

agent for the Crow's Nest Pass Coal Co., has gone to Toronto and other Canadian cities. He was accompanied by Mrs. Davies, and they may visit Virginia before returning to southeast Kootenay.

The Rossland *Miner* says: "The many friends of W. S. Keith in the Boundary and Rossland will be pleased to learn that he has been appointed to the position of superintendent of the smelter at Sumpter, Ore., owned by the Oregon Smelting and Refining Co."

O. L. Liegeart of Lille, France, who is a director of the Canadian Metal Company, has been visiting Frank, southwest Alberta, where the company has erected a zinc smelter, and the Blue Bell mine on Kootenay Lake, near Ainsworth, also owned by his company.

A. P. Low, director of the Geological Survey of Canada, has returned to Ottawa from a visit to Arkansas, Arkansas, U. S. A., convalescent after the serious illness that for several weeks incapacitated him from attending to the duties of his responsible office.

Captain T. H. Trethewey of the La Plata mine has resigned the managership of that property to look after some mining interests in the coalfields of Alberta. His place has been taken by his son, W. J. Trethewey. Captain Trethewey remains a director of the La Plata company.

Chas. Dunderdale of London, a director of the Le Roi Mining Co., has returned to England after having visited that company's mine at Rossland and smelting works at Northport, Washington. Before coming to British Columbia Mr. Dunderdale went to Cobalt, northern Ontario, where he and associates are largely interested in mining properties.

News has been received at Rossland that Allan McLean, managing director of the Portland-Velvet mines, and director of the Rossland Kootenay Co., died recently in London, England. Mr. McLean was well known at Rossland, having visited that camp twice during the past three years, his last visit having been made about sixteen months ago.

W. W. Leach of Ottawa, one of the geologists of the Geological Survey of Canada, will go north early in May to continue the work of delimiting the coal and copper areas in the Telkwa Valley district in which he was engaged last year and on which he made the report published in the "Summary Report of the Geological Survey Department of Canada for 1906."

Richard F. Jones of Seattle is to have charge of mining operations on the Arctic Chief and Best Chance copper properties near Whitehorse, southern Yukon, under the direction of W. J. Elmendorf of Spokane, consulting engineer and manager for the owning company. It is stated that modern machinery will be installed and the mines worked on a comparatively large scale.

S. F. Parrish has removed from Los Angeles, California, to Tonopah, Nevada. Mr. Parrish's numerous friends in the Kootenay and Boundary districts of British Columbia will be glad to know that his residence on the Pacific coast, in California, during about a year and a half, has had a most beneficial effect upon his health so that he is now, to use his own words, "as good as new again."

Paul Johnson, who lately resigned the management of the Alaska Smelting and Refining Company's works at Hadley, southeast Alaska, left Seattle on April 30 by steamer for San Francisco, en route to Nevada. He will be in New York, accompanied by his family, about the middle of June, sailing thence for Europe about June 21. He will probably remain at Lund, Sweden, until late in the fall.

W. C. Thomas, for some time past superintendent of the Dominion Copper Company's smelter in the Boundary district, has been appointed the company's resident general manager, in succession to T. R. Drummond. Geo. Williams, for several years superintendent of the British Columbia Copper Company's smelter in the same district, is now filling a similar position at the works of the Dominion Copper Company.

O. A. Caldwell, chief accountant at Rossland for the

P & B PAINT

A special study of preservative paints extending over a period of a quarter of a century has enabled us to produce the best paint for general use around smelters or chlorination works on the market to-day.

For painting cyanide tanks, acid vats, pipes, etc., P & B Paint gives entire satisfaction. Leaves a protective coating equal to three coats of metallic paint.

Send for P & B Paint folder which tells where and how to use P & B Paint.
