Royal Cement Plaster

Rightfully the king of all plasters.

Only absolutely perfect natural plastering material.

Your house plastered with it will be warmer in winter and cooler in summer.

As freezing does not affect it after once set, can be safely used during the winter.

Literally harder and more dense than rock, therefore impenetrable to rats, vermin and disease germs.

Costs but little more than mortar work.

Enables a building to be occupied almost immediately, saving weeks.

Manufactured so accurately that skilled labor not necessary to insure perfect work.

Easily applied by any mechanic and produces a wall hard, strong and thoroughly fire-proof.

Not a patent material made from plaster paris, glue, acids and other unhealthy compounds.

Thoroughly pure and perfect in its natural state, absolutely no ingredients used in its manufacture.

Prices made for delivery at any point.

Liberal inducements offered and satisfaction guaranteed.

All of our material is positively perfect, otherwise no payment expected.

Security, protection and profit assured our agents and customers in every respect.

This material works easy under the trowel and is slow setting, thereby preventing all waste.

Entire avoidance of cracks, bulges and other customary defects by its use.

ROYAL in name, CEMENT by nature, PLASTER its purpose.
