BITTERS.

Inspiration.

Not like a daring, bold, aggressive boy Is Inspiration, eager to pursue; But rather like a maiden, fond, yet coy, Who gives herself to him who best doth woo

Once she may smile, or thrice, thy soul to fire In passing by; but when she turns her face Thou must persist and seek her with desire, If thou wouldst win the favor of her grace.

And if, like some winged (bird, she cleaves th

air, And leaves thee spent and stricken upon the

earth. Still must thou strive to follow even there. That she may knew thy valor and thy worth.

Then shall she come, unveiling all her charms. Giving thee joy for pain, and smiles for tears. And thou shalt clasp her in thy longing arms The while she murmurs music in thine ears.

But ere her kiss has faded from thy cheek She shall flee from thee over hill and glade, And thou must seek—aye! ever seek and seek— For each new conquest of this phantom maid. -ELLA WHEELER WILCOX.

TO MAKE A HOME GUT OF A HOUSEHOLD.

There is not one of us but has a pro- your cold. There is not one of us but has a pro-found contempt for both the giver and the taker of bribes. The practice c willing the children is widespread. There is hard-ly a home that is not guilty of it a, one time or another, and the effect is, though in a less degree, much the same as when in a less degree, much the same as when

or true diphtheria, it is an undesirable in-mate, very liable to be communicated to MORE OF TECUMSEH others, for it only wants a throat slightly inflamed by a cold to find its natural habitat---a soli where it will thrive. Of course the family has kerosene in the house, and a bit of soft old cloth wrapped about a smooth stick will answer in the absence of the camel's hair brush always recommended in regulation articles on ap-

plications to surfaces; the point is to get that oil on to the white spots and kill the The careful ridding of the brush or swab of any superfluous drop prevents choking.

The person applying the oil should be careful to stand a little at the side, so that should the patient cough, no particles of expectorated material can get into the eye of the operator, as the human eye is of all culture mediums for diphtheria bacilli about the most favorable, and to-day many a lost eye is owing to want of carefulness. It is said that the patients experience relief at the first application, and if the brush is properly shaken before using, the only discomfort they experience is a disagreeable taste for a short time.

We wish that a warning word might make people more vigilant as to the care Tecumseh, Tecumseh, and very shortly I to keep the disease confined to the original sufferer. Among the ignorant and poor. where comforts are scarce, it is spread by and well, allowing them all to drink from

the same glass, etc. A German family of five children were swept off within nine days by simple carelessness in these matters, but let every one remember that diphtheria is the most easily

communicated of all the "catching" diseases, that its period of incubation is very

an hour. No one thing makes while dense thicket of willows between him and linen look worse than soaking over night. his pursuers. Indiscriminate punishment is pretty for bedroom furniture and hangoften to blame for cowardly and deceitful ings. traits in children, but on the other hand. careless and injudicious rewarding makes the child bold and defiant. A good effect may be apparent for a time, but satisfied greed is a poor principle upon which to build a strong, self-reliant, manly charac ter.

The child as well as the older person has duties to perform, and it is emphatiknows is right. Upon this point all emanations from the sewer openings mothers should read Miss Scovil's article usually found there: in a recent number of the Ladies' Home Journal, where, in a severely direct parathat ber child has faults which cught to be cured, the injudicious mother tries to obtain the desired result, not by er diesting the root of the mischief, but by cutting off a shoot here and there. Instead fight against, and showing him where he can go for help, she bribes him to overcome some special manifestation of it. She rewards him for being prompt at meals, or for getting up early in the The selfishness is only turned in another toward uprooting it." And again: -"It is no generous rivalry that is fostered by offering prizes to children. Let us depend upon awakening their ambition by other and purer means, permitting them to taste the sweets of well-doing for its own sake, leading them on by every method in our power to understand that virtue is its own reward; not a scanty but an exceeding great one, and strengthen ing them, as far as our earnest efforts can do so, to follow it ungrudgingly."

TREATMENT OF DIPHTHERIA.

An observant and thoughtful country doctor in the French village of Neuville-Champ-d'Olsel, about nine mlies from Rouen, made an important experiment houen, made an important experiment material upon which to work designs. Proctor was the small timber had all been saving many lives if the knowledge of it of the size you wish your pillow, and fasten over it a violent wish your pillow, and fasten over it a epidemic of diphtberia broke out, and the piece of canvass of the same size and deaths were appallingly numerous, and shape, care being taken to have upon the trees, and the Yallar-beltics suffered fearful, English had used petroleum (kerosene) as an antispasmodic and antiseptic; he determined to try it on a little girl of seven, whom he had given up. He explained to the parents that, with their consent, he would make the experiment, and at once
