

Hotel Tuller, Detroit, Michigan, U.S.A.

This Building Was Finished With Glidden's Liquid Cement Coating

Mr. L. W. Tuller, proprietor of Hotel Tuller, Detroit, Michigan, writes as follows:

"We painted the outside cement work, which is the lower three stories of our hotel, with Glidden's Liquid Cement nearly a year ago. It has shown no sign of wear so far and has given good results."

Mr. Tuller's letter is only one of scores of similar letters we can show regarding Glidden's Liquid Cement Coating and other Glidden's Advanced Finishes.

Glidden's Liquid Cement Coating is a very high quality of cement incorporated

with a waterproofing medium of great water resisting properties and durability. It bonds itself to concrete and cement surfaces with great tenacity and produces a splendidly decorative effect.

Glidden's Liquid Cement Coating is made in imitation of Bedford Sandstone, and in a variety of other practical shades, including Colonial Buff, Pompeian Buff and Pure White. It is unexcelled for waterproofing and rendering uniform cement, stucco, plaster and concrete surfaces—both interior and exterior. Demonstrating Samples and Literature free on request.
