we still believe that there is plenty of hard wheat in the belt.

The following were the highest and lowest prices by grade on 'change during last week, with Wednesday's closing prices:—

	Wheat.	Highest.	 Lowest.	Closing.
No. 1	hard	. \$1.04	 \$1.013	 \$1.04
" 2	"	. 1.00	99	 993
	northern.		 93	 94
" 2	**	. 90	 88	 90

No. 1 hard for May opened at \$1.03 and closed at \$1.04. \mathcal{J} "e opened and closed at \$1.06h.

Corn was strong and higher, No. 2 closing at 58c. Oats were steady at 32c for No. 2. Barley, 35 to 60c, according to grade.

MILISTOFF.—Bran has been strong and higher, but dropped at the close, with bids of \$9.75 to \$10 per ton in bulk. Shorts, \$11.75 to \$12.75 for fine to coarse. Corn meal, \$20 to \$24, and mixed feed \$17.50 to \$21 per ton.

FLOUR .- The market shows a great improvement in tone and millers are feeling quite jubilant. Prices have been advanced and although this has tended to reduce orders, there is such confidence in the situation that buyers will have to come to terms. The cessation of work by the great winter wheat mills, owing to the scarcity of good milling wheat, is already being felt in eastern markets, where Minnesota flour is called for more freely by dealers in high grade flours on account of the light stocks of good winter wheat brands. People who have heretofore been content with the cheaper flour, now buy our spring wheat brands at higher prices, because they can not use the second or third grade winters. Everything now indicates a steady run by the mills until the new crop comes in, but there may come so radical a change in the situation as to preclude this. Good judges still talk about short supplies of hard wheat. Quotations at the mills for car or round lots are about as follows:

Patents, \$5.75 to 6.25; straights, \$5.40 to 5.60; first bakers', \$4.50 to 5.00; second bakers', \$4.15 to 4.40; best low grades, \$2.25 to 2.75; red dog, \$1.75 to 2.00, in bags.

We are able to report a very much improved feeling on the platform this week, the recent advance in wheat having inspired a considerable degree of confidence. Millers generally report a better demand for flour, and have advanced prices, which they are obtaining in many instances. The greater portion of the trade is on domestic account, but there is at the same time a good export inquiry. Winter wheat mills are reported to be shutting from the lack of wheat, and our millers are much firmer in their views. The flour production in this city last week showed a slight falling off, being 103,-375 bbls.—an average of 17,229 bbls. per day against 112,985 bbls. the preceding week. The shipments are not quite as heavy as the output, and some of the mills are evidently storing to a slight extent. As to the current week, the production promises to waver between 18,000 and 19,000 bbls. daily. There were 16 mills in operation Tuesday, and they were making about 18,000 bbls., the Washburn mills running the strongest and to their full capacity.

The following were the receipts at and shipments from this city for the weeks ending on the dates given:

Another week of remarkable activity and buoyancy has passed in this market; prices, however, are not so firm, shorts having covered freely, besides Liverpool and New York were quoted lower, and a feeling of weakness was apparent, owing principally to the fine weather reported in the Northwest.
