The first district of the control of We hear a great deal from the Tory and Minis-terial Press, of this country, about the extraor-dinary and, in their eyes, unjustifiable remedy many "svile which afflict our country." What, say these worthy, but very squeamish gentry, dis-member the Empire, and transfer so splendid a portion of British territory to the United States we would remark, that it is an admitted principle among all the advocates of popular rights, genuine freedom, and the moral and intellectual amelioration of the human[species, that there may he, in the best established Governments, abuses for which the people are justified in seeking a remedy, by having recourse to the ultima ratio, direct physical force. History, both ancient and modern, abounds in immunerable examples of this mode of suppressing the abuses of monopoly, of resisting the oppressions of tyranny, and relieving Tache, and the refusal of his colleagues to induct Malcolm into the vacant berth (£1000 per annum.) Another rush of vultures may be anticiply, by having recourse to the ultima ratio, diphysical force. History, both ancient and icen, abounds in innumerable examples of this colleague; if illed up, there will be no peace in Toronto, and no slumber for "honest in finamerable examples of this colleagues to this of suppressing the abuses of monopoly, of ting the oppressions of tyranny, and relieving sufferings arising from the intellectual or all bondage of the human mind. We have y and instructive instances at hand, in the of- of two green and kindred nations. England for two green and kindred nations. England that County, for signature, and we notice with pleasure that the Journal is advocating the good. and her immortal offspring in America are con-apicuous illustrations of the efficiency of physical force; in the one case, in achieving their political regeneration; and in the other, in their final and respectation; and in the other, in their maximity and deliverance from the chaims of Metropolitan selfashness and tyrannical domination. The great men, who accomplished these memorals results, though by the violent agency of arms and revolutionary energy, were distinguished, in most instances, for their private virtuas und their develop patriotism, and actod, in their cases, to premote the material interests and the political and moral welfare of their respective countries. So far from history, or the opinions of their posterity condemning their acts, the one reserves for them her brightest pages, and their decendants look to them at bencome, and as examples for imitation. But when the men who are desirous of promoting the political and material interests of Canada by a great change in her position, and when, for that purpose, they propose to arge this change peacestly, and by all lawful means, with, moreover, the consent of the Parent State, we hear nothing but abuse, demunication, and ridicule-from the Tory and Ministerial organs. Now, surely if it be commendable to withstand syranny and other abuses of established power, by revolutionary and even armed resistance, it is plainly justifiable to seek a remedy for wide and desoluting marchy agricultural, manufacturing, and commercial ratio and decay," by patient argument and pactic and have proposed, to remoty them. The Globe, the Ministerial organ, explains that, the delay in the Postal arrangement is caused by the fact, that New Brunswick has not pessed any Law for her part in the matter, and it is necessary that there be concurrent action on the part of all the Provincial Legislatures. We have heard a rumor that New Brunswick is not likely to pass any Act, from fear of having to make up a heavy deficiency annually, owing to the reduction of rates; but we trust that this is not the case. We think that the present high rate of postage is one of the greatest grievances under which the Colony labors.
