TEAMSTERS GIVEN INCREASE IN WAGES FOR SNOWFLOWING

Four Dollars Per Trip Is New City Schedule.

At the meeting of the board of works last evening the teamsters who do the snowplowing for the city asked that their wages be increased from \$3 to \$5 per trip. On the recommendation of the City Engineer the board has agreed to give \$4 a trip. This is the first increase given the men in several years.

It was decided to open the west end of Elias street from William street east. Several options were secured some time ago on other property sufficient to open the street to Adelaide, but the owners finally refused the offers, so the street will be opened only part way.

The hydro-electric commission presented an unfavorable report on the suggestion of Controller R. W. Shaw that power be developed at the incinerator. The engineers of the commission thought that power could not be produced economically.

W. L. Munn was granted the right to erect a marquee in front of his store as wide as the sidewalk.

Wants a Sewer.
Ed Shea presented a petition for a sewer on Colborne street, from Waterloo to Colborne street. He is building seven houses on the street and desires the sewer. It will be constructed this year if possible.

Several complaints were made regarding the smoke nuisance on Dundas street, near Adelaide. Controller Moore pointed out that some city regulations, especially the colliery, were the worst offenders. The matter was sent to City Engineer Brazier with instructions to take such steps as are necessary to abate the nuisance.

J. A. Brownlee was given the contract for furnishing two stoves for the market basement at \$45 each.

Mr. Brazier reported that the water carts and other machinery had been stored for the winter in the cattle sheds at Queen's Park.

Many Laid Over.
A number of questions were referred to the council of 1918. Mr. Brazier was given authority to purchase certain books and filing cabinets for the department.

An this was the last meeting of the Year Aids. Moorhead took advantage of the occasion to pay a tribute to the splendid manner in which Controller Moore had discharged the duties of chairman, and for the efficient manner in which the business had been transacted. It was a pleasure to be associated with such a man as Controller Moore.

The committee had been handling the work under the direction of the committee had been handled.

Controller Moore, replying, stated that the credit should go to the engineer and his staff. He had been careful to give the engineer as free a hand as possible, with the result that the work had been done satisfactorily.

"The citizens have no reason to complain of the work done this year," he said. "No money has been wasted, and good value has been given for every dollar expended."

"I can assure every word said," declared Ald. Cunningham.

"I want to say that I have criticized the engineer more than some of the other aldermen, but I also want to say that he is a good man and is doing fine service for the city," said Ald. Keene.

THE QUININE THAT DOES NOT AFFECT THE HEAD.
Because of its tonic and laxative effect, Laxative Quinine can be taken by anyone without causing nervousness or ringing in the head. There is only one "Laxative Quinine." E. W. GROVE'S signature is on box.

WEEK'S PROGRAMS WELL FILLED UP
Entertainments for Soldiers in Training Arranged by Military "Y."

An interesting program for this week has been arranged for the soldiers quartered at Queen's Park Camp by Secretary Dawson of the military "Y. M. C. A., and it includes among other things, entertainment, movies and sing-songs, followed by a concert Monday evening at 8 o'clock.

A concert company, on Friday evening Mr. Sutton and his concert party will entertain the boys, and on Sunday evening a service and a sing-song will take place, followed by an address by Secretary Dawson.

DEFAULTERS WHO DIDN'T REGISTER STILL COMING IN

Three More Report At the Armories on Monday, One Being Sent to W. O. R.

21 SENT BY TRIBUNALS

Twelve Graded as Combatant Eligibles by Medical Boards—Nine More Recruits.

The fact that only a few cases were considered by exemption tribunals on Saturday, and none by some of them on Monday, accounted for a decrease in the number of men examined by medical boards at the armories on Tuesday. Only twenty-one men were referred to the medical officers by the tribunals, twelve of these more than 50 per cent, were found fit for service in the front-line trenches.

