HABIT OF THE ATSTEM. Testimony of Ma. Navisan Mariews. a highly respectable and wealthy clisten of Newark, N. J. Da. G. W. Malary — I believe your Forest Wine and Pills have been the means of saving my life. When I commenced taking them, I laid at the point of death, with Dropsy, Piles, and Asthona. My Physicians had given me over as part cure, and my family had lost all hope of my recovery. While in this deadful situation, your Forcet Wine and Pills were procured for me, and before I has distinct the first bottle of the Wine, and hat of Pills. I experienced great relief; my bedy and limbs, which were greatly avoilest, became sensibly reduced. Hopes of my recovery begin now to revive, and after continuing the use of your medicines for about a month, the Piles and Asthona. Were completely cured. The Dropsy, with which my life was placed in such great danger, was also nearly gone. I have continued the use of your Medicines until the present time, and I now only as perfect health as ever I did in my life sithengh? am more than shaty years of age. I searled my recovery entirely to the use of your excellent Medicines. Several of my neighbors have also tred them with similar success in obstinate complaints, and I can cheerfully recommend them to the public.

GREAT CURE OF LIVER COMPLAINT OF NEW YORK, Jan. 9, 1848.

Pa. Halest — Dean Stat.— Having taken your Forest Wise and Pills to resoure a disease of the Liver, from which I have suffered severely for upwards of ten years; and, having adhered clearly to the directions which accompany the Medicines, I have resoured my health, netwithstanding all who know me thought my case incurable. Frevious to taking the Wins and Pilis, I had recourse to taking the Wins and Pilis, I had recourse to the best medical treatment, but continued to give worse for an atarming degree. Some of my friends spoke dispairingly of my case, and tried to persuade me from making use of any advertisely remedies; and, I doubt not, but what there are considered who are dissuaded from taking your excellent Medicines, in consequence of the deception and inefficiency of many advertisel remedies put forth by unprincipled men, in faming advertisely forther should be the means of dissuading many labering under disease, from making trief and being cured by your expellent remedies, humanist passiting, they have favored my life; when I commenced making use of them, I was in a wretched condition, but begen to experience their good effects in less than three days; and, in air weeks from the time I purchased the Medicines, to the great surprise of all my friends, I was entirely cured, and had increased fituen pounds in weight, having taken one had of the Fills and two bettles of the Wing. Marriage requires the fuffilment of several conditions, in order that it may be really the cause of muttal happiness. Could the veil, which cuvers the origin of domestic vystehedness, be raised, and its true source in every instance disclosed, in how many could it be traced to physical disqualifications and their stiendart disappointments. Excesses are abways injurious; the gift which, when used in moderation, is freught with advantage, becomes, when abused, the prolific Source of mischief, and of greater or less higher to the constitution and vital powers.

The particular excesses, on the nature and consequences of which this. Treatise professes it dilate, are productive of greater misery to the human frame than any other to which it is subject.

This Work, contains an accurate and complete account of the Anatomy and Physiology of the Reproductive Organs, and of their relative conditions in health and disease. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the greatest degree in the most oppressive heat of Summer, and that without altering or affecting injuriously the health of the person using them; upon the contrary, they are found to improve and strengthen. The large number of cures effected by the use of the above Waters, enable us to recommend them to the public as an excellent remedy in a very great number of cases. The names of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. Mr. W.s. Boole.—Sir.—The preparation invented by
you for the hair, has been extensively used in my family,
and they give it the decided preference over all other
compositions of the kind. It invigorates and beautifies
the hair, and clears the skin of all impurities, without
producing any ultimate deleterious effects, which are so
frequently the result of many well-known parented*-ompounds.

It is an indispensable article for the Ladies, as it keeps the bair in place and curl, and the skin or parting of the hair free from dandraff and sear. For children, it lays the foundation of a good head of bair.

BOGLE'S AMOLE,

A COMPOUND FOR SHAYING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is derived from the Amole, or "soap plant," of California, an article used by the natives of that to country for washing; and thus the use of strong alkali, so hurful to the akia, is avoided. Its regetable and detergent properties have the purest and most nourishing effects on the akia,—it sooches and allay sirritation, and has a fine, thick, creamy lather, which does not dry on the face. It is a decided luxury to be shaved with this incomparable soap. It is dose up in elegant style, calculated either for the dressing case of the "rough and ready" traveller, or the toilet of the most fastidious ronnoisseur.

The following opinion of the beneficial effects of the Plantagenet Water, is from the last number of the British American Medical and Physical Journal, edited by Dr. Hall. The Doctor recommends the employment of this water to the special attention of the Profession, both in Canada and the United States. Nothing further is required to ensure their general use by all classes of our citizens:—

United States. Nothing further is required to ensure their general use by all classes of our citizers:—

Remedial nostra, or ma'ters professing to be such, and depending for their employment upon the extensiveness of the circulation of hundstory advertisements, and the unmount of monay consequently paid by their proprietors for these, have at no time, since we undertook the management of a Journal intended solely for the advancement of medical cience, found favor in our cycs. Nor shall they, We have always adhered to the old maxim, " he autor ultra creptions." We have always thought, and are daily more convinced of the truthfulness and correctness of our opinion, that all the world was never intended to practice for medical ert, inassunch as all men—aye, and all women ino—are unable to make themselves masters of the science of medicine; and it must be admitted, without a rawit, that without a foundation there can be no super-structure. Not that we would dare to question the qualifications of all to become, perhaps, even, scientific practicioners of the Healing Art—far from it; but seeing that liferent gith have been assigned to different individuals, from the foundation of our world, and that one class is encountrily dependent upon another for its candior task support—the rich and poor, the educated and illiterate, the professor of science and the simple mechanic—as we hold, insit the public should be directed, under God, in the uninitation this particular study. It is under impressions in this kind that we direct the attention of our professional heathers to the special study. It is under impressional heathers to the special study. It is under impressional heathers to the applications of health, by man who have given, and continue to give, the best energies of their mind to this particular study.
