An Education Bill Introduced

Some Important Features Are Outlined in New Government Measure.

Radical Changes Suggested in System of District School Maintenance.

The education bill introduced in the legislature by the provincial secretary yesterday will probably come up for second reading on Monday next. Under the measure some important changes are suggested as well as amendments to the existing law.

The whole province outside of the city districts is made to bear a share of the cost of education, and is divided into rural school districts, that is where organized school districts are now established, and these districts are now under the new law to bear the cost over and above the amount contributed by the government, as which the bill makes a considerable change.

Under present conditions the province pays the total school expenditure, outside of the city districts, and the allowance is based on a per capita arrangement, \$15, \$15 and \$20 respectively for each pupil in cities of the first, second and third class. By the new arrangement there will be a payment for each teacher employed of \$500 in a first class school, \$375 in the second class and \$420 in the third class. In the rural school districts the allowance will be \$450 for each teacher, with an additional amount not to exceed \$100 for any further amount which the districts themselves may decide to pay for their teachers.

In the words of the act the grant will be made as follows: A per capita grant of three hundred and fifty dollars for each pupil in the first class, three hundred and seventy-five dollars for each