Three men reported for immediate service. They were R. L. McFawley, Lucan; T. A. Hodgins, Lucan; and A. B. Thompson, Western Ontario Regiment. The two Lucan men were sent to the 63rd Battery, and the westerner to the 1st Depot Battalion, Western Ontario Regiment. Three men surrendered. One qualified in Category A-2 and was sent to the Western Ontario Regiment. The others were in lower categories and were given a week's leave.

Nine recruits were examined. They were D. Cameron, Flint, U. S. A.; J. M. Holmes, Detroit, Canada; R. White, Detroit, Canada; Edward Vachon, Detroit, Canada; J. F. Harvey, Detroit, South America; H. A. Graham, Flint, Canada; Frank Robinson, Grand Rapids, Canada; George Day, London, England; S. E. Dean, London, Canada. All were sent to the Western Ontario Regiment except Harvey, who joined the 63rd Battery, and Day, who joined the 7th Regiment, Details.

The men examined under the military service act were categorized as follows:

Class A, combatant service overseas 12
Class B, non-combatant service overseas 2
Class C, service in Canada 2
Class D, doubtful 1
Class E, unfit 4

Total 21

HOUSE RANSACKED BY A BURGLAR WHO GOT VALUED WATCH

Methods of a Maitland Street "Operator" Thorough.

BURGLAR ALARM POPULAR

Many Traps Now In Place For Reception of the Thieves Working London.

The methods employed by the sneak thief who entered the home of Allan East, 417 Maitland street, on Monday evening while all the family were away, were similar to those of the burglar who discovered the diamond ring and a watch in a clothes closet in a house in the city on Sunday evening.

Clothes were torn down in clothes closets and thrown on the floor, and the house thoroughly ransacked throughout. While other jewelry was overlooked, a valued possession was taken, a watch that had belonged to Mrs. Barr's mother.

The committee had been handling the work under the direction of the committee had been handled.

Controller Moore, replying, stated that the credit should go to the engineer and his staff. He had been careful to give the engineer as free a hand as possible, with the result that the work had been done satisfactorily.

"The citizens have no reason to complain of the work done this year," he said. "No money has been wasted, and good value has been given for every dollar expended."

"I can assure every word said," declared Ald. Cunningham.

PARKHILL CHUMS WHO HAVE FALLEN IN ACTION

Pte. C. McPherson, Pte. H. Morrison. Both young soldiers were members of the 15th Middlesex Battalion. Pte. Morrison was a son of Mrs. John Morrison of West Williams. Pte. McPherson is a son of J. R. McPherson of Mill street, Parkhill.

FEAR OF LOSING FARMERS' VOTES KEEPS OLEO OUT

This Is Belief Expressed by Local Butcher On Hold-Up of Licenses.

LITTLE EFFECT NOW

Apparent Desire to Keep Out Substitute Until After Election Holds Price Up.

Unless the much advertised butter substitute, oleomargarine, appears for sale in Canada within the next three weeks, it is predicted by local dealers that butter will reach its top winter price, which will be around the 60c per pound mark.

If the provisions of the order-in-council allowing the importation and sale of oleomargarine were carried out at the time of the Government sanction of the law, it is certain, say these dealers, that butter would have remained stationary and that present prices would have ranged from 38c to 40c.

Two weeks ago, when local butchers and cold storage men were questioned on the probability of being able to purchase oleo in this city before December 1, they expressed the opinion that unless the food controller expedited its sale the advent of margarine into the country would be of little benefit to Canadians.

The order-in-council allowing the sale of oleomargarine was passed with the object of reducing butter prices, a local cold storage man said. "The effect of margarine on butter would not be evidenced until a month or so after the coming of oleo into the country. If margarine had been allowed importation one month ago, today we could have obtained butter at 40c per pound. As it is, the present high price of butter will remain unchanged for several weeks, and unless oleo appears in the meantime prices will ascend as high as 60c and 70c."

Since it was announced that an order-in-council had been passed allowing the sale and manufacture of oleo in the country, the granting of licenses governing its sale has been postponed several times. Prospective dealers in oleo received word some day ago that the butter substitute will come into the country on December 10.

