# HINCKS DENOUNCES

An Attack, He Says, on Civil Rights and Sets Up Decree of Pope Against Law of Province.

Before a crowded congregation in Broadway Tabernacle last night, Rev. Dr. Hincks delivered a bitter condemnation of the decree of the Pope referring to mixed marriages, under the title of "Roman Catholics and Mixed Marriages" His text was from Mattogether let no man point asunder' He deprecated the undercurrent of revolt in the fiction of the day against the Christian marriage, especially those from the other side, which often openly derided it, and gave credit to the Roman Catholic Church for their firm opposition to divorces in their own church But he was angry at their inconsistency and the flerce narrowness expressed in the papal decree, which declared mixed marriages filegal unless

consummated in the Roman Catholic Church and by their priests "Thirty years ago if this decree had been read in Britain it would have been burned in the public square," declared Dr. Hincks, "but owing to the power of the high church party there, the tolerance of Roman Catholicism has grown to a dangerous degree. Now it has come to a point where cases like the McCann case are known to exist, and yet the law is powerless to prevent them. In my onlying it ought to vent them In my opinion it ought to be a crime for any man, be he pope or priest, to even suggest to a woman that her marriage is not legal because it does not approach his narrow eccle-siastical ideas of Romanistic matrimony. The Roman narrowness of 500 years back has survived, and the a man may not use thumbscrews on his victim, the priest may put every girl

The President, Mr. S. J. Moore, spoke as follows :-"I have very much pleasure in moving the adoption of the Report which has just been read. It speaks for a year in which much progress has been made besides that represented by the Net Profits reported. A large amount of constructive work has been done which future years will derive benefit from.

PROFITS.—These (including the profit realized on the Pacific-Burt transaction) amount to \$183,401.34, and are equal to 12% upon the total Capital of the Company, They are also equal to 17% upon the Common

Capital of the Company. They are also equal to 17% upon the Common Stock, after provision has been made for the Preferred.

DIVIDENDS.—Seven per cent, has been paid on the Preferred Stock during the year, and for the first three-quarters of the year dividends was too great and they were repulsed. All the occupants of upper floors were accounted for. It is believed by the first that he fourth quarter to 6%. The distribution in dividends was \$86,250, or less than one-half of the total earnings, and the remainder, amounting to \$97,151.34, has been retained in the business. After transferring \$25,000 to Realty and Plant Reserve Account, the Profit and Loss Account is increased to \$125,052.22.

BUFFALO FACTORIES.—The shipments from these factories made new records for every month of the year 1910, and the increase over 1909 and he wilding, the heavy stone sidewalks being lifted high in the air and huge pieces of stone scattered about the amount of desirable business offered to us, and also because of the street. The explosions were attributed to breaking gas pipes.

The high wind carried embers from the fire high over the business district, and a number of small fires were startled on the roofs of several buildings. fully justified. Large additions to two of our factories have been in progress for some time, and by the first of July we should have these completed and new machinery installed therein.

While we shall get some benefit from the enlargements during this year, it will be next year before we get the full benefits therefrom. EUROPE .-- A careful study of the condition of trade in our lines in Europe was made early in 1910 by our Managing Director, Mr. Burt. who visited Great Britain, Germany, France, Holland and Belgium. From his report it was evident that there is a field awaiting development, although the conditions of trade indicated that we should have to do considerable preliminary work before receiving returns from that territory. A leading manufacturer of paper boxes in Great Britain visited our factories in Buffalo last year, and within the last few weeks has urged very strongly that we at once introduce our special machinery into that country, as the situation appears to be very favorable at the moment owing to special conditions which have arisen. Unfortunately we are not in a position to take advantage of this opportunity for the reason that it will be many months before we shall have built a sumcient quantity of our special machines to fully equip our enlarged Buffalo factories. It seems quite likely that when we are ready to enter the European market we shall be able to make some arrangements that will be satisfactory and ultimately profitable to the

PACIFIC COAST TERRITORY .- In view of the many demands made Company upon our managerial staff, and upon capital for the development of business at Buffalo, it appeared wise to take advantage of a favorable opportunity of establishing a connection with a business already well organized and profitably conducted in California. The Pacific-Burt Company, Limited, have become our exclusive Licensees for the territory west of and including Denver, Colorado. They have issued to us securities, the value of which appears in our Profit and Loss Account at \$22,500, and are to pay us additional considerations. By this arrangement we insure good management and direct oversight of our interests, and avoid the furnishing of capital necessary for the establishment of the business in that territory.

