

OUR FARMERS' CLUB

Correspondence invited

PRINCE EDWARD ISLAND

PRINCE OF, P. E. I.

KENSINGTON, May 2.—The weather is very cold and backward. Seeding is about completed. There are no prospects for good hay as clover wintered well. Stock are going on grass in better condition than usual. Beef cattle are scarce and high priced, five per pound live weight for best. Little pigs are very scarce; many people unable to get them. Cows 38c to 40c; potatoes, 12c; hay, \$12 to \$14. The people are starting an egg circle going to ship their own eggs—T. G.

RICHMOND, May 2.—Farmers are backward with their seeding on account of the cold and backward weather. Grass is slow in starting, very little clover coming. Feed is plentiful. Mr. Teifer, of the Sheep Division, gave an address to our Institute. He spoke on breed, feed and care of sheep, pointing out the necessity of dipping. Arrangements were made for a dipping demonstration some time in June. His address throughout was of great educational value.—J. D. M. L.

QUEBEC

RICHMOND CO., QUE.
DANVILLE, May 13.—We had some very warm weather the last of April, but lately it has been cold, with occasional frosts. We have had fine dry weather for putting in the crops. Pastures are doing well; plenty of feed for cattle outdoors now. The esterilizers are very thick on most of the orchards. The fruit crop will be a failure if they are not destroyed. Apple trees are in blossom. Hay is selling for \$11; butter, 32c; eggs, 12c; pork, 32c.—M. D. B.

ONTARIO

NORTHUMBERLAND CO., ONT.
WICKLOW, May 13.—The spring has been very favorable for doing spring work. Stock has wintered well, fodder being plentiful and cheap. Many of the farmers are sending their milk to Toronto, instead of the cheese factory. Orchards appear to be blowing well, and more attention is given to spraying than formerly. Many beekeepers have lost nearly their whole stock from foul brood.—J. B. H. L.

OXFORD CO., ONT.

WOODSTOCK, May 27.—The weather is keeping cold with considerable rain. Crops are not growing fast but are taking good root. Nearly all stock is in pasture. Cows are milking fine. A great many feed night and morning. Veal calves are selling at 70c; hogs, \$9.50 a cwt.; fat cattle are very high at almost anything a person asks. Neilson Company in Beaverville takes in about 6000 lbs. of milk on Mondays.—A. M. M. B.

ELGIN CO., ONT.

TALBOTVILLE, May 26.—The country looks beautiful. Everything is growing, while a little more hot weather will start things jumping. The stock have left their winter quarters and are out on the grass, where the bite is satisfactory. The fruit trees bloomed in profusion, and the maining so far a couple of weeks is a sign of an abundant yield. On Dodds' farm near here is a grand field of alfalfa, and soon the mower will be humming in it. The corn is nearly all in the ground, and a large acreage was put in. Most of the potatoes planted were purchased from the brought to St. Thomas on the cars; therefore this will make a good change of seed. The hens are laying splendidly.—J. E. C.

SIMCOE CO., ONT.

ALLSTON, May 25.—The season is unusually advanced so far as growth is concerned owing to the very warm days early in May and though there is a little weather has prevailed with frosts at intervals but little damage has resulted. The demonstration of the Ontario Department of Agriculture in cooperation with the Canadian Pacific Railway on Friday, June 21st, with the evening lectures in the Town Hall which is freely placed at the disposal of the Department.—W. L.

BRUCE CO., ONT.

WARTON, May 25.—Growth is behind the average, with seeding completed about the 20th. Pastures are fair, but the medium promise; fall wheat above average. Not any serious damage to crops. Alfalfa suffered heavily from frost to some extent. Probably wild strawberries and raspberries have been damaged to some extent. Repairs to buildings still occupy the time and cash of many farmers. Potatoes are cheap and plentiful, selling at 40c even. Practically no change in prices of other grains. Potatoes down to \$2.50 a bushel.

MIDDLESEX CO., ONT.

AFRIP, May 25.—While a large portion of the corn is in the soil yet the rains and cool weather have retarded growth, and what is out is almost as well as planted as that planted. Farm labor is still the growing problem. How can we stop this cruel ruin of labor in the towns and cities? Evidently the crowd is in for a C. M. M.

NIAGARA FALLS, ONTARIO, IS WHERE THE FAMOUS

Davis Lighting Systems

ARE MANUFACTURED

ACETYLENE

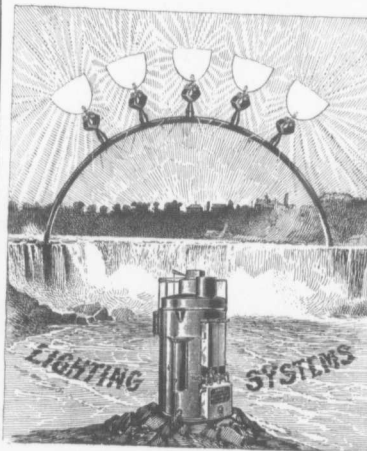

AS MADE BY THE "DAVIS"

The Wonder Light.
No home too small to participate in its benefits.

No building too large to light well and economically.

Safer than City Gas—Brighter than Electricity and cheaper than either

Always ready to be lighted in every room day or night.

No lamps to fill. No chimneys to clean. No wicks to trim. No smoke. No odor.

A beautiful, soft, health-giving and eye-saving light.

More important to the home than a furnace, because used the year around.

Booklets telling all about Acetylene and Davis Systems sent free for the asking.

Estimates furnished for complete installation.

For Lighting and Cooking in the Farm Home Safest Light in the World

The little machine shown in this picture can be placed in one corner of your cellar, and will supply beautiful light to beautiful chandeliers in every room of your house, as well as to your barns, in enclosed globes; also supply gas for cooking, the same as in any city home.

Lights anywhere by merely pulling a chain or pressing a button, the same as electricity—no matches necessary.

BE INDEPENDENT—have YOUR OWN system for lighting and cooking. Costs no more than the value of a horse to instal one.

Write us to-day

State how many rooms you have, and we will tell you exact cost to instal a System, also send you one of our illustrated booklets.

Write TO-DAY while it is on your mind. Address:
