Remarking upon this contingency, the diplomatic expert of the Daily Telegraph writes: "The disadvantages of postponement might, however, be compensated in some measure if a postponement which will carry the conference well beyond the coming United States elections should enable the Washington administration to ascertain the repistrength of public feeling in the U. New York Sportsmen, on Even the Ontario Hydro Electric system-which is now the Way to Newfoundland for argest electric distribution system in the world and the outstanding example of municipal ownership started in a small way. In 1910 the Ontario hydro system started by delivering 750 h. p to ten municipalities on the Niagara system. Since 1910 it has grown immensely, until at the present time it comprises a network which covers practically the whole of Ontario, and consists of fourteen different systems, having 3,000 miles of transmission lines and supplying power to 236 urban municipalities and forty-four townships, having a total number of consumers, in 1921, of 265,000, to add distribution 275,000 have a fartish 170,000 have and distributing 375,000 h. p., of which 170,000 h. p. was exported to the United States.

If the Idea back of this immense scheme was not the correct one, it certainly would not have pr tacks and misrepresentations of the power interests. That idea was "Power at cost for the People."

Nor is Ontario the only Canadian example of municipal ownership of electric light and railway utilities. In the Canadian West there are eighty-four municipal electric light and power systems in successful operation, including such cities as Winnipeg, Moose Jaw,

Saskatoon, Regina, Edmonton, Calgary and Lethbridge.
In the United States, the city of Detroit has lately purchased the street railway system, and it is now being operated by the municipality for the benefit of the citizens. The city of Los Angeles owns and operates its municipal electric light and power system, and the state of California is contemplating starting a hydro system modelled after the Ontario hydro. It is understood that the state

of Georgia is also contemplating a hydro system.

**SAVE \$600,000 A YEAR** 

Based on a consumption of 10,000,000 to 15,000,000 K.W.H. at hydro rates, the citizens of St. John using electricity for light and power now have an opportunity of saving approximately \$600,000 per annum over New Brunswick Power Company rates, as well as having the opportunity of using numerous labor-saving

devices in their homes at small cost if they so desire.

Mr. Chamberlain was of the opinion that Bonar Law's health would not permit him to assume the task of the premiership. He looked to see his brother, Austen Chamberlain, succeed Lloyd George, should the latter fail to form a new ministry.

Paris on a charge of murdering Sadie McAuley cost the municipality in the vicinity of \$12,500. This amount includes witness and jury fees, board and expenses, as well as court and constable expenses. There will also be a certain expense borne by the province, such as the expenses of the crown prosecutor, etc., which it is expected will bring the total cost up to at least \$15,000.

Toronto, Oct. 18.—Horse racing in Ontario has completed its first year of operation under the five per cent. government tax upon all wagers. It has been a year of moderate success for the government but of adversity for the tracks concerned. There has accrued to the province the sum of \$2,212,220, which is \$238,000 below the figure which Hon. Peter Smith estimated. At the tracks, however, the wagers have decreased from \$56,000,000 in 1921 to \$44,000,000.
