

prosperity, however, is the fact that south of Naining and north of Tunhua there is Lake Chungpo which can be used to generate electric power. With this electric power, we shall have control over the agricultural and industrial undertakings of the whole of Manchuria and Mongolia. No amount of China's agitation can matter in the least to our industrial developments. According to the investigations of the South Manchuria Railway, the water power in the lake can generate at least 800,000 horse-power. With such an enormous quantity of electric power, the industrial conquest of Manchuria and Mongolia can be easily accomplished. In the neighbourhood of this immense power plant, there will be phenomenal growth of wealth. We must build this railway quickly, in order to provide facilities for transportation. Lake Hsingkai, which is owned jointly by China and Russia, can also be developed for the generation of electricity. In order that these two countries may not combine to frustrate our plans, we should introduce a resolution in the International Conference of Electrical Engineering to be held in Tokyo this year, to the effect that in the same area of electricity supply there should not be two power plants. Besides, in the vicinity of Niigata and Hailin, the Oju Paper Mill has acquired extensive rights of lumbering. They need the immediate establishment of the power plant at Lake Chingpo and the early completion of the Hunchun-Hailin Railway in order to bring to the factory at home the raw materials growing wild in Mongolia.

Moreover, the reason that the Fengtien-Kirin-Wuchang Railway and the Kirin and Fengtien authorities intend to build the Wuchang Railway and the Kirin-Mukden Railway, with Hulutao or Tientsin as sea-port, is that they want to recover to themselves the wealth of North Manchuria. By building the Hunchun-Hailin Railway we shall not only strengthen the Kirin-Hueining Railway, but also defeat the Chinese scheme and draw the wealth of Manchuria to Chingchin harbour. The transportation charges will be two-thirds less compared with the Chinese line and one-third less compared with the Siberian line. They cannot compete with us. Our victory is a foregone conclusion.
