

PROF. A. MELVILLE BELL, F.R.S.S.A.

Biographical Sketch of the Eminent Phonetician,
Author and Inventor.

1. The first of the great principles of the new system is that of the "Sound-Unit," which is the smallest part of a word which can be pronounced separately. This is the basis of the new system, and is the only one which is based on the actual sounds of the language. The new system is based on the actual sounds of the language, and not on the letters which represent them. This is the only system which is based on the actual sounds of the language, and not on the letters which represent them.
