Old Party.

London, April 21.-The Times' Cape Town correspondent says political interest, which has flagged since Chamberlain's departure, is reviving. Dr. Jargeson and Dr. Smart are actively touring the constituents on behalf of the Progressives, and the Afrikander Bond's organ is urging members of its party to imitate the Progressive's example. It is believed Sir John Sprigg desires to be taken back by his old party, but the Progressives will not tolerate him working with the Bond when the Bond is in the majority, and rejoicing with the Progressives when they win.

A LONDON CANADIAN SOCIETY

Canada Not Represented on Food Supply-Warm Praise for Prof. Saunders.

London, April 21.-Some surprise is expected that the colonies are not represented on the royal commission to investigate the food supply of Great Britain in time of war. This is the more strange because Lord Strathcona and other colonials urged the appoint-ment of the commission, suggesting the development of food areas of and communications with the colonies. Some hint that a majority of the commission are desirous of using the war scare to encourage Parliament to protect the farmer by placing a duty on imported wheat and meat.

BEWARE OF THE BERRIES

An Expert Says Strawberries Cause

Washington, D. C., April 21. — Do strawberries cause suicide? Clifford Howard, assistant secretary of the board of commissioners of the District of Columbia, says they do, and in this opinion he is backed by a number of others here who are considered experts on the subject. Mr. Howard himself is a student of suicidal mania. His opinion was given because of the fact that in the last two days five residents of Washington have killed themselves or attempted to do so. Speaking of the present epidemic, Mr. Howard said today:

"It is a strange fact, but the records show that suicides are more frequent in the spring than at any other time of the year, reaching their height in June. There must be some reason for this, and some time ago I hit upon the strawberry as a solution. A study of the subject has developed that the eating of the fruit invariably produces trouble and pain in the back. It is so mental depression. Now suicide is a many years ago that I can hardly say direct result of low spirits, and it would seem that the berries had some weight on the many cases of self-destruction that occur every spring."

President MacFarland, of the board

of commissioners, when he heard of Howards' theory today, went to his of-fice and said: "Mr. Howard, when did you last eat strawberries?"

'Yesterday," was the reply. 'Where?' Howard mentioned the name of the most fashionable hotel in the city.
"What did they cost you?"
"Sixty cents a plate," replied How-

"Then," remarked Mr. MacFarland, "you have good ground for your mental depression theory."