CANADA .- In laying plans for the development of our business in Canada. we availed ourselves of an opportunity to acquire a prosperous and well-established business, which will, we believe, form the foundation of a very profitable business in this important and rapidly growing market. The Dominion Paper Box Company, Limited, has been in existence for many years, and has a valuable connection throughout Canada. It is in every way a successful business. We have purchased all of the capital stock of this Company, and thereby secured all of its assets, including a valuable factory site and buildings in the City of Toronto. The principal officers of the Company continue with us for a term of years, and we thus secure the personnel which has established and made the business suc-By this means we avoid the necessity of building up a new organization, and the finding of the men necessary for successful administration. Payment for this business is to be made entirely in Preferred Stock of our Company, so that the former proprietors retain their interest with us

FINANCIAL. -- In order to issue the Preferred Stock necessary to pay for the business of the Dominion Paper Box Company, Limited, and to provide for the extensions already undertaken in connection with the Buffalo and Toronto businesses, it will be necessary to increase the Capital Stock. For this purpose a special meeting of Shareholders will be held at the close of this meeting, and the Directors will ask for power to apply for Supplementary Letters Patent increasing the capital by \$750,000. O this amount \$300,000 will be offered to the Shareholders at par, each

shareholder being entitled to a pro rata proportion of his holdings, which

vill be equivalent to one share in five. GENERAL .- It will be evident from these remarks that this Compans appears to have the promise of a very prosperous future, with the possibility of world-wide scope. I am convinced that this is the case, and that the only serious difficulty appears to be the supplying of well qualified men for the more responsible positions to keep pace with our growing opportunities. This supply is always and everywhere the most difficult to obtain.

In this connection I wish to speak in the highest possible terms of praise of the service rendered the Company during the past year by our the service rendered the Company during the past year by our providers to speak of him in this

Managing Director, Mr. Burt. It was my privilege to speak of him in this way at our last meeting, and I can only add to what I said then, that he has continued in a most intelligent, devoted and successful way to deal with all matters relating to the Company's interests which came under his direction. He will second this motion, and in doing so give additional information that I am sure the shareholders will be very glad to receive.

The Managing Director, Mr. F. N. Burt, in seconding the motion for the adoption of the report, gave numerous details regarding the enlargement of the Buffalo plants and the condition of orders on hand, and assured the Shareholders that remarkable progress has been made during the year in developing and strengthening the business. He predicted an increased business with somewhat larger profits in 1911 over last year, and a much greater increase the following year, when full benefit would accrue from the

enlarged facilities now in process of construction.

The General Manager, Mr. A. D. Clark, also spoke of the work accomplished in the Canadian department during the year and the prospects for improvement during the current year.

The President of the Dominion Paper Box Co., Mr. Alfred Jephcott, referred to the substantial and successful character of that business, as did

also Mr. Wm. Jephcott of that Company, The Report was then unanimously adopted.

The Secretary was authorized to cast a ballot for the election of the

Board of Directors for the ensuing year.

Messrs. Clarkson & Cross were appointed auditors.

At the conclusion of the Annual Meeting a special General Meeting of the Shareholders was held, at which By-law No. 5 increasing the capital of the Company from \$1,500,000 to \$2.250.000 by the issue of 7,500 new shares of Preference Stock of \$100 was confirmed.

At a subsequent meeting of the Board Mr. S. J. Moore was elected President, Mr. A. E. Ames Vice-President, and F. N. Burt Managing Director of the Company

and a number of several buildings.
Some of these embers fell fourteen
blocks from the fire, burning awnings
and other destructible material upon

which they fell.

The Syndicate Building was a landmark of Minneapolis, and was erected
in 1882 by a number of local business
men. About three years ago it was
purchased by the Boston Trust Co.

The largest individual losses are:
Model Clothing Co., \$175,000; Minneapolis Dry Goods Co., \$350,000; J. B.
Hudson & Son, jewelers, \$100,000, outside of the safe, which contained merchandise valued at \$200,000; Young &
Quinlin, tailors, \$125,000; Woolworth &
Co., \$20,000; other tenants estimated at which they fell. Co., \$20,000; other tenants estimated at \$100,000. Loss on building \$200,000.

Windows across Sixth-st. were shattered by the heat, and \$5000 damage was also caused there by water.

The New England Furniture Co., in a building adjoining the Syndicate block, suffered a loss of \$10,000 by water from burging hose that we want water from bursting hose that was run thru the building. Altho the fire broke out early in the

Altho the fire broke out early in the morning, it was almost noon before it was definitely under control. For several hours it was feared that the entire business district would be swept by the flames, and it was only by desperate efforts, which were aided by the St. Paul department, that the loss was not far greater.

All of the principal losses are covered by insurance.

