## Free

A 10-Day Tube of Pepsodent, to show you how to end film. See below.

## Never Sleep With a film-coat on your teeth

Millions of people on retiring now combat the film on teeth. They fight it day by day. And those glistening teeth seen everywhere now form one of

You owe yourself a trial of this new teeth-cleaning method. Dentists everywhere advise it. The results it brings are all-important, and they do not come without it

#### What film does

Your teeth are coated with a viscous film. Feel it with your tongue. It clings to teeth, enters crevices and stays. And dentists now trace most tooth troubles to it

The ordinary tooth paste does not end film. So, despite all brushing, much film remains, to cause stain, tartar, germ troubles and decay.

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

#### Ways to combat it

Dental science, after years of research, has found effective ways to fight film. Able authorities have proved their efficiency. Together they bring, in

inion, a new era in teeth cleaning These five methods are combined in a dentifrice called Pepsodent —a tooth paste which complies with all the new requirements. And a ten-day tube ow sent free to everyone who asks

#### Watch the teeth whiten

You will see and feel results from Pepsodent which brushing never brought you heretofore. A week's use, we think, will amaze you.

One ingredient is pepsin. One multiplies the starch digestant in the saliva, to digest all starch deposits that cling. One multiplies the alkalinity of the saliva to neutralize mouth acids. Two factors directly attack the film. One of

them keeps the teeth so highly polished that film cannot easily cling. Watch these effects. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after

using. Mark the absence of the viscous film. Note how teeth whiten as the film-coat disappears. The book we send explains all these results Judge what they mean to you and yours. Cut out the coupon so you won't forget.

NO PERFORMANCE LAST NIGHT. Last night's performance of the 'Prince of Pilsen" was postponed on account of the storm. Special permission, however, has been obtained by the management to repeat the performance on Thursday night when those who had tickets for last night's presentation will be able to use them. In the meantime the booked-for reproduction will take place to-night, when, it is needless to say, the usual capacity audience will attend this

magnificent production. WINARD'S LINIMENT RELIEVES

## Marketing Our Herring. A Protest From

The value of the Bay of Islands herring industry the past season has amounted fo over three hundred thousand dollars. The fish by the "Scotch" pack was the finest ever sent from the shores of this country, and might well be classed as extra large and large. There were practically no small fish put up by that method. In fact the Government standard of sizes being so high, that what are classed as small, might well be termed medium, when compared with Alaskan and other foreign packs. It is generally considered, however, that the packers did not receive the prices for their goods this season compatible to market condipurchasing transaction.

Editor Evening Telegram.

Dear Sir,-It is with great reluctance that I take up my pen to write. As, however, human patience has a imit, I feel it my duty to do so and ask the people of Newfoundland if they want to be fooled any longer by the so-called F.C.B. or rather the Society of Bluffers, for goodness knows no other name will suit them as they are pulling the wool over the people's eyes, and making pure scapegoats out of them. A short time ago under public pressure they cut the price of sugar down to 25 cents per regulations would come to an end tions, they being at the mercy of for- after February. But now we find eign purchasing agents who had that the regulations will be kept in covered the market early in the seas- force for at least four months longer. on and who will no doubt reap big Now what do the Government and the profits in many instances from the members of the F.C.B. think we are. sales in the New York and other They must think we are a low type United States markets, as well as the of human beings to put upp with such rakeoff of a dollar a barrel on the treatment. If the price of sugar were high in the foreign markets, w The time has arrived when our would gladly stand by and accept the packers should get together and for- inevitable. They cannot lift he restrictions, but they can pay hem. Goodness knows, that Job had a lot of patience, but I think the people of Newfoundland have got more. If they didn't they would be up and doing before this. Now, Mr. Editor, by writing these, few notes I wish to state that I am voicing the opinion of the majority of people of this settlement. Men of Newfoundland, you are still living under the Union Jack. You have the freedom of speech, and it's up to you to use it. Come for ward and show the wily politicians that you are men of intelligence yet. In conclusion, I wish to ask the F.C.

what was the patent they used in destroying the rats that lived in the place where the sugar was stored?
