menter, M. Baudrimont has endeavored aid of powerful telescopes, and the numbers grown on four plots of land; one of man could find his target was by counting these was treated with water, the rest from the right or left, and if one happen Nova Scotia in 1874, bought in the in order with solutions of bicarbonate to be down of course he counted wrongly and fired on the wrong target. The bull'seye could be dimly distinguished when both eyes were open, but when one was closed in the effort to align the sights all ecame a blank. The range officers at Wimbledon are not particularly softheart. ed, but when their register-keepers reported that even with the aid of their glasses ammonia were much softer, hollow in they could not distinguish the marking the centre, and had more stronly deve- discs with any degree of certainty, they sent with a mixture of both salts were not so stop firing, but the mandate came back, "You must do the best you can," and so we were obliged to go on. It is necessary that there should be cast-iron rules com pelling competitors to shoot at the hour entioned on their tickets, otherwise the neeting could not be finished within the allotted time, and we have no reason to omplain of being unfairly treated ; still it was very hard luck to have our scores ruined by being squadded at an hour when ien on the field, and our top men stood most favourably as compared with others experiences, and also dealing with the from any single county in England. We the camp to be held in the Maritime I give these figures merely as illustra- conduct of the markers who were cor- had every reason to hope for great success, Provinces next year. The officers of the tions of a wide-spreading series of incon- rupted by a number of competitors. He but it was impossible for us to compete in sistencies in our imports of fish, and fish shows that owing to their being obliged fog and darkness advinst men who had products, simultaneously with similar by the rules to fire in certain stages shot in fine light during the earlier part of the day. It was some small consolation to know that we had the sympathy of the whole field, and that every one recognized Ontario, New Brunswick and Quebec, higher prizes, although they secured and regretted the bad luck that had be-fallen the Canadians. The trial of skill particularly in the year 1874.
