Buzzing motors of the aeroplane guards which were the first to be notified and sarchights flashing from the vicinity of the Diffel Tower to the heights of Montmarte caused the keenest interest and exitement among the population of the awakened city, but there was no panic.

Thousands strained their eyes in an effort to catch a glimpse of the invaders, which many claimed to have seen moving swiftly in the vicinity of Madeleine, or to watch the work of French airmen. Balconies and the roofs of houses in Passy and other quarters were used as vantage points by the curious, while many of the more timid sought refuge in callars or other places of safety where they remained until sure all danger was last.
