

# NEW BRUNSWICK,

WITH NOTES FOR EMIGRANTS.

*Comprehending the early History, an account of the Indians, Settlement, Topography, Statistics, Commerce, Timber, Manufactures, Agriculture, Fisheries, Geology, Natural History, Social and Political State, Emigrants, and contemplated Railways of that Province.*

By ABRAHAM GESNER, Esq., F.G.S.,

Author of "Remarks on the Geology and Mineralogy of Nova Scotia," &c:

"Full of well written information, excellently arranged."—*Hull Advertiser*.

"We have had many volumes of travels, and many lengthy interesting ones, which have nothing like the value of this, in which the mind of the writer is directed to important objects, and aims at their illustration, bringing into requisition the resources of a well-informed mind. The book is highly valuable in reference to the Province of which it treats, and for its sound information on subjects of interest in relation to all countries."—*Bath Journal*.

"A very useful and entertaining work upon this important outpost of the British Empire. To those about to expatriate themselves in search of new homes, we strongly recommend this the latest account respecting the land of promise and hope—British America."—*Pictorial Times*.

"A very valuable and interesting acquisition to all who contemplate Emigration, and to those who have friends in the Province, as well as forming a permanent addition to the library of reference."—*Critic*.

"This is a useful and comprehensive book, and one that has long been required, as no history as ever been published descriptive of the resources of the fine Province of which it treats. It will prove a serviceable guide to intending emigrants, and an excellent work of reference on the historical events, and statistics, and progress of the colony."—*United Service Gazette*.

"This is one of the most complete and instructive works recently issued from the press, and it has the additional merit of being extremely opportune. It contains every fact of interest connected with the Province. To intending emigrants it is a valuable *vade mecum*; while the capitalist, the merchant, and the naturalist, will find much in its pages to instruct and interest."—*Liverpool Journal*.

"The remarks set forth are so truly valuable that every person should possess a copy of this work who has the slightest intention of leaving his native land to seek his fortune in a foreign clime."—*Cheltenham Journal*.

"A work loudly called for at the present time, when such dense ignorance prevails of the capabilities of our American Colonies."—*Edinburgh Register*.
