WORDS OF WARNING.

The gullish herd who hug the delusion that they can make money by backing horses would do well to read and inwardly digest the speech of the Duke of Portland at Mansfield, says London Truth. The duke said that he was certain that if he had consistently betted, the money would have gone in floods from his exchequer into that of the bookmakers. "Be a man as rich as Croesus, he has only to go on backing horses long enough and in sufficiently large sums of money, to lose his fortune and most probably finally to land himself by gambling. The misself with disgrace in the bankrupted court." If a man can afford to lose the money he stakes he has a perfect right to amuse himself by gambling. The mischief is that three-fourths of the people who back horses are not in a position to bear the losses that sooner or later they incur. With the best of horses and the best of information, it is impossible, says the Duke of Portland, to win in the long run by betting.

Jy until 3 o'clock in the morning, when the referee called a halt and the contest a fixed a draw.