### CAUSE OF DEATH UNCERTAIN

#### Saturday Lecture at Trinity PROF. HUTTON ON BACON.

A brilliant and elaborate depreciation of Francis Bacon, by Principal Maurice Hutton opened the Lenten lecture course at Trinity College on Saturday afternoon. Bacon's glittering generalities only survived, perhaps, as his own maxim suggested, because the river of time bears along the froth and scum of things on its surface. while matters of more moment drop to the bottom. Principal Hutton never was more brilliant nor more witty nor more cynical than in his clever sketch.

Flad he been moved to take the other side. Bacon would have found a congenial advocate.

"I had no interest in the subject, but, a strong objection to the hero proposed to me," was the explanatory predictions of the subject, but a strong objection to the hero proposed to me," was the explanatory predictions of the subject of the subje

feeling will be strongly expressed. There has been a change of 112 votes in the house of representatives, the Republican majority of 47 being turned into a Democratic majority of 56. In the senate, where the Republicans had within two votes of two-thirds, their majority of 28 is reduced to 16 or will be when Albany sets. Naturally such a revolution will give rise to a good deal of confusion at first, and, on that account, the extra session will prove a difficult ordeal for the new majority in the house.

Enactment of the Canadian agreement will noturally be their first business. The authorization of a tariff commission, a measure they have once approved almost unanimously, will probably be the next. Beyond these it is to be hoped that they will proceed with deliberation and care. They can enact no revision that does not meet the support of a majority of the Republican semators and avoid the vote of the president. Their chance for constructive work is better than the country will watch with eager scrutiny the tendency of their courage.

Had he been moved to take the other side. Bacon would have found a consenial advocate.

"I had no interest in the subject, but a strong objection to the hero propositive to his address. Enlightened dislike however, after some months' study, in spite of his aversion, compelled him to be an admirer. Why, then, did he dislike him? For the same reason every one else had—Lord Macaulay's essay of eulogy.

Macaulay and Bacon were of the type which is constitutionally impatient of say that Bacon was just the ordinary material-minded Englishman, who was courageous enough to say what he thouse of the president. Their chance for constructive work its better than the with a document will advocate.

Had he been moved to take the other side. Bacon would have found a consensation of two-thirds, the construction of the next sets of the me," was the explanatory preside to me," was the explanatory preside to me," a strong objection to the hero proposion. In the to me," as admirer. Why, then did to

had much in common. Whenever he was original and revolutionary he was wrong. Neither Bacon nor Aristotle relied on mathematics as Plato did.
Bacon's science was the science of a brilliant amateur. To account for Bacon's fame Principal Hutton suggested that the physicists were an illiterate race, and among the dumb the man who speaks is an orator.

race, and among the dumb the man who speaks is an orator.

He was a great phrase-maker, unequaled by Matthew Arnold or Beacomsfield, and had a unique sift of analogy. He knew his Bible and the classics as few did. A master of metaphor and analogy, of literary allusion and sententious phrase, he held the requirer

report were in the habit in Bacon's time of twisting their science to suit their orthodoxy, observed the lecturer. And then, in an aside, "Of course, they do not do so now." "Christianity did not do so now." "C And then, in an aside, "Or course, they do not do so now." "Christianity did not attach the same merit to success that paganism did, or that America does to-day." was another of the sharp sayings of the speaker "With our present-day obsession that our Christianity is Christianity, we question Bacon's."
"If anyone can fancy for a moment

"If anyone can fancy for a moment that Bacon wrote Shakspere, let him read the essay on Love," said Goldwin Smith, and Principal Hutton referred to the Baconian theory as sufficiently to the Baconian theory as sufficiently settled by this view. The Bacon-Shak-spere theory was originated in the last century by a clerayman named Smith, to discredit the higher critical method. Bacon was a great faddist. If he had lived to-day he would have been an enthusiast about Jaeger fiannet. "Poor man, he did not live to see it,"

was the speaker's droll comment. Editon's recent speculations were quoted as illustrating the method of Ba-con. He did not believe that either con. He did not believe that either star in the east or star in the west had done as much for humanity as the printing press, gunpowder and the mariner's compass. And yet Bacon

was a religious man. But Bacon never faced the relation of reason and religion. He said they were to direct the course of science, but he never told us how.

Next week's lecture will be on "Addison and Steele," by Prof. Routh.

### WILL USE HYDRO POWER

London Street Railway First City.

LONDON, Ont., March 5 .- The pre-Hminary decision between hydro-electric, city and street railway representatives for the taking of the Niagara power by the London Street Railway, took place on Saturday afternoon.

The whole situation was carefully gone into by the engineers represent-ing the hydro commission, and a draft agreement submitted to the company. The matter is now in the hands of the
