

Grimsby Power Sprayer

Made in Canada

Spraying for the prevention of San Jose scale, curl leaf, codling moth and all fungus diseases, has become an absolute necessity. The Specialty Manufacturing Company of Grimsby, Ontario, who own a large acreage of fruit, have made a special study of the fruit growers' requirements, in the shape of a power sprayer, as is shown in the accompanying cut. We claim to have the most efficient one on the market as well as the most reasonable in price.

We make our own castings and manufacture our own engines and guarantee every one that leaves our shops to be thoroughly tested, and first class in every particular. Our outfits are guaranteed to carry from 175 to 200 pounds pressure with the use of four or six nozzles.

A clutch is attached to the engine, so that it can be used for other purposes, without detaching your pump. Engine can also be started, and clutch thrown in to start the pump, while running.

We use the well known Emperor pump manufactured by Goulds Mfg. Co., whose business reputation of over sixty years standing is well known to the general public. These pumps are packed from the outside and are guaranteed to stand any spray solution.

Being of Canadian manufacture, we claim to be in a better position to serve Canadians, than are other concerns of American make.

We keep in stock sprayers' accessories, such as the most improved nozzle, and the best quality of hose, etc.

We handle the Gould hand pump, which is the best on earth and we are prepared to demonstrate spraying at any time either by power or hand, to any interested growers who will call at our shops.

Order at once to insure prompt delivery for Spring work.

We have the best of references.

PRICES ON APPLICATION

SPECIALTY MANUFACTURING COMPANY, GRIMSBY ONTARIO
