McM. vengeance.—“Well McM, didn't quite kill you with the crow-bar, did?”

Editor of the Star.

I see in the Chronicle a motion made by Peter White to reduce cullers fees, another by Rochester to abolish cullers office, the fees ought to be augmented as it is well known that square timber cullers, are in a state of starvation, it is also a fact, before the establishment of the office that some of their fore fathers had to get out of Quebec with straw hats and linen coats, since the office has been established they can wear good broad cloth and have lots of money, go easy Peter and Rochester or you will know more of old times.

Dear Dodd,

There is a low bred ignorant boor named McManus, and oh! ye gods he is assistant corresponding secretary of the St. Patricks Total Abstinence society and the fellow unable to write his own name. Why did the society elect this sneaking ignoramus to an office I would like to know I hear he has a great deal more to say at the meetings than those who can express their ideas but the ignorant generally make themselves conspicuous by their ignorance. This swelling puppy struck a boy a member of the society across the face with his stick on the 25th instant during the procession. Why do the society tolerate this fellows Mr. Editor? Why not kick him out and rid itself of such a nuisance.
