Fax: 604-324-3821
Export Contact: Mr. Ernest Moniz, V.P. Sales & Marketing

Brookdale International Systems Limited is a privately-held Canadian company incorporated in 1990 to develop, manufacture and market socially-meritous products, starting with the EVAC-U8 emergency escape smoke hood. The EVAC-U8 hood and filtration system protects the user's eyes, nose, mouth, head, throat, and respiratory system, allowing time to escape many respiratory threats such as fire.

Brookdale's research and development capabilities are such that EVAC-U8 can be adapted to different applications and challenge atmospheres. This has already taken place in the form of the DIX-EVAC life support system, an alternative to the present oxygen delivery system in airplanes since it will filter toxic smoke during emergency landings and evacuation from the aircraft.

Brookdale International Systems Limited has began production in their 5,000 square foot, state-of-the-art clean room facilities, created to meet ISO 9000 standards, and have started test marketing on the Pacific Coast of the United States and in Canada. Beginning in January 1994, EVAC-U8 will be available across North America, and Brookdale is interested in expanding sales through strategic partners in Japan, Europe, Hong Kong, Australia, the Middle East and Mexico. Presently, Brookdale exports EVAC-U8 to distributors who are engaged in direct sales to people for use in the home, travel, office, nursing homes, hospitals, schools, etc..
