# Our Coffee

## Has Made Us Many Friends

First of all they were Coffee customers only. Then one day they decided to try some of our Tea.

They like both, then they are our steady Tea and Coffee customers.

Then they noticed something else that looked pretty good. Tried it. Delighted. And so it goes.

Our eatables aren't good "Only in Spots" It's our aim to have the stock faultless through and through.

That's a high standard to set. Naturally once in a while we fall below it.

### But That's Our Aim

And in attempting this we get just about as high an average of grocery goodness as any store in this country.

You may as well benefit. Begin with a pound of our Coffee. The rest will follow.

### Faulty Construction

Uncontrolled fire is no respecter of persons, places or surroundings. Fire is a good servant but a bad master. Having to cope with such an agent the subject of fire prevention necessarily covers almost illimitable grounds; as we must study it from as many angles as produce the menace.

Defective flues, broken and crooked chimneys or those surrounded with woodwork are dangerous and frequently cause fire.

Your life is in jeopardy from such conditions, especially at night.

Shingle roofs are the cause of most conflagrations. A spark from a chimney on a shingle roof, if it is curled, moss covered and dry will quickly cause a fire.

Out where you have no real way to fight a fire and where a fire usually means a total loss, take no unnecessary chances.

With the existing tendency toward

careless and inefficient workmanship in general the observance of close supervision in all building work is imperative. Contractors, architects and builders should use their influence to compel efficient and careful inspection during construction, not only as a safeguard for the owner and the occupant's, but for their own business reputation.

A baby show and a special prize for the handsomest woman on the grounds were two interesting features of the Kincardine Fair.

### LIVE STOCK MARKETS TORONTO.

With around 2900 cattle on sale yesterday, the quality of which was generally common, there was a fair demand for good butchers, and heavy finished steers. All other grades were slow and the market 1/2c lower. Springers and milch cows were wanted and sold at satisfactory prices, but the common ones were hard to sell.

There was a steady demand for heavy feeding steers at the lower prices.

Prospects are generally steady for good fat cattle, and lower for medium and common grades.

In the early stages of the market there was a good deal of misconception as to conditions in the west, due to sensational reports from Winnipeg to the local newspapers regarding the alleged cut in prices and the numbers arriving. While the markets in Winnipeg, as elsewhere, show an easier trend, there was no sensational drop in prices, and the local trade in Toronto, while slow on the common stuff, held fairly steady in the good cattle. There are none too many good cattle coming, not enough, in fact, and no good purpose is served by misleading reports of whatsoever nature.

With around 5800 sheep and lambs on sale yesterday, lambs sold from 13 1/2c to 18c; yearlings 9c to 10c; light sheep 6 1/2c to 7c; heavy sheep and bucks, 5 1/2 to 6 1/2c. The market was slow and a little easier, around 25c lower. Nearly all cleaned up at close.

The market for hogs, generally speaking was on the 19 1/2c f o b and 20 1/2c basis, fed and watered, and Tuesday's deliveries look the same, but for the balance of the week it looks like 18 1/2c f o b and 19 1/2c fed.

Orchards suffered considerably by the snow fall on Friday.

### The Desert

I crossed the desert in a car that Mr Pullman made; it rolled without a jolt or jar in bright green plush arrayed. And when I wished to sleep at night and rest my drowsy head, there came a porter, most polite who tucked me into bed. And to the dining car I went three times a day at least; beneath large trays the waiters bent and brought a gorgeous feast. The train was full of dames and men who grumbled all the time; they'd never come out here again—the desert was a crime. It hurt their eyes to view the sand, and watch the hills of stone; and everything their anger fanned and they put up a groan. And I recalled the pioneers who blazed the trail that way, and sternly whacked their mules and steers through burning sand all day. They only halted in their stride across that place accursed, to plant some fellow who died of thirst.—Walt Mason.

## Style Information

Fall 1920

**Suit coats** are no longer in accord with the prevailing idea as to smartness. The coat is the chief feature, skirts being fairly plain with novelty pockets and belts. Pin tucks and silk braid and buttons are principally used for trimming. The collars are mostly of the convertible type.

**Coats** may be worn belted or loose. One of the most prominent features will be an extremely large cape collar. Silk twist stitching, furs and fur fabrics will be largely used for trimming. Owing to the prohibitive price of furs, plush and other fur fabrics, made in three-quarter length coats after leading fur models, are likely to be much in demand. Very large collars will top these elegant appearing coats and when worn open cling close to the shoulders giving a slender drooping shoulder line.

**Skirts** are all made on slender graceful lines with a tendency to be fuller and relying somewhat on pleats to dispose of the width. Plaids promise to be much in vogue.

**Dresses** are given their style character in many cases by the simple lines of a drop waist line known as the sweater effect. For tailored styles full length sleeves will dominate. The three quarter sleeve which usually flares at the elbow will be shown in dresses for afternoon wear. Satin effects and pleated skirts are likely to be popular. The materials used are satin, taffeta, wool tulle and serge, with lace collars, edgery and braid for trimming.