One belief in the city expressed the belief that margarine would not be allowed importation until after the election, owing to the Government fear of the antagonism which such a move would create among farmers.

SELF-GOVERNMENT INCREASED BONDS OF MOTHERLAND

Added To Attachment, Says Librarian Landon.

"U" EXTENSION LECTURE

Second of Interesting Series Given on Monday Night in Public Library.

The personalities of the men who joined hands fifty years ago to bring together the provinces into one Dominion were sketched last night by Public Librarian Fred Landon, in the second of the series of university extension lectures being held in the public library. The chair was taken by Principal G. F. Rogers of the Collegiate Institute.

The lecturer pointed out that in English-speaking countries at least it was the custom to abuse and run down politicians individually and as a class. Those who would glorify the Fathers of Confederation must remember that they too in their own day were politicians, and some of them regarded as a pretty sharp type. There were two of the various stages by which a politician developed into a statesman and later into a father of his country. The special merit of these men was that at a critical time they set themselves to a definite task, and didn't let go until they had accomplished it. Then they went back to party quarrelling. Macdonald and Brown, who had not spoken to each other for ten years, came together on union, carried it through, and then they were at each other's throats.

The very great part that was played by Cartier in leading the French-Canadians was one of the interesting features of the address, in view of the attitude taken by French Canada today. Cartier possessed great influence in Quebec, and both Macdonald and Brown were well acquainted with him. He held on men was greater than that of any of the Fathers of Confederation, and the public life of Canada was well shown by the fact that for 23 years after confederation he was the greatest political figure in the country. The human side of Macdonald was set forth, that the nation of half a continent had set an example that other British dominions had since followed. The character of half a continent had set an example that other British dominions had since followed.

The British constitution had been proven, and it had been shown that self-government did not diminish, but increased attachment to the motherland.

Principal Rogers, in introducing the speaker, commended warmly the idea of extension lectures. He believed that the university was fulfilling a real duty to the community by arranging such evenings.

PETROLEA HAS WATER AGAIN.

SARNIA, Nov. 27.—The intake pipe of the Petrolia waterworks has been cleared of the obstruction that robbed Petrolia of its water supply for a few days.

235 ATTENDING NORMAL SCHOOL MUSTRY AGAIN

Local Students Have To Re-write Equivalent of Lower School Exams.

HAVE BEEN PREPARING

Improper Grounding In Many Subjects Cause of Department's Decree.

It is announced today that 235 students at the Normal School will write on examinations at Christmas equivalent to the Lower School exams, of the high schools.

The announcement by the department of education at Toronto some days ago created somewhat of a sensation, but in London the students were somewhat prepared for the statement, and have been getting ready. The subjects on which they will write are arithmetic, grammar, Canadian history, British history and geography. In addition, there will be oral reading, with a series of questions on that.

It would seem that the students who have graduated from Normal schools for the teaching professions have not been grounded sufficiently on these subjects, and the department is seeing to it that they are properly equipped for their work.

About 235 students at the Normal will write on these examinations," said Dr. S. J. Radcliffe, the principal. "A few will escape on account of attending the Normal last year. I warned the students early in September, that they might expect this, and I think the majority are working hard on the subjects in question to prepare themselves properly."

SPECIAL CALL TO RAILWAY WORKERS TO GO OVERSEAS

Skilled Railway Employees' Corps Needs More Men.

RECRUITS ARE ASKED FOR

Men Who Will Serve Entirely In Railroad Work In France. Wanted Now.

Another special call for skilled railway employees to join the Canadian Expeditionary Force has been sent out from Ottawa. Advice received by Capt. F. D. Canfield, O. C. of the Special Service, Canadian Engineers, says that a number of men of the skilled railway type are required for service at the front. These men will be retained exclusively in railway work, and will aid in the operation of the railways back of the Canadian and British lines in France.

Engineers and firemen are wanted especially, as well as men who by their civilian occupations are familiar with the inside workings of the railways. Because there is no special recruiting office in this military district, Capt. Canfield has asked that the names of any such men, willing to accept the call to him. An officer, detailed from Ottawa, will call on the prospective recruits.

