

Brookdale Stock Farm

OFFERS

Four very choice registered Holstein cows, to freshen before December 1st, all good, large, straight cows in good condition. Price, \$250, at Phillipsville Sta., C.N.R. Also four fine large heifers, rising 3 years of age. First calves due in November and December, all in calf to a brother to May Echo Sylvia, for \$200 each. Also 26 heifers from 16 to 24 months of age. Some bred, some not, for \$150 each. And a very choice young bull Sir Lyons Netherlands No. 5236, born October 20, 1917. Sir Lyons 2150, son of May Echo Verget, dam of May Echo Sylvia, world's record milk cow, and dam of the \$106,000 bull calf. The dam of this calf is Brookdale Kordyke Netherlands No. 11745, a 13-h. 5-year-old granddaughter of Pontiac Kordyke, the greatest producing sire in the world. He is marked just right, and will create him and deliver any place in Ontario or Quebec for \$250.00. Will extend pedigree on request. Two other bull calves, born in April, 1918, by same sire for \$200.00, from tested dams.

All registered in the Canadian Jersey Herd Book. Age and pedigree, with butter fat test, will be sent to any parties wishing them. Terms—Twelve month credit on furnishing approved joint notes, or six per cent off for cash.

SALE TO COMMENCE AT 1 O'CLOCK P.M.

D. D. McCuag, Auctioneer

Wm. D. Munro, Proprietor

DON'T BE LATE!

A number of our dairy breeders who regularly use the columns of FARM AND DAIRY have on different occasions sent us copy too late to be in the proper position. This is a disappointment both to us and to the advertiser. It is one, too, that only the advertiser can remedy. It is necessary for us to have all advertisements in the columns of FARM AND DAIRY on SATURDAY OF EACH WEEK. We would, of course, prefer to have it on Thursday or Friday, as early copy means that we are able to give a more careful service.

IF THIS MEANS YOU—know what to do—mail your copy Wednesday or Thursday of the week previous.

LIVE STOCK DEPARTMENT

FARM AND DAIRY

Peterboro, Ont.

work, but there are other Pine Plains folks who are doing what we did, and they won't have to depend on picking berries any longer for money to buy things."

The applause that followed this little speech was exceedingly cordial, and then, as it died out, the people turned to talk about the story of the books. Observing this, the director of the Institute picked up one of the books which were lying on a table, and drawing a magnifying glass from his pocket he said:

"I think you are all as much interested as I was in learning who the unknown philanthropist was. It is a common thing for the well-to-do to give money to the poor, but here was one who realized that to give knowledge was infinitely better. The name of the original owner of these three volumes has been carefully erased, but with the aid of this glass I have been able to see the indentations made by the pencil with which the name was written. I know the gentleman well enough to say that he will be greatly vexed to have his name and his identity, but I must say, nevertheless, that as I read it the name once written in the books was James Kelly, M.D. When the Pine Plains are all proclaimed, as they now are, and the who live in High Plains will have him to thank for seeing how it might be done, and Jefferson Brand for doing the preliminary work under the conditions that I have ever seen surrounding a farm developer."

The Makers' Corner

Butter and Cheese Makers are invited to send contributions to this department, to ask questions on matters relating to their business, and to suggest subjects for discussion.

Cooperative Cheese Marketing

WHY should not the cheese factories and creameries of Ontario organize a great central company for the marketing of all the cheese and butter produced in the province? Such a scheme was proposed in Farm and Dairy a few weeks ago. Since then the Eastern and Western Ontario Dairyman's Associations have appointed delegates to work in cooperation with a committee from the United Farmers of Ontario in determining just what can be done toward launching such a scheme. Recently an editor of Farm and Dairy was discussing this proposal with a well informed dairyman who, for business reasons, wishes his name to be withheld. He expressed himself as follows:

"Our dairy products are exceedingly perishable. Storage facilities are owned by private individuals. The farmers want their money right away. They get it from these private cheese dealers, but they pay all expenses on their cheese to the seaboard just the same and in return for prompt payment they take a lesser price. I see no reason why cooperatively, the patrons of the cheese factories of Eastern Ontario could not market their cheese just as cheaply, or more cheaply than by the method now employed. This would cut out a lot of middlemen and hence a lot of expense. For instance, every firm has its buyer on the local cheese board. These buyers would not be necessary if the cheese marketed cooperatively."

"I am assuming that we would own our own storage," continued our friend. "What other class of manufacturers would place themselves in the position the farmer is in? In the making up of their milk into cheese the farmers are manufacturers. When they sell their manufactured product the sale has to be made immediately, because there is no storage and the product is perishable. I am heartily

in sympathy with any scheme that will improve this condition."

Creamery Situation in Alberta

In a recent letter to Farm and Dairy, Mr. H. Higginbotham, Secretary of the United Farmers of Alberta, reported the following interesting comment on the dairy situation in that province:

"We had a further meeting of milk and cream shippers on this subject on Friday last, when Mr. Marker, the Provincial Dairy Commissioner, attended and gave us something of the history of the cooperative creamery movement in Alberta."

Mr. Marker gave the reasons for the decline of the cooperative creamery movement in Alberta, as being owing to the too keen competition on the part of the private creameries. Mr. Marker pointed out that the private creameries operating in the large cities had the advantage of a large local market for milk and cream, which could be sold at much higher prices than could be secured for milk and cream when turned into butter or cheese."

Mr. Marker also stated that the farmer apparently wanted the rather excessive service in the collection of milk and cream which the private creameries were able to give. In the Province, the competition between the private creameries for the farmer's products has resulted in the establishment of about 200 cream receiving stations by the private creameries."

"In some cases the cream receiving stations are established two or three in the same town and one butler bidding against another. Also the man in charge at the cream receiving station makes out and gives the price in cash or in coupons for the products when received."

"This is contrasted with the cooperative creamery method of doing business, where the farmer is paid a certain amount for his products once per month and the balance came to him, after the product had been made into butter and cheese and sold. According to Mr. Marker, the farmer was not willing to wait for his money for this length of time."

Dairy Products at Columbus

THE dairyman who has been accustomed to the extensive displays of dairy products at the Canadian National would have been disappointed at the meagreness of the entries at the National Dairy Show, Columbus, Ohio, last week. They did, however, represent a great extent of country and covered a wide variety of products. In addition to the classes for cheddar cheese, there were exhibits of cottage cheese, limburger and Swiss. The Swiss cheese, about as large as a small cart wheel and the limburger cheese, a Canadian product, were something unique to us. There were also classes for market milk and cream in bottles. In these classes there were no Canadian entries.

Gold medal prizes awarded in the various butter classes were as follows: To the Athens State Hospital in the dairy butter class; the Hudson Cooperative Creamery Co., Hudson, Minn., 96 in whole milk butter class; and the Fox River Butter Co. of Chicago, Ill., score 96 in the bad separator class.

Cheese prizes at the National Dairy Show gave two gold medals to Ohio firms. These are John Leung & Sons, Dundee, Ohio, whose Swiss cheese factory scored 96, and the Youghurt Product Company, of Urbana, Ohio, whose gold medal was won for American cheddar cheese was won by C. H. Schneider of Maryland, Wis., who scored 93; that for brick cheese was awarded to Jacob Mueller, of Rice Lake, Wis., whose cheese goes to August Martin of Monticello, Wis., score 96.
