New Skin Peeler In Great Demand

Since the discovery that mercolized wax possesses remarkable absorbent powers when applied to the skin, the demand for it as a complexion renewer has been tremendous. Druggists in every section report sales as far exceeding those of anything similar they have ever had on their shelves.

Ordinary mercolized wax gendly peels off the devitalized cuticle, in minute particles, so that the user gradually loses her old worn-out complexion, the more youthful under-skin taking its place. Cutaneous eruptions, blotches, moth patches, liver spots and freckles are of course removed at the same time. As the wax is entirely harmless, and easy to use, women all over the country are purchasing it in original packages and using it to quiedly returnate their complexions. The wax is applied the same as cold cream, allowed to remain on over night, then washed off with warm water.
