Sept. 17,—	Yoho Park, reduced 105 sq. miles, by Order in Council.	

The work of making forest reserves is still progressing, and will need to progress in Canada for many years. This year the region around the Waterton Lakes in southwestern Alberta was examined for this purpose. The forester who examined it recommended that 195 square miles be set aside. Also, territories adjacent to certain reserves have been examined with view to ascertaining their suitability to be added. Recommendations have been made that 130 square miles be added to the Spruce Woods Reserve in Manitoba, 238½ square miles to the Pines Reserve in Saskatchewan, 45 square miles to the Beaver Hills Reserve in Saskatchewan and 192 square miles to the Cypress Hills Reserve in Alberta.

It is the policy of the Department in throwing open territories for settlement, to put into forest reserves all land that is unsuited to agriculture or grazing, and in making these examinations the foresters have kept this policy in mind.

#### GRAZING ON FOREST RESERVES.

It is not the policy of the Department, however, to exclude from the reserves all land suitable for grazing. In fact, they already include large grazing areas, and, if the recommendations made this year be sustained, such areas will be added to the Cypress Hills and Beaver Hills. These areas are among timber, and so we include them, rather than to exclude the timber. Nor is it the policy of the Department to prevent grazing on these areas. For several reasons it is desirable that they should be grazed. The forest reserves are for the use of
