as chairman and owing to the length of the program no speeches or encores were allowed, and after one verse of "All Hail" the program began with a duet by Messrs. Pilkington and Kempton, of Kincardine.

The Misses Jones, of Kincardine, gave duets with guitar accompaniment, which drew encores in spite of regulations. Miss Collins, of Hamilton, sang two very pretty songs, with cello obligato. Miss Dean, of Glamis, sang a solo, accompanied by Miss Myrtle Chadbourne. Miss Lovelace, of Kincardine, a talented mandolinist, played sweetly. Miss McArthur sang a con-

traits song. An instrumental trio by Rev. F. Lewis, Mrs. Lewis and daughter, two guitars, mandolin, violin, cello, tenor voice, with organ accompaniment proved very popular. Mr. W. Sherwin, of Kincardine, was enthusiastically received in his humorous songs, and as an encore to one of which he gave a pathetic recitation on patriotic themes. Mr. Fred Gibson, elocutionist of the evening, took well.

The evening closed with the singing of The National Anthem.

THAMESVILLE.

THAMESVILLE, Oct. 28.—Mr. and Mrs. A. Pollock, of Port Stanley, are visiting at the home of Mr. L. H. Hubbard.

Mr. and Mrs. L. B. Milton spent a few days with St. Thomas friends this week.

Mrs. Frank Murphy and Miss Macle are visiting in Paris.
