## **Introduction**

Exporting is important to Canada: The advantages and disadvantages of exporting. 1

---

## **Chapter 1 Developing A Corporate Trade Strategy**

A company must have a plan for exporting. The product must be evaluated, commitment must be gained from management, and a strategic plan formulated. 3

---

## **Chapter 2 Export Pricing**

Proper pricing is essential to successful exporting. Different rationales and methods for export pricing are investigated. 9

---

## **Chapter 3 Trade Terms**

Incoterms set out the obligations of buyer and seller in an export transaction. They must be understood in order to avoid misunderstandings. 13

---

## **Chapter 4 Transportation**

Getting products to the export market in good shape, but at a reasonable price, is essential for continuing sales. 15

---

## **Chapter 5 Financing**

Exporters must know what types of financing are available, and where to obtain them. They must find the means of collecting their money in the shortest possible time with the least possible risk. 19

---

## **Chapter 6 Credit and Collections For Exports**

Credit is increasingly important for dealing with overseas customers. Exporters must use it as a marketing tool, determining how it can satisfy importers while protecting their own interests. 23

---

## **Chapter 7 Export Support Facilities**

Both federal and provincial governments have programs available to assist Canadian exporters. It is essential that exporters be aware of this assistance. 27
