NOTHING the Germans may practice in the way of brutality, obscenity described in the destruction in the future can cause us to think much worse of them than we do now. We know the creature as he is and label him for what he is worth; and thus, when we hear that the German soldiers are killing all the wounded left lying on the field in the path of their advance, we do not feel surprised, and it is greatly to be questioned whether our sense of loathing is intensified. "Can the Ethiopian change his skin or the leopard his spots?" We do not know that either feat has ever been accomplished. In the same way, a German reared in an atmosphere of "KULTUR" can never be expected to transfer himself into an atmosphere of CULTURE.

What the Greeks expressed by their paideia" and the Romans by their "humanitas," we try to express by the word culture. When, therefore, we speak of a cultured person, we mean one whose moral and intellectual nature has been refined through a process of religious and secular education. In fine, such a person is looked upon as one who is above thinking basely, and one to whom the commission of a base act is impossible. Since, however, the German has proved himself capable of violation and brutality, pillage, plunder and arson, of wanton cruelty towards the sick, wounded, helpless and weak, of conduct at once obscene and infamous towards women, old and young, we cannot imagine for a moment that his kultur is in any way related to our word so similar to it-in sound at least.

German literature is full of the phrase "the soul of the German people." In so far as this soul has been materialized quite thoroughly within the last forty years by its allegiance to "kultur," we can understand why it is that the moral side of the German character, if not the intellectual, has been stunted and denied a fuller and higher development. Kultur, as the German knows it, is a purely material unfolding of a person; or, to put it differently, it is the education of a man toward best fitting him for the pursuit of material ends. It means comprehensively, civilization, and embraces the whole system of schools, the parliamentary system, the industrial life, the technical skill, the military system, and everything which distinguishes the civilized man from the savage." Thus it is that the kultured German is the man who by education is entirely these days almost anywhere she cares to have it. subordinated to the state. He himself is nobody the state has become his diety. Whatever the

ing to give. The prosperity of every country or statedeny it who will-is judged in terms of profit and loss. The amazing material strides made by Gerprosperous of European states. Now consider the have to enamel them over so soon. fact that every German is kultured into helping to extend in any way possible to him the material are able to see why it is that the moral progress of such a people has been left in abeyance. Such a people has been left in abeyance. Such arts and crafts as were calculated to help the state to material pre-eminence among the other nations of the world, were to be diligently wooed: nothing else mattered. This has been the gospel of modern Germany; and, while it is true that a section of the community did strive for the higher things of life, the vast majority neither did nor wished to so strive, simply because it had been schooled in the tenets of kultur. A nation of this sert must first be punished, and then tutored sort must first be punished, and then tutored allows the first be punished. The weed into the army.

in newsprint. It would be refreshing and inspiring to believe that the paper manufacturing companies continue to make newsprint at a "small" profit rather than produce finer paper at greater gain, if the human brain were capable of such great faith in the philanthropy of the manufacturers,

but it is not equal to the task. If the secretary's contentions that there was not a profit of 34 per cent on newsprint and that newsprint constituted two-thirds of the company's tonnage production are correct, what an unrighteous profit must have been extracted from the public on the remaining one-third in order to bring the average profits to 34 per cent! The question at once arises: Why did not the company make more of the better-paying lines and less of newsprint, or even drop the latter altogether? The only answer is that either the plant was not equipped for the change, and alterations would be too costly, or that there was not the demand for greater supplies.

The attempted intimidation in the threat to discontinue the manufacture of newsprint may be !

ignored safely by those who are striving to obtain a fairer price. The industry will not go out of existence because of being compelled to charge reasonably.

What of the man or woman who has a few square feet of soil beside the house and no other land? Would it be wise to sow grain or plant potatoes, with the prospect of harvesting a bushel in the fall? The results would not be worth the money and labor expended, but there is a crop which may not do much towards stilling the pangs of hunger, but will do wonders in that little "two by four" front garden—a crop of beautiful flowers. Plant these little plots for beauty, not for direct utility, and the community will benefit.

At the time this story opens, Arthur was getting worried. BENJAMIN TRUEMAN, LAWYER, DIES SUDDENLY.

Arthur stared dully at the paper without seeing a word for the space of several moments, then came to himself and perused the story which informed him that the aged attorney had been found dead in his office late the previous evening by a cleaning woman. The doctor, who was summoned, said heart failure had caused his death, and a letter, written the day before and left on the desk, showed that he had known of his condition and had had premonitions of his death. The letter said that he (Mr. Trueman) had lost every cent he possessed by speculation and that worry over this had caused his life.

Arthur stared dully at the paper tug as it steams up with furious puffing and begins to slowly tow the large turbine steamer, "The Souls," out of the hatbor of which this young captain is master. Captain D. Cupid, harbor master, if you please. Thus "The Two Souls" moves slowly out of the harbor of Love and Promise. "Ah, look forward, sir. Arthur felt genuinely sorry, because Arthur felt genuinely sorry, because Mr. Trueman had been such a close friend of his father and also because he himself had been fond of the old man. It was not until later in the day, however, that he became apprehensive that his own destiny might be affected by Trueman's losses. It was suggested to him by the proprietor of the hotel.

British Magnificent.

The work of the British troops all along the front was magnificent, and pecially noteworthy because of the fact that some of the men had been fighting steadily since April 9. They still had a hold on the northern ridge of Voorsteadily since April 9. They still had a hold on the northern ridge of Voormezeele today, as they had at the beginning of yesterday's assault. Their line also was maintained at Ridgewood. The spirit of the British troops is shown by an incident that occurred on Sunday near Voormezeele.
