

the same time abreast of the times, containing the results of the progress made in this branch of recent years.

In conclusion, we will say that the author is a good teacher, and knows how to impart the knowledge possessed by him to others in a way that makes a dry subject interesting and easily understood. This is an art of the highest order, and invaluable in a work of this character.

*The Hygiene of Transmissible Diseases: their Causation, Modes of Dissemination and Methods of Prevention.* By A. C. ABBOTT, M.D., Professor of Hygiene and Bacteriology, University of Pennsylvania. Third edition, revised and enlarged. Octavo, 351 pages, with numerous illustrations. Philadelphia and London: W. B. Saunders & Company. Cloth, \$2.50 net. Canadian agents: J. A. Carveth & Co., Parliament Street, Toronto, Ont.

During the interval that has elapsed since the appearance of the first edition, investigations upon the modes of dissemination of certain of the specific infections have been conspicuously active, and through them much new light has been shed and many novel suggestions have been made; especially is this the case with regard to the roles of insects and rodents as disseminating factors. Wherever practicable, these views have been embodied and discussed. The sections especially on Malaria, Yellow Fever, Plague, Filariasis, Dysentery and Tuberculosis have been both revised and enlarged.

*A Text-Book of the Practice of Medicine.* By DR. HERMAN EICHHORST, Professor of Special Pathology and Therapeutics and Director of the Medical Clinic in the University of Zurich. Translated and edited by AUGUSTUS A. ESHNER, M.D., Professor of Clinical Medicine in the Philadelphia Polyclinic. Two octavo volumes of over 600 pages each; over 150 illustrations. Philadelphia and London: W. B. Saunders & Co. 1901. Price per set: cloth, \$6.00 net. Canadian agents: J. A. Carveth & Co., Toronto, Ont.

The Germans lead the world in internal medicine, and among all German clinicians no name is more renowned than that of the author of this work. Dr. Eichhorst stands to-day among the most eminent authorities of the world, and his Text-Book of the Practice of Medicine is probably the most valuable work of its size on the subject. The book is a new one, but on its publication it sprang into immediate popularity and is now one of the leading text-books in Germany. It is practically a condensed edition of the author's great work on Special Pathology and Therapeutics, and it forms not only an ideal text-book for students, but a practical guide of unusual value to the practising physician. As the essential aim of the physician will always be the cure of disease, the fullest and most careful consideration has been given to treatment.