Men who are drafted under the call of the Military Service Act will not be taken in the special railway corps, according to the instructions so far received. This means that the prospective recruits will have to be outside the limit for the first call or married men of the second class.

QUERIES REGARDING MILITARY SERVICE

Send In Your Problems and They Will Be Answered From Official Information by The Advertiser.

Question—1. If a man in Category A is called up for military service, could he be examined again, and if so, when?

2. Can he be examined by any doctor of his own choosing, or must it be an army doctor?

3. In case of an appeal, must he have the second medical papers with him when he answers to the appeal call?

Answer—1. He could inform the local tribunal that he was not satisfied with the result of his examination and the tribunal might then order him to another medical board. If they refuse to do this, let him appeal the case, and seek another examination when his case comes down.

2. There is nothing to prevent a man from going to any doctor he may choose for an examination, but if he goes to a civilian practitioner he would do so at his own expense. The certificate of a civilian doctor would carry some weight with a tribunal, but it is probable that he would have to submit to a second examination before a military medical board, and in order that he might be placed in his proper category before an exemption could be granted.

3. Not necessary. The appeal tribunal could direct him to a second medical board if it were considered necessary.

ORDER AFFECTS ONLY NORMAL SCHOOL PUPILS

In connection with a story from Toronto that those who have passed the state Institute, says that it applies only to pupils attending Normal School. He is unable to understand why the department of education has issued the order. According to word from Toronto, Ontario Normal School students are affected.

PTE. COLLEDGE IS SHELL SHOCKED

ST. THOMAS, Nov. 27.—Mrs. Rena McGulgan, 12 Maple street, has been notified that Pte. Blaine Colledge had been officially reported admitted to a military hospital in France suffering from shell shock. Pte. Colledge went overseas with the 51st Battalion.

PUPILS' RECITAL AT FIRST PRESBYTERIAN CHURCH SUCCESSFUL

Interesting Program Presented on Tuesday Evening.

A most pleasing entertainment was given in the First Presbyterian Sunday school hall last evening by singing and piano pupils of George G. Leithbridge, organist and choirmaster of the church, assisted by the Sunday school orchestra.

A feature of the program worthy of special mention was the fine choice of songs given. While some well-known numbers were included, not a single selection was presented which had a suspicion of being hackneyed.

It was interesting to note and to hear a song cycle, "The Sun Dial," composed by Gena Branscombe, the distinguished Canadian song-writer, a feature of the program worthy of special mention was the fine choice of songs given.

Miss M. Jackson of St. Thomas played in a musicianly manner the Beethoven sonata, op. 14, No. 1, and afterwards a graceful bit, "Pan and His Fute" by Godard. Ronald Hart revealed much talent and an excellent command of finger technique, along with good rhythm and phrasing in his playing.

Miss Grace Elliott of Galt, medal awarded by the Toronto Conservatory of Music last summer for the candidate obtaining the highest standing in the piano and organ department of the teachers' course, in competition with candidates from Quebec to the Pacific coast, a signal triumph for both herself and teacher.

LISTEN TO THIS! SAYS CORNS LIFT RIGHT OUT NOW

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn, the soreness is relieved and soon the entire corn, root and all, lifts out with the fingers.

It is a sticky ether compound which dries the moment it is applied and simply shrivels the corn without inflaming or even irritating the surrounding tissue or skin. It is claimed that a quarter of an ounce of freezone will cost very little at any of the drug stores, but is sufficient to rid one's feet of every hard or soft corn or callus.

You are further warned that cutting at a corn is a suicidal habit.

By all means, girls, prepare a lemon lotion to keep your skin flexible and young looking. You will soon realize that true loveliness does not mean the powdery look or waxen colorlessness of some hothouse flower, but is typified by the velvety softness of your skin, your peachlike complexion and rosy-white hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quart of the most wonderful lemon skin softener and complexion beautifier by squeezing the juice of two fresh lemons into a bottle containing three ounces of cream.
