THE HIGH SCHOOL Drawing Course

Authorized by the Minister of Education.

The Course is now complete:

- No. 1—FREEHAND,
- No. 2—PRACTICAL GEOMETRY.
- No. 3—LINEAR PERSPECTIVE,
- No. 4—OBJECT DRAWING,
- No. 5—INDUSTRIAL DESIGN.

These books are all uniform in size and style, and constitute a complete uniform series. The same plan is followed through them all—the Text, the Problems, and opposite the Problems, in each case, the Exercises based upon them. The illustration is upon the same page with its own matter, and with the exercise, in every case, is a space for the student's work. Each copy, therefore, is a complete Text-book on its subject, and a Drawing Book as well, the paper on which the books are printed being first-class drawing paper. The student using these books, therefore, is not obliged to purchase and take care of a drawing book also. Moreover, Nos. 1, 4 and 5 are the only books on their subjects authorized by the Department. Therefore, if the student buys the full series, he will have a uniform, and not a mixed series, covering the whole subjects of the examinations, and edited by Mr. Arthur J. Reading, one of the best authorities in these subjects in this country, and recently Master in the School of Art. Each book is in the direct line of the curriculum, and is authorized.

The examinations in High School Drawing will be set from the authorized books.

"Public School Temperance."

The attention of teachers is respectfully called to this new work, designed for use in the public schools. It is placed on the programme of studies under the new regulations, and is authorized by the Minister. It will be used in three forms. The object of the book is to impart to our youth information concerning the properties and effects of alcohol, with a view to impressing them with the danger and the needlessness of its use.

The author of the work is the celebrated Dr. Richardson, of England; and this book, though somewhat less bulky, being printed in smaller type, contains the whole of the matter of the English edition, slightly rearranged as to some of the chapters, to suit the requirements of our public school work. It is, however, but half the price of the English edition.

The subject is treated in a strictly scientific manner, the celebrated author, than whom there is no better authority on this subject, using the researches of a lifetime in setting forth the facts of which the book discourses. At the same time the style is exceedingly simple; the lessons are short and accompanied by appropriate questions, and the language is adapted to the comprehension of all who may be required to use the book. Price 25 cents, at all book-stores.
