

For some time I was inclined to consider this the ♀ of *Caeculalis*, but I make out the frenulum of my type to be single and the specimen therefore a male. The species are small and frail in this Pyralid genus and may be known by the peculiarly shaped wings.

BOTIS COMMORTALIS, n. s.

A small form no larger than *Vibicalis*, very distinctly marked and easily recognized. Fore wings brown, crossed by two mesial distinct nearly upright lines. Fringes white. Head and thorax dark. Hind wings pure white, immaculate. Beneath fore wings dark, hind wings white; legs whitish. *Expanse* 11 mil. Havilah, Calif., Mr. Edwards.

This little species must be easily recognized. It is possible that it may be placed more advantageously in an allied genus when the neuriation can be studied.

(To be Continued.)

ANNUAL MEETING OF THE ENTOMOLOGICAL SOCIETY
OF ONTARIO.

The Annual Meeting of the Society was held, according to announcement, in their rooms, Victoria Hall, London, Ont., on Monday evening, Sept. 26, 1881.

A number of those interested in Entomology were present from different parts of the Province, the President, Mr. Wm. Saunders, in the chair. The report of the Council was read and adopted, and the Sec.-Treasurer submitted his financial report, which was duly adopted.

Letters of apology for non-attendance were read from Rev. C. J. S. Bethune, Jas Fletcher, W. H. Harrington, W. Couper and G. J. Bowles.

The President then delivered his annual address, on the conclusion of which the meeting unanimously tendered Mr. Saunders a vote of thanks, with a request that his address be printed in the CANADIAN ENTOMOLOGIST.

The election of officers then took place, when the following gentlemen were declared duly elected :

President—Wm. Saunders, London.
