Canr . and . Merchants Bank Building. D. W. BUCHANAN, Publisher.

WINNIPEG, AUGUST 22, 1903.

DR. FLETCHER ON NATURE STUDY.

1F

O.

peg

===

newly formed Natural History have laid Winnipeg under a of gratitude in securing Dr. auspices on Tuesday evening. rampless on Tuesday evening, re was a very good atlance in the Y. M. C. A, are room, a fair percentage of all proceedings of the control of

that has been adopted by many tates of the union.

troducing Dr. Fletcher, Mr. dwelt particularly on his in giving an evening to the fiter coming off a long and tolitroducing

ourney. Fletcher was greeted with very applause, on rising, and ex-ine p.easure it gave him to many present, saying that he c expected to see more than a which was the usual thing ut

which was the usual thing at d history meetings. Fletcher is one of the ablest Fletcher is one of the ablest at the result of the state of the state

moossible to overestimate the moossible to overestimate the finature study in a country to the matter and a country to the matter and state to make the matter and state and state and state and state and state and supported by the press, more by the two agricultural particular and the scheme had supported by the press, more by the two agricultural particular and the scheme had supported by the press, more by the two agricultural particular and the scheme had supported by the press, more by the two agricultural particular and the scheme had supported by the press, more by the two agricultural particular and the scheme had supported by the press, more by the two agricultural particular and the scheme had supported by the press, more to the farmers of the prohaving their children receive of the hammes of the comment of the scheme had been as or the last ten years I have met with farmers who have by have been saved hundreds by their children knowing ognize noxious weeds. There in the history of weeds," conspeaker, "when they are land and week, that is the hitake them. There is no weeds, firmly established, easfully eradicated by any process."

Value of Nature Study.

study is valuable because it going to make you a pres-going to make you a pres-ry valuable present. This if Manitoba is a beautiful dd it is all yours. You may e title deeds of any portion he whole beautiful province is yours to enjoy. I shall never cease to be thankful for a lesson my father taught me when I was a lad. We were walking through one of the beautiful parks in London, a perfect garrier to be a large of the state o

come to many or you necroe, that all ble beautiful province of the west is a possible beautiful province of the west is a possible beautiful province of the west is a constant to leave with you is that nature study will do away with much of the needless fear of our common wild animals. Papers of the papers of papers of the papers

Afraid of the Dark.

some of these bear stories.

Some of these bear stories.

Some of the Dark,

Perhaps there is no one thing that causes more suffering among children than being afraid of the dark. Now it people would only along to think, which is the property of the dark the dangers to children in the dark the dangers to children in the dark the dark of the dark then why do we fear it. Tamiliarity with common things will on much to dispic this fear among the dark; then why do we fear in the dark; they why dime to be believe in ghosts, but they do not believe in ghosts, but hat they do not believe in ghosts will be declared he was not afraid of anything. I clicular of a big husky fellow who declared he was not afraid of anything. I that it would do as well the next day. I said; "You are a fraid of ghosts." and it would do as well the next day. I said; "You are a fraid of ghosts." and it would do as well the next day. I said; "You are a fraid of ghosts." and it would do as well the next day. I said; "You believe in ghosts, that is why outhink it erie. If you did not, you would know that a church yould got on," whe safet places you ould got on," whe safet places you ould got on," whe safet places youndered instances.

What Nature Study Is.

What Nature Study is, after all, simply looking at an object and thinking at the same time. The great rouble with the same time and the same time and the same time. The same time are the same time and time a

A Suggestion.

If I might make a suggestion.

If I might make a suggestion I would say, drop the entomology branch and call it the insect branch of your society. People are often frightened by big words. There is nothing so good

as simple language. I do not suppose it will ever come to pess, but I would like to persuase people to stop saying they "commence a thing" and say they commence a thing" and say thing" and not accomplish it? you do thing" and not accomplish it? you have the service of the ser

tion of terms. In Canada people call to the control of terms in the call as bug. There is no call a bug. The call as the call

EUROPEAN WHEAT SUPPLIES

The total stock here given is only 70-000 000 bushels, a decrease of 11,000-900 bushels from July 1, or 6,000,000 bushels from August I sat year, or 45 50 000 bushels from 1900. but an increase of 12,000,000 over the stock held on August I, 1808.

No. 1 country hides are hovering be-tween 8% and 8%c in the Chicago market, with very little business do-

Int.

Professor Marshall, the English
economist, estimates that the British
working classes spend every year not
less than "\$500 000,000 for thines that
do nothine to make them either hapuler or nobler." The president of the
British Association, in a recent address, before the economic section,
dress, before the aconomic and avored his belief that sum named above
was wasted in food alone.
