

Y.P.C.s coming

Halifax to host Conference

by Keith Evans

On May 23, 24, and 25, 1975, Halifax will be host of a Young Progressive Conservative Policy Conference. Delegates from the four Atlantic Provinces will gather at Saint Mary's University to discuss many aspects of the role of the YPC Organization and the inputs that it can give to the Conservative Party.

Plans are still in the initial stages, but the format that is planned is to have an organizational discussion on Saturday and a policy discussion on Sunday. Included in the activities will be a social and other chances of interaction between delegates from the four provinces.

Special guests at the Conference will include

MLA's and some MP's hopefully, and approaches have been made to the Newfoundland Premier, Frank Moores, and the Premier from New Brunswick, Richard Hatfield. John Buchanan, Leader of the Nova Scotia Opposition has also indicated that he will attend.

The important fact about this Conference is that it is

open to all young, interested people. The tentative registration fee is set at \$25., which will include your room, meals, social, and registration. (\$15. if you do not require a room.) If you are interested in applying and if you think you can survive the food at Saint Mary's please write to me at my home, 16 Young Ave., North Sydney,

N.S. or call Carla Heggie here in Halifax at 455-2323. We will give you any additional information we can and send you an application. It must be remembered that the Conference is open to all interested people and not just registered YPC members. Get involved and get your views across.

Hewlett-Packard introduces a smaller uncompromising calculator: the HP-21 Scientific.

\$159.00*

Now \$159.00* buys:

More power than our HP-35. 32 pre-programmed functions and operations vs. 22 for our HP-35. The HP-21 performs all log and trig functions, the latter in radians or degrees. It's our only calculator short of the HP-45 that lets you:

- convert polar to rectangular coordinates, and back again ($\rightarrow P, \rightarrow R$);
- do full register arithmetic ($M+, M-, M \times, M \div$);
- calculate a common antilog (10^x) with a single keystroke.

The HP-21 also performs all basic data manipulations ($1/x, y^x, \sqrt{x}, \pi$) and executes all pre-programmed functions in one second or less. In sum, it's designed to solve tomorrow's problems as well as today's.

Smaller size. 6 ounces vs. 9 ounces for our HP-35.

Full display formatting. The display key (DSP) lets you choose between fixed decimal and scientific notation and lets you control the num-

ber of places displayed. (The HP-21 always uses all 10 digits internally.)

If a number is too large or small for fixed decimal display, the HP-21 switches automatically to scientific. It never confuses a smaller number with zero.

Finally, if you give the HP-21 an impossible instruction, the Display spells E-r-r-o-r.

RPN logic system. Here's what this unique logic system means for you:

- You can evaluate any expression without copying parentheses, worrying about hierarchies or re-structuring beforehand.
- You can solve all problems your way—the way you now use when you use a slide rule.
- You solve all problems—no matter how complex—one step at a time. You never work with more than two numbers at once.
- You see all intermediate answers immediately. The HP-21 executes each function immediately after you press the function key.
- You can easily backtrack when you err. The HP-21 performs all operations sequentially.

- You can re-use numbers without re-entering them. The HP-21 becomes your scratch pad.

H-P quality craftsmanship. One reason Nobel Prize winners, astronauts, conquerors of Everest, America's Cup navigators and over 500,000 other professionals own H-P calculators.

Your bookstore will give you a demonstration today. Challenge our new HP-21 with your problems. See for yourself how much performance \$159.00* can buy. If your bookstore doesn't have the HP-21 yet, call your local Hewlett-Packard sales office for the name of a dealer who does.

Sales and service from 172 offices in 65 countries.
Canada: 6877 Goreway Drive, Mississauga, Ontario L4V 1L9
Other offices in Dartmouth, Quebec City, Montreal, Ottawa, Winnipeg, Calgary, Edmonton & Vancouver.
